1	Introduction	1
1.1	Research Background and Significance	1
1.2	Current Research Status	2
1.2.1	Land Surface Evapotranspiration Models	2
1.2.2	Current Issues	8
1.3	Research Outline	10
	References.	11
2	Comparison of Dual-Source Evapotranspiration Models in Estimating Potential Evaporation and Transpiration	15
2.1	Introduction	15
2.2	Evapotranspiration Models	16
2.2.1	Penman-Monteith Model	16
2.2.2	Shuttleworth-Wallace Model	17
2.2.3	Two-Patch Model	20
2.2.4	TVET Model	21
2.3	Comparison Setups	22
2.4	Results and Discussion	22
2.4.1	Surfaces with Full Vegetation Cover (Case A)	22
2.4.2	Surfaces with Uniform and Partial Vegetation Cover (Case B)	24
2.4.3	Surfaces with Non-uniform and Partial Vegetation Cover (Case C)	26
2.5	Conclusion.	27
	References.	28
3	A Hybrid Dual-Source Model of Estimating Evapotranspiration over Different Ecosystems	31
3.1	Introduction	31
3.2	Model Development	32

3.3	Data and Model Evaluation Criteria	34
3.3.1	Study Site and Data	34
3.3.2	Evaluation of Model Performance	36
3.4	Results and Discussion	37
3.4.1	Model Validation	37
3.4.2	Comparison with Other Models	38
3.4.3	Evapotranspiration Components (E and T) and Its Vegetation Controls	41
3.4.4	Advantages of the Hybrid Dual-Source Model	46
3.5	Conclusion.	47
	References.	47
