

Contents

1	Introduction	1
1.1	Some Motivating Applications	1
1.2	Weighted Correlation and Applications	2
1.3	Organization of the Book	6
2	The Weighted Rank Correlation Coefficient r_W	9
2.1	Introduction	9
2.2	Rank Correlation	10
2.3	Weighted Rank Measure of Correlation	11
2.4	Properties of the Distribution of r_W Under the Null Hypothesis of Independence	13
2.4.1	Linear Rank Statistics	13
2.4.2	Exact and Asymptotic Distribution of r_W Under the Null Hypothesis of Independence	14
2.4.3	Simulations	15
2.4.4	Comparison Between r_W and r_S	17
2.5	The Asymptotic Distribution of r_W for the General Case	20
2.5.1	$\sum_{i=1}^3 A_{in}$ is Asymptotically Normal Distributed	22
2.5.2	B_{1n}^* is Asymptotically Negligible	24
2.5.3	r_W is Asymptotically Normal Distributed	24
2.6	Examples of Application of r_W	24
2.7	Conclusions About r_W	27
3	The Weighted Rank Correlation Coefficient r_{W2}	29
3.1	Introduction	29
3.2	The Formula of the Coefficient r_{W2} in the Case of Ties	33
3.3	Comparison Between the Three Coefficients r_{W2} , r_W and r_S	36
3.4	A New Way of Developing Weighted Correlation Coefficients	38

4 A Weighted Principal Component Analysis, WPCA1;	
Application to Gene Expression Data	39
4.1 Introduction.	39
4.2 A New Weighted Version of PCA	41
4.3 Preliminary Version of Weighted Principal Component Analysis	
Using r_W	42
4.4 Weighted Principal Component Analysis, WPCA1,	
Using r_{W2}	44
4.4.1 Robustness to Outliers and Noise.	46
4.5 A New Method for Selecting Relevant Genes	
in Microarray Data.	48
4.5.1 Support Vector Machines Classification: Results	
for Genes Chosen with SAM, PDeig, and with	
Our Method for WPCA and PCA	50
4.5.2 Analysis of the Chosen Genes.	51
4.6 Conclusions.	52
5 A Weighted Principal Component Analysis (WPCA2) for Time	
Series Data	55
5.1 Introduction.	55
5.2 Motivation and Definition	56
5.3 Weight Functions: Examples	59
5.4 Applications	60
5.5 Final Remarks	67
6 Weighted Clustering of Time Series	69
6.1 Introduction.	69
6.2 Applications	72
Appendix	75
References	87

New Results in Weighted Correlation and Weighted
Principal Component Analysis with Applications

Pinto da Costa, J.

2015, X, 91 p. 12 illus., 4 illus. in color., Softcover

ISBN: 978-3-662-48343-5
