Part I Fundamentals and Basic Theory

1	Introduction	3
1.1	Motivations	3
1.2	Brief Introduction to Swarm Intelligence	4
1.3	Brief Introduction to FWA	5
1.4	Characteristics and Advantages of FWA	7
1.5	Overviews of FWA Research	7
1.6	Overview of the Book	10
	References	14
2	Fireworks Algorithm (FWA)	17
2.1	Introduction	17
2.2	FWA Principle	18
2.2.1	Explosion Operator	18
2.2.2	Gaussian Mutation Operator	19
2.2.3	Mapping Rule	20
2.2.4	Selection Strategy	20
2.3	Implementation of FWA	20
2.3.1	Explosion Operator	21
2.3.2	Mutation Operator	22
2.3.3	Mapping Rule	23
2.3.4	Selection Strategy	23
2.4	The Characteristics of FWA	25
2.4.1	Explosion	25
2.4.2	Instantaneity	25
2.4.3	Simplicity	26
2.4.4	Locality	26
2.4.5	Emergent Property	26
2.4.6	Distributed Parallelism	26
2.4.7	Diversity	26

2.4.8	Extendibility	27
2.4.9	Adaptability	28
2.5	Impact of Operators in FWA on Performance.	28
2.5.1	Explosion Operator	28
2.5.2	Gaussian Mutation	29
2.5.3	Mapping Rule	30
2.5.4	Selection Strategy	30
2.6	Comparison of FWA with Three Other SI Algorithms.	31
2.6.1	Ideas Comparison Between FWA and GA	31
2.6.2	Ideas Comparison Between FWA and Two Versions of PSO.	32
2.7	Experimental Results and Analysis	33
2.7.1	Benchmark Functions	33
2.7.2	Parameters Setting	33
2.7.3	Experimental Results.	33
2.7.4	Analysis	34
2.8	Summary.	35
	References.	35
3	Modeling and Theoretical Analysis of FWA.	37
3.1	A Stochastic Process Model for FWA	37
3.2	Global Convergence Theorems	39
3.3	Time Complexity of FWA	41
3.3.1	Basic Theory of Time Complexity	41
3.4	Deep Analysis of Time Complexity.	45
3.5	Influence of Random Number Generators on FWA.	48
3.5.1	Random Number Generators	49
3.5.2	Modular Arithmetic Based RNGs	49
3.5.3	Binary Arithmetic Based RNGs	51
3.5.4	Experimental Setup	52
3.5.5	Experimental Results and Analysis	54
3.6	Summary.	56
	References.	57

Part II FWA Variants

4	FWA Based on Function Approximation Approaches.	61
4.1	Introduction	61
4.2	Fireworks Algorithm	62
4.3	Fireworks Algorithm Acceleration by Elite Strategy	62
4.3.1	Motivation	62
4.3.2	Sampling Methods	63
4.3.3	Fireworks Algorithm with an Elite Strategy	63

4.4	Experimental Evaluations.	65
4.4.1	Experimental Design.	65
4.4.2	Experimental Results.	69
4.5	Discussion.	69
4.5.1	Fireworks Algorithm Acceleration Performance	70
4.5.2	Approximation Methods	70
4.5.3	Sampling Methods	70
4.5.4	Sampling Data Number.	71
4.6	Summary.	72
	References.	72
5	FWA with Controlling Exploration and Exploitation	75
5.1	Some Improvements on Operations in FWA.	75
5.1.1	The Amplitude and Number of Sparks.	75
5.1.2	The Mutation Improvement	80
5.1.3	Selection Strategy.	80
5.2	Experiment and Analysis.	81
5.2.1	Experimental Design.	81
5.2.2	Experimental Results and Analysis	84
5.3	Summary.	84
	References.	84
6	Enhanced Fireworks Algorithm.	87
6.1	Properties of Conventional FWA	87
6.2	The Proposed EFWA	88
6.2.1	A New Minimal Explosion Amplitude Check (MEAC)	88
6.2.2	A New Operator for Generating Explosion Sparks	89
6.2.3	A New Mapping Operator	90
6.2.4	A New Operator for Generating Gaussian Sparks . . .	91
6.2.5	A New Selection Operator.	94
6.3	Experiments.	94
6.3.1	Experimental Setup.	95
6.3.2	Experimental Results.	96
6.3.3	Experimental Observations.	101
6.3.4	Influences of Dimension Selection Methods on FWA and EFWA.	101
6.4	Summary.	102
	References.	102

7	Fireworks Algorithm with Dynamic Search	103
7.1	Introduction	103
7.2	Properties of Minimal Explosion Amplitude Check (MEAC) Strategy in EFWA	105
7.3	The dynFWA	106
7.3.1	Dynamic Explosion Amplitude for the First Group (CF)	106
7.3.2	Dynamic Explosion Amplitude Update for CF	108
7.3.3	Some Theoretical Analysis and Considerations	108
7.3.4	Explosion Amplitude for the Second Group (Non-CF)	110
7.3.5	Elimination of the Gaussian Sparks Operator	110
7.3.6	Framework of dynFWA	111
7.4	Experiments	111
7.4.1	Experimental Setup	112
7.4.2	Experimental Results	112
7.5	Summary	116
	References	117
8	Adaptive Fireworks Algorithm	119
8.1	Motivation	119
8.2	Analysis of the Amplitude in FWA and EFWA	119
8.3	Adaptive Explosion Amplitude	120
8.3.1	Principles	120
8.3.2	Algorithm	123
8.3.3	Explanation	124
8.4	Adaptive Fireworks Algorithm	127
8.5	Experiments	128
8.6	Discussion	130
8.7	Summary	130
	References	131
9	Cooperative Fireworks Algorithm	133
9.1	Introduction	133
9.2	Probabilistically Oriented Explosion Mechanism (POEM)	134
9.3	Remarks on Parameters	136
9.4	Framework of Cooperative Firework Algorithm (CoFWA)	136
9.5	A Kind of Realization of POEM	137
9.6	The Proposed CoFWA	139
9.7	Convergence Theorem of CoFWA	141
9.8	Experiments	148
9.9	Conclusion	149
	References	149

10 Hybrid Fireworks Algorithms	151
10.1 FWA-DM	151
10.1.1 Differential Mutation Operator	152
10.1.2 Applying DM to EFWA	152
10.2 FWA-DE	154
10.3 CFWA	156
10.3.1 Design of Digital Filter	156
10.3.2 CFWA Implementation	156
10.4 BBO_FWA	157
10.4.1 Biogeography-Based Optimization (BBO)	157
10.4.2 A Hybrid Biogeography-Based Optimization and Fireworks Algorithm (BBO_FWA)	158
10.4.3 Discussions	160
10.5 Summary	160
References.	160

Part III Advanced Topics

11 FWA for Multiobjective Optimization	165
11.1 Introduction	165
11.2 Problem Model.	168
11.3 MOFWA for VFR Problem	170
11.3.1 Fitness Assignment Strategy.	170
11.3.2 Evolutionary Strategies	171
11.3.3 The MOFWA Framework	172
11.3.4 Initial Population Generation	174
11.3.5 Non-dominated Archive Maintenance	175
11.4 Computational Experiments	175
11.4.1 Comparative Experiments on BN and CA VRF Problems	176
11.4.2 Case Study of a Real-World CO VRF Problem	182
11.5 Discussion	185
11.6 Summary.	186
References.	187
12 S-Metric-Based Multi-objective Fireworks Algorithm	189
12.1 Introduction	189
12.2 S-Metric	190
12.3 The Proposed S-MOFWA	192
12.3.1 Initialization.	192
12.3.2 Calculation of the Explosion Sparks Number and Explosion Amplitude.	193
12.3.3 Explosion	193

12.3.4	Gaussian Mutation	194
12.3.5	Fireworks Selection and Archive Updating.	194
12.3.6	Framework of <i>S</i> -MOFWA	198
12.4	Experiments	199
12.4.1	Experimental Setup	199
12.4.2	Evaluation Criteria	200
12.4.3	Experimental Results	200
12.4.4	Discussion	203
12.5	Environmental/Economic Power Dispatch Problem	205
12.5.1	Problem Statement	205
12.5.2	Evaluation Criterion	205
12.5.3	Results and Discussion	206
12.6	Summary	206
	References.	207
13	Discrete Firework Algorithm for Combinatorial Optimization Problem.	209
13.1	Travelling Salesman Problem	209
13.1.1	Problem Statement	209
13.2	Discrete Firework Algorithm	211
13.2.1	Framework of DFWA	211
13.2.2	Explosion Operator	213
13.2.3	Identical Mutation Operator	217
13.2.4	Selection Strategy	218
13.2.5	Adaptive Strategy	219
13.3	Experimental Results and Analysis	219
13.3.1	Parameters Setting and Performance Analysis.	220
13.3.2	Results on Small Test Cases.	222
13.3.3	Results on Medium Test Case	223
13.3.4	Results on Large Test Case	225
13.4	Comparison with Classical Algorithms	225
13.5	Summary	225
	References.	226
14	Implementation of Fireworks Algorithm Based on GPU	227
14.1	General Purpose GPU Computing.	227
14.1.1	Advantages of GPU Computing	228
14.1.2	Development Tools on GPU Hardware	229
14.1.3	Compute Unified Device Architecture (CUDA)	231
14.2	GPU-FWA	232
14.2.1	FWA Search	233
14.2.2	Attract-Repulse Mutation	235
14.2.3	Implementation.	237
14.2.4	Empirical Analysis	239

14.3 Summary	243
References.	243

Part IV Applications

15 FWA Application on Non-negative Matrix Factorization.	247
15.1 Introduction	247
15.1.1 NMF Research History	248
15.2 Low-Rank Approximations	249
15.2.1 Non-negative Matrix Factorization (NMF)	250
15.3 Swarm Intelligence Optimization	253
15.4 Improving NMF with Swarm Intelligence Optimization	253
15.4.1 Parameters	254
15.4.2 Optimization Strategy 1 for Initialization	255
15.4.3 Optimization Strategy 2 for Iterative Optimization.	256
15.5 Experiment Setup	257
15.5.1 Software	257
15.5.2 Hardware.	258
15.5.3 Parameter Setup	258
15.5.4 Data Sets	258
15.5.5 Evaluation of Optimization Strategy 1	258
15.5.6 Evaluation of Optimization Strategy 2	260
15.6 Summary	260
References.	261
 16 FWA Applications on Clustering, Pattern Recognition, and Inversion Problem	 263
16.1 Document Clustering.	263
16.1.1 Document Features	264
16.1.2 Fireworks Algorithm for Document Clustering	266
16.1.3 Experiment	267
16.2 Spam Detection	268
16.2.1 Problem Description	269
16.2.2 Optimization Principle.	271
16.2.3 Experimental Results.	272
16.3 Image Recognition	273
16.3.1 Relation Between <i>SUM_XOR</i> and <i>OR_XOR</i>	274
16.3.2 The Proposed Unified Distance Measure Scheme	275
16.3.3 Experiment	276

16.4	Seismic Inversion Problem	278
16.4.1	Problem Statement	279
16.4.2	Experiment and Analysis	281
16.5	Summary	282
	References.	282
17	Group Explosion Strategy for Multiple Targets Search in Swarm Robotics	285
17.1	Introduction	285
17.2	Problem Statement	286
17.3	Group Explosion Strategy	289
17.3.1	Introducing Fireworks Explosion into Swarm Robotics	289
17.3.2	Framework of Group Explosion Strategy	290
17.3.3	Searching in Groups	291
17.3.4	Splitting Groups	292
17.3.5	History State Storage.	293
17.3.6	Velocity Update Equation	294
17.3.7	Obstacle Avoidance	294
17.4	Simulation Results and Discussions.	294
17.4.1	Baseline Algorithm	295
17.4.2	Validation Experiment.	295
17.4.3	Scalable Experiment	297
17.4.4	Obstacle Avoidance Experiment	297
17.5	Summary	298
	References.	298
	Postscript	301
	Appendix A: Benchmark Suites	303
	Appendix B: Resources	317
	Index	319

Fireworks Algorithm

A Novel Swarm Intelligence Optimization Method

Tan, Y.

2015, XXXIX, 323 p., Hardcover

ISBN: 978-3-662-46352-9
