

Contents

1 Cucurbit[n]uril Chemistry	1
1.1 Development of Cucurbit[n]urils and Their Derivates	1
1.2 General Properties of Outer-Surface Interactions of Q[n]s	5
References	6
2 Simple Coordination Complexes of Cucurbit[n]urils with Metal Ions . .	9
2.1 Simple Coordination of Cucurbit[5]urils with Metal Ions	10
2.2 Simple Coordination Complexes of Cucurbit[6]urils with Metal Ions	18
2.3 Simple Coordination Complexes of Cucurbit[n , $n \geq 7$]urils with Metal Ions	31
References	33
3 Coordination Polymers of Cucurbit[n]urils with Metal Ions	37
3.1 Coordination Polymers Prepared by Simple Reaction of Cucurbit[n]urils with Metal Ions	37
3.2 Induced Coordination Polymers of Cucurbit[5]urils with Metal Ions	41
3.3 Induced Coordination Polymers of Cucurbit[6]urils with Metal Ions	55
3.4 Induced Coordination Polymers of Cucurbit[7]uril with Metal Ions	67
3.5 Induced Coordination Polymers of Cucurbit[8]uril with Metal Ions	72
3.6 Induced Coordination Polymers of Cucurbit[$n > 8$]uril with Metal Ions	80
References	81
4 Potential Applications of Q[n]-Based Coordination Complexes and Polymers	85
References	95

Supramolecular Assemblies of Cucurbit[n]urils with
Metal Ions

Coordination, Structures and Properties

Ni, X.-L.; Xiao, X.; Cong, H.; Tao, Z.

2015, VII, 96 p. 87 illus., 23 illus. in color., Softcover

ISBN: 978-3-662-46628-5
