

Contents

- 1 Introduction 1**
 - 1.1 Progress in Surface/Interface Adhesion Mechanics 1
 - 1.1.1 Contact Mechanics 2
 - 1.1.2 Biological Adhesion and Bio-inspired Adhesion. 4
 - 1.2 Contents of the Thesis 14
 - References 15
- 2 Extension of the Two-Dimensional JKR Theory to the Case with a Large Contact Width 19**
 - 2.1 Introduction. 19
 - 2.2 Theoretical Model 19
 - 2.2.1 Extension of the JKR Theory 22
 - 2.2.2 Extension of the Hertz Theory. 24
 - 2.3 Conclusion 25
 - References 25
- 3 Peeling Behavior of a Bio-inspired Nanofilm with Finite Length on a Rigid Substrate. 27**
 - 3.1 Introduction. 27
 - 3.2 Numerical Model 28
 - 3.3 Numerical Results and Discussion 31
 - 3.3.1 Effect of Adhesion Length 31
 - 3.3.2 Effect of the Peeling Angle 33
 - 3.3.3 Effect of Surface Roughness 34
 - 3.3.4 Effects of Young’s Modulus and Thickness of Nanofilm. 35

3.3.5	Effect of Viscoelastic Behavior of the Film on the Peeling-Off Force.	37
3.4	Theoretical Analysis	38
3.4.1	Effect of Adhesion Length	38
3.4.2	Comparison with Kendall's Model	40
3.5	Conclusion	41
	References	41
4	Effect of Pretension on the Peeling Behavior of a Bio-inspired Nanofilm and a Hierarchical Adhesive Structure	45
4.1	Introduction.	45
4.2	Effect of Pretension on the Peeling Behavior of a Nanofilm	46
4.2.1	Effect of Uniform Pretension	46
4.2.2	Effect of Nonuniform Pretension	48
4.3	Effect of Pretension on the Adhesion of Hierarchical Structure	50
4.4	Conclusion	53
	References	54
5	Effects of Surface Roughness and Film Thickness on the Adhesion of a Bio-inspired Nanofilm	55
5.1	Introduction.	55
5.2	Theoretical Model of a Finite Nanofilm in Adhesive Contact with a Rough Surface	57
5.2.1	Effective Interfacial Energy	57
5.2.2	Effect of Nanofilm Thickness on Adhesion	60
5.3	Results and Discussion	63
5.4	Conclusion	68
	References	68
6	Effects of the Relative Humidity and Water Droplet on Adhesion of a Bio-inspired Nanofilm	71
6.1	Introduction.	71
6.2	Theoretical Model Considering Relative Humidity and Water Droplet	73
6.2.1	Effect of Relative Humidity.	73
6.2.2	Effect of Water Droplet	75
6.3	Results and Discussion	78
6.4	Conclusion	80
	References	80

- 7 Effect of Geometry on the Adhesive Behavior of Bio-inspired Fibrils 83**
 - 7.1 Introduction 83
 - 7.2 Adhesion of a Mushroom-Shaped Fibril and a Spatular One 84
 - 7.2.1 Numerical Analysis 84
 - 7.2.2 Theoretical Analysis 88
 - 7.3 The Adhesion Feature of a Multifibril Structure 91
 - 7.4 Conclusion 93
 - References 93

- 8 Conclusion and Future Work 95**
 - 8.1 Summary of the Work 95
 - 8.2 Outlook to the Future Research 96

Bio-inspired Studies on Adhesion of a Thin Film on a
Rigid Substrate

Peng, Z.

2015, XIII, 97 p. 46 illus., Hardcover

ISBN: 978-3-662-46954-5
