

Contents

Static Analysis of Non-interference in Expressive Low-Level Languages	1
<i>Peter Aldous and Matthew Might</i>	
Static Analysis with Set-Closure in Secrecy	18
<i>Woosuk Lee, Hyunsook Hong, Kwangkeun Yi, and Jung Hee Cheon</i>	
A Binary Decision Tree Abstract Domain Functor.	36
<i>Junjie Chen and Patrick Cousot</i>	
Precise Data Flow Analysis in the Presence of Correlated Method Calls	54
<i>Marianna Rapoport, Ondřej Lhoták, and Frank Tip</i>	
May-Happen-in-Parallel Analysis for Asynchronous Programs with Inter-Procedural Synchronization	72
<i>Elvira Albert, Samir Genaim, and Pablo Gordillo</i>	
Shape Analysis for Unstructured Sharing	90
<i>Huisong Li, Xavier Rival, and Bor-Yuh Evan Chang</i>	
Synthesizing Heap Manipulations via Integer Linear Programming	109
<i>Anshul Garg and Subhajit Roy</i>	
Explaining the Effectiveness of Small Refinement Heuristics in Program Verification with CEGAR	128
<i>Tachio Terauchi</i>	
Safety Verification and Refutation by k -Invariants and k -Induction	145
<i>Martin Brain, Saurabh Joshi, Daniel Kroening, and Peter Schrammel</i>	
Effective Soundness-Guided Reflection Analysis.	162
<i>Yue Li, Tian Tan, and Jingling Xue</i>	
SJS: A Type System for JavaScript with Fixed Object Layout	181
<i>Wontae Choi, Satish Chandra, George Necula, and Koushik Sen</i>	
Refinement Type Inference via Horn Constraint Optimization.	199
<i>Kodai Hashimoto and Hiroshi Unno</i>	
A Simple Abstraction of Arrays and Maps by Program Translation	217
<i>David Monniaux and Francesco Alberti</i>	

Property-based Polynomial Invariant Generation Using Sums-of-Squares Optimization.	235
<i>Assalé Adjé, Pierre-Loïc Garoche, and Victor Magron</i>	
Modularity in Lattices: A Case Study on the Correspondence Between Top-Down and Bottom-Up Analysis	252
<i>Ghila Castelnuovo, Mayur Naik, Noam Rinetzky, Mooly Sagiv, and Hongseok Yang</i>	
Parallel Cost Analysis of Distributed Systems.	275
<i>Elvira Albert, Jesús Correas, Einar Broch Johnsen, and Guillermo Román-Díez</i>	
A Forward Analysis for Recurrent Sets	293
<i>Alexey Bakhirkin, Josh Berdine, and Nir Piterman</i>	
Unbounded-Time Analysis of Guarded LTI Systems with Inputs by Abstract Acceleration	312
<i>Dario Cattaruzza, Alessandro Abate, Peter Schrammel, and Daniel Kroening</i>	
Author Index	333

Static Analysis

22nd International Symposium, SAS 2015, Saint-Malo,
France, September 9-11, 2015, Proceedings

Blazy, S.; Jensen, Th. (Eds.)

2015, XVI, 333 p. 90 illus., Softcover

ISBN: 978-3-662-48287-2
