## Part I Scalar-Valued ZF in Real Domain

<b>1</b>	<b>Time-Varying Reciprocal</b>	<b>3</b>
1.1	Introduction and Preliminaries	3
1.2	ZFs and ZD Models	5
1.3	Theoretical Results and Analyses	8
1.4	Simulink Modeling	10
1.5	Illustrative Examples	11
1.6	Summary	15
	References	16
<b>2</b>	<b>Time-Varying Inverse Square Root</b>	<b>17</b>
2.1	Introduction	17
2.2	ZFs and ZD Models	18
2.2.1	The First ZF and ZD Model	18
2.2.2	The Second ZF and ZD Model	19
2.2.3	The Third ZF and ZD Model	20
2.2.4	The Fourth ZF and ZD Model	20
2.2.5	The Fifth ZF and ZD Model	21
2.2.6	The Sixth ZF and ZD Model	21
2.3	Theoretical Results and Analyses	22
2.4	Simulink Modeling	24
2.5	Illustrative Examples	27
2.6	Summary	30
	References	30
<b>3</b>	<b>Time-Varying Square Root</b>	<b>33</b>
3.1	Introduction	33
3.2	ZFs and ZD Models	34
3.3	Simulink Modeling	38

3.4	Illustrative Examples . . . . .	39
3.5	Summary . . . . .	44
	References. . . . .	45

## Part II Vector-Valued ZF in Real Domain

<b>4</b>	<b>System of Time-Varying Linear Equations . . . . .</b>	<b>49</b>
4.1	Introduction . . . . .	49
4.2	ZFs and ZD Models . . . . .	50
4.2.1	The First ZF and ZD Model . . . . .	51
4.2.2	The Second ZF and ZD Model . . . . .	51
4.3	Theoretical Results and Analyses . . . . .	53
4.4	Illustrative Examples . . . . .	55
4.5	Summary . . . . .	59
	References. . . . .	59
<b>5</b>	<b>Over-Determined and Under-Determined Systems of Time-Varying Linear Equations . . . . .</b>	<b>61</b>
5.1	Introduction . . . . .	61
5.2	ZFs and ZD Models . . . . .	62
5.2.1	With $m > n$ (Over-Determined System) . . . . .	62
5.2.2	With $m < n$ (Under-Determined System) . . . . .	63
5.3	Illustrative Examples . . . . .	66
5.4	Summary . . . . .	72
	References. . . . .	73
<b>6</b>	<b>Time-Varying Linear Matrix-Vector Inequality . . . . .</b>	<b>75</b>
6.1	Introduction . . . . .	75
6.2	ZFs and ZD Models . . . . .	76
6.2.1	The First ZF and ZD Model . . . . .	76
6.2.2	The Second ZF and ZD Model . . . . .	77
6.2.3	The Third ZF and ZD Model . . . . .	78
6.3	Illustrative Examples . . . . .	82
6.4	Summary . . . . .	87
	References. . . . .	87

## Part III Matrix-Valued ZF in Real Domain

<b>7</b>	<b>Time-Varying Matrix Inverse . . . . .</b>	<b>91</b>
7.1	Introduction . . . . .	91
7.2	ZFs and ZD Models . . . . .	92
7.3	Theoretical Results and Analyses . . . . .	95

7.4	Simulink Modeling . . . . .	97
7.5	Illustrative Examples . . . . .	100
7.6	Summary . . . . .	103
	References. . . . .	103
<b>8</b>	<b>Time-Varying Matrix Left Pseudoinverse. . . . .</b>	<b>105</b>
8.1	Introduction . . . . .	105
8.2	ZFs and ZD Models . . . . .	107
8.2.1	The First ZF and ZD Model . . . . .	107
8.2.2	The Second ZF and ZD Model . . . . .	109
8.2.3	The Third ZF and ZD Model . . . . .	109
8.2.4	The Fourth ZF and ZD Model . . . . .	110
8.2.5	The Fifth ZF and ZD Model. . . . .	111
8.3	Illustrative Examples . . . . .	112
8.4	Summary . . . . .	118
	References. . . . .	118
<b>9</b>	<b>Time-Varying Matrix Right Pseudoinverse. . . . .</b>	<b>121</b>
9.1	Introduction . . . . .	121
9.2	ZFs and ZD Models . . . . .	122
9.3	Theoretical Results . . . . .	124
9.4	Illustrative Examples . . . . .	125
9.5	Summary . . . . .	127
	References. . . . .	127
<b>10</b>	<b>Time-Varying Matrix Square Root . . . . .</b>	<b>129</b>
10.1	Introduction . . . . .	129
10.2	ZFs and ZD Models . . . . .	130
10.3	Theoretical Results and Analyses . . . . .	137
10.4	MATLAB Simulink Modeling . . . . .	139
10.4.1	Simulink Blocks . . . . .	139
10.4.2	Parameter Settings. . . . .	140
10.5	Illustrative Examples . . . . .	142
10.6	Summary . . . . .	147
	References. . . . .	147
 <b>Part IV ZF in Complex Domain</b>		
<b>11</b>	<b>Time-Varying Complex Reciprocal . . . . .</b>	<b>151</b>
11.1	Introduction . . . . .	151
11.2	Complex ZFs and ZD Models . . . . .	152

11.3	Illustrative Examples . . . . .	156
11.4	Summary . . . . .	160
	References. . . . .	160
<b>12</b>	<b>Time-Varying Complex Matrix Inverse . . . . .</b>	<b>163</b>
12.1	Introduction . . . . .	163
12.2	Complex ZFs and ZD Models . . . . .	164
12.3	Illustrative Examples . . . . .	166
12.4	Summary . . . . .	171
	References. . . . .	171
<b>13</b>	<b>Time-Varying Complex Matrix Generalized Inverse . . . . .</b>	<b>173</b>
13.1	Introduction . . . . .	173
13.2	Complex ZFs and ZD Models . . . . .	175
13.2.1	The First Complex ZD Model. . . . .	176
13.2.2	The Second Complex ZD Model. . . . .	179
13.2.3	The Third Complex ZD Model. . . . .	180
13.2.4	The Fourth Complex ZD Model . . . . .	181
13.2.5	The Fifth Complex ZD Model . . . . .	182
13.3	Illustrative Examples . . . . .	184
13.4	Summary . . . . .	191
	References. . . . .	191

**Part V ZF Application to Robot Control**

<b>14</b>	<b>Application to Fixed-Base Robot RMP. . . . .</b>	<b>195</b>
14.1	Introduction . . . . .	195
14.2	RMP Performance Index Derived via Different ZFs. . . . .	197
14.3	Scheme and QP Formulations. . . . .	198
14.3.1	Acceleration-Level RMP Scheme . . . . .	199
14.3.2	Bound Constraint Transformation Technique . . . . .	199
14.3.3	QP Reformulation . . . . .	200
14.3.4	QP Solver . . . . .	200
14.4	Illustrative Examples . . . . .	201
14.4.1	Pentagram-Path Tracking . . . . .	202
14.4.2	East-Asian Character Writing . . . . .	207
14.4.3	“V” Path Path Tracking . . . . .	209
14.4.4	Comparisons with Velocity-Level RMP Scheme . . . . .	210
14.5	Summary . . . . .	212
	References. . . . .	212

<b>15</b>	<b>Application to Mobile Robot RMP. . . . .</b>	<b>215</b>
15.1	Introduction . . . . .	215
15.2	RMP Performance Index Derived via Different ZFs. . . . .	217
15.2.1	Kinematics Modeling of Mobile Robot Manipulators. . . . .	217
15.2.2	Velocity-Level RMP Performance Index . . . . .	218
15.3	Scheme and QP Formulations. . . . .	220
15.3.1	Velocity-Level RMP Scheme . . . . .	220
15.3.2	QP Reformulation . . . . .	222
15.3.3	QP Solver . . . . .	223
15.4	Illustrative Examples . . . . .	224
15.4.1	Circular Path Tracking. . . . .	224
15.4.2	Lissajous-Figure Path Tracking. . . . .	230
15.5	Summary . . . . .	234
	References. . . . .	235
