

Contents

1	Skin Structure and Physiology	1
	Introduction	1
	The Hypodermis (Subcutaneous Fatty Tissue Layer)	1
	The Dermis	2
	Skin Appendages	3
	The Subcutaneous Sensory Mechanism	4
	The Epidermis	5
	The <i>Stratum Germinativum</i>	5
	The <i>Stratum Spinosum</i>	6
	The <i>Stratum Granulosum</i>	7
	The <i>Stratum Lucidum</i>	7
	The <i>Stratum Corneum</i>	7
	The <i>Stratum Corneum</i> Barrier	8
	Routes of Permeation of Exogenous Chemicals Across	
	the <i>Stratum Corneum</i>	10
	Percutaneous Permeation—Mechanisms of Absorption	10
	Theoretical Considerations	12
	Physicochemical Properties of the Penetrant	14
	Partition Coefficient	14
	Molecular Size and Shape	15
	Applied Concentration/Dose	15
	Aqueous Solubility and Melting Point	16
	Ionisation	16
	Physiological Factors Affecting Percutaneous Absorption	17
	Skin Condition	17
	Skin Hydration and Occlusion	17
	Skin Age	18
	Site-to-Site Variation	19

	Race.	19
	Skin Temperature.	19
	Vehicle Effects	20
	References.	21
2	Methods for the Measurement of Percutaneous Absorption	25
	Introduction.	25
	In Vivo and In Vitro Methods: Overview	26
	In Vitro Experimental Methods	27
	Preamble.	27
	Membrane Selection	27
	Integrity Testing.	31
	Selection of the Diffusion Cell Apparatus	32
	Temperature	36
	Formulation and Solubility Factors	36
	Detection of the Permeant	37
	Conclusions.	38
	References.	39
3	Mathematical Treatments and Early Models	
	of Skin Permeability	43
	Introduction.	43
	Infinite and Finite Dosing	48
	References.	61
4	The New Breadth of Research in the Field.	65
	References.	87
5	Algorithms for Estimating Permeability Across Artificial	
	Membranes	91
	The Role of Artificial Membranes in Studies of Percutaneous	
	Absorption	91
	Quantitative Models for Permeability Across	
	Polydimethylsiloxane Membranes.	94
	References.	100
6	Other Approaches to Modelling Percutaneous Absorption	103
	References.	114

7	Squiggly Lines and Random Dots—You Can Fit Anything with a Nonlinear Model	117
	Introduction	117
	Application of a Nonlinear Multiple Regression Model to Skin Permeability	118
	Fuzzy Logic and Neural Network Methods for the Prediction of Skin Permeability	121
	More Machine Learning Methods—Classification and Gaussian Process Models	126
	References	136
8	Finite-Dose Models of Transient Exposures and Volatile Formulation Components	141
	Introduction	141
	Modelling Finite-Dose Experiments	144
	Models of Formulation in Finite-Dose Experiments	150
	Conclusions	156
	References	156
9	The Devil is in the Detail	159
	Introduction	159
	Experimental Factors in Model Quality	159
	Analysis of the Experiments from Which Data Have Been Taken to Develop Models of Skin Absorption	167
	Formulation Factors	173
	Conclusions	175
	References	176
10	Conclusions and Recommendations for Model Development and Use	181
	Overview of the Previous Chapters	181
	“Pitfalls” of Model Development and Use	182
	Quality of the Source, or Input, Data	184
	Outliers	185
	Biological Data	185
	Descriptor Selection and Interpretation, and Data Set Design	186
	Statistical Analysis of Data	187
	Data—and Data Set—Quality	188
	Conclusions	190
	References	191
	Index	193

Predictive Methods in Percutaneous Absorption

Moss, G.; Gullick, D.; Wilkinson, S.

2015, XV, 199 p. 16 illus., 8 illus. in color., Hardcover

ISBN: 978-3-662-47370-2
