

Preface

It was a pleasure and an honor to have organized the 10th Conference on Image and Graphics Technologies and Applications. The conference was held during June 19–20, 2015, in Beijing, China. The conference series is the premier forum for presenting research in image processing and graphics and related topics. The conference provides a rich forum for sharing the latest advances in the areas of image processing technology, image analysis and understanding, computer vision and pattern recognition, big data mining, computer graphics and VR, image technology application, with the generation of new ideas, new approaches, new techniques, new applications, and new evaluation. The conference is organized under the auspices of the Beijing Society of Image and Graphics, in Tsinghua University, Beijing, China.

The conference program included keynotes, oral presentations, posters, demos, and exhibitions. We received 138 papers for review. Each of these was assessed by no fewer than two reviewers, with some papers being assessed by three reviewers; 50 submissions were selected for oral and poster presentation.

We are grateful for the efforts of the people who helped make this conference a reality. We would like to thank the reviewers for completing the reviewing process in time. The local host, Tsinghua University, handled many of the local arrangements for the conference.

The conference continues to provide a leading forum for cutting-edge research and case studies in image and graphics technology. We hope you enjoy reading the proceedings.
