1	Introduction	1
1.1	Significance of the Research	1
1.2	Research Ideas and Content Structure	4
	References.	7
2	Literature Review	9
2.1	Supply Chain Management and Uncertainty	9
2.1.1	Supply Chain Management	9
2.1.2	Uncertainty in Supply Chain	12
2.2	Uncertainty Theory	14
2.2.1	Stochastic Theory	14
2.2.2	Fuzzy Set Theory	15
2.2.3	Fuzzy Random Theory	17
2.3	The Status Quo and Characteristics of Supply Chain Planning Research.	18
2.3.1	Research Review	18
2.3.2	Characteristics of Current Studies	25
2.4	Intelligent Algorithm	26
2.4.1	Neural Network Algorithm.	26
2.4.2	Genetic Algorithm	28
	References.	31
3	Demand Forecasting Dynamic Equation Model	37
3.1	Logistic and Gompertz Growth Curve	38
3.1.1	Logistic Growth Curve	38
3.1.2	Gompertz Growth Curve	39
3.2	Demand Forecasting Dynamic Equation Model.	41
3.2.1	Basic Assumptions	41
3.2.2	Establishing Dynamic Equation Model	41

3.2.3	Parameter Determination of Dynamic Equation Model	42
3.2.4	Determination of Forecasting Model	45
3.2.5	Forecasting Model Error Estimation and Hypothesis Testing	46
3.3	Numerical Example Analysis	47
3.3.1	Forecast History Data Selection	47
3.3.2	Model Parameter Estimation.	47
3.3.3	Calculation of Forecasting Trend Value.	49
3.3.4	Forecast Results Error Estimation and Hypothesis Testing	49
3.4	Combined Forecasting and Determining Weights Method	52
3.5	Summary	54
	References.	55
4	Optimization of Strategic Alliance Supply Chain Logistics	
	Planning Under Uncertain Environment	57
4.1	Stochastic Expected Value Programming	58
4.1.1	Expected Value Operator	58
4.1.2	Expected Value Model	59
4.1.3	Convexity of Expected Value Model and the Properties of Solutions	60
4.2	Problem Description and Modeling	63
4.2.1	Problem Description	63
4.2.2	Construction of the Expected Value Model	65
4.3	Hybrid Intelligent Algorithm Design	71
4.3.1	Pre-processing for Model Calculation	71
4.3.2	Stochastic Simulation	72
4.3.3	Hybrid Intelligence Algorithm Process.	73
4.3.4	Coding Scheme	74
4.3.5	Determining the Initial Population	77
4.3.6	Fitness Function of Chromosome	77
4.3.7	Selection Operation.	78
4.3.8	Crossover Operation	79
4.3.9	Mutation Operation.	79
4.4	Numerical Example Simulation and Sensitivity Analysis of Parameters	80
4.4.1	Simulation Parameters Design	80
4.4.2	Simulation Results Analysis	82
4.4.3	Sensitivity Analysis of Parameters.	88
4.4.4	Plan Adjustment Strategy.	93
4.5	Summary	98
	References.	98

5	Optimization of Decentralized Control Supply Chain Logistics Planning Under Uncertain Environment	101
5.1	Stochastic Chance-Constrained Programming	102
5.2	Problem Description and Modeling	104
5.2.1	Problem Description	104
5.2.2	Modeling	106
5.2.3	Stochastic Chance-Constrained Programming Model	111
5.3	Hybrid Intelligent Algorithm Design	112
5.3.1	Illustration of Model Calculations	112
5.3.2	Stochastic Simulation	113
5.3.3	Process of Hybrid Genetic Algorithm Based on Stochastic Simulation	114
5.3.4	Coding Scheme	115
5.3.5	Initialization Process	117
5.3.6	Fitness Function of Chromosomes	117
5.3.7	Selection Process	117
5.3.8	Crossover Operation	118
5.3.9	Mutation Operation	119
5.3.10	Termination Condition	119
5.4	Numerical Example Simulation and Sensitivity Analysis of Parameters	120
5.4.1	Design of Simulation Parameters	120
5.4.2	Simulation Results Analysis	124
5.4.3	Sensitivity Analysis of Parameters	132
5.5	Summary	146
	References	147
6	Optimization of Mixed Control Supply Chain Logistics Planning Under Uncertain Environment	149
6.1	Fuzzy Stochastic Programming	150
6.1.1	Fuzzy Random Expected Value of Variables	150
6.1.2	The Model of Fuzzy Random Expected Value	151
6.2	Problem Description and Modeling	151
6.2.1	Problem Description	151
6.2.2	Building the Model of Fuzzy Random Expected Value	153
6.3	Hybrid Intelligent Algorithm Design	159
6.3.1	Algorithm Designing Method	159
6.3.2	Fuzzy Simulation	159
6.3.3	Fuzzy Stochastic Simulation	160
6.3.4	Approaching the Uncertain Function Using Neural Network Algorithm	161
6.3.5	Steps for Hybrid Intelligent Algorithm	161

6.3.6	Coding Scheme	162
6.3.7	Determining the Initial Population.	164
6.3.8	Fitness Function of the Chromosome.	165
6.3.9	Selection Process	165
6.3.10	Crossover Operation	165
6.3.11	Mutation Operation	166
6.3.12	Termination Condition.	166
6.4	Numerical Example Simulation and Sensitivity Analysis of Parameters	167
6.4.1	Design of Simulation Parameters	167
6.4.2	Simulation Results Analysis	169
6.4.3	Sensitivity Analysis of Parameters.	179
6.5	Summary	183
	References.	183
7	Conclusion and Future Work	185

Optimization of Integrated Supply Chain Planning under
Multiple Uncertainty

Shao, J.; Sun, Y.; Noche, B.

2015, XVII, 188 p. 47 illus., Hardcover

ISBN: 978-3-662-47249-1
