

Contents

1	Introduction	1
1.1	Study of Quantum Electrodynamics.	1
1.2	Positronium	1
1.3	The Positronium Hyperfine Structure.	4
1.4	Theory Underlying the Direct Measurement of Ps-HFS	5
1.5	Millimeter Wave Technology and Our Requirements.	9
1.6	Previous Methods Used to Measure the Ps-HFS and the Observed Discrepancies	11
1.6.1	Indirect Precision Measurements of the Ps-HFS	11
1.6.2	Theoretical Predictions	13
1.6.3	Discrepancies Between the Experiments and Theory	14
	References.	15
2	Experimental	17
2.1	Experimental Overview	17
2.2	Millimeter Wave Optics System	17
2.2.1	Gyrottron Oscillator	17
2.2.2	Fabry-Pérot Resonant Cavity	27
2.2.3	Estimation of the Accumulated Power	37
2.2.4	Power Stabilization	44
2.3	Positronium Assembly and γ -Ray Detectors	46
2.3.1	Positronium Formation Assembly	46
2.3.2	Selection of the Gas Used	48
2.3.3	γ -Ray Detectors	53
2.4	Electronic and Data Acquisition	54
2.4.1	Overview	54
2.4.2	Electronics of the Plastic Scintillator	56
2.4.3	Electronics of the γ -Ray Detectors	56
2.4.4	Electronics of the Trigger System	60
	References.	60

3	Analysis	63
3.1	Acquired Data	63
3.2	Calibration and Offline Trigger	64
3.2.1	Energy Calibration and Correction of the Plastic Scintillator	64
3.2.2	Energy Calibration of the LaBr ₃ (Ce) Scintillator	65
3.2.3	Time Calibration	66
3.2.4	Time-Walk Correction of the LaBr ₃ (Ce) Scintillator	66
3.2.5	Time-Walk Correction for the Plastic Scintillator	67
3.2.6	Offline Trigger Cuts	68
3.3	Event Selection	69
3.3.1	Time Window	70
3.3.2	Accidental Rejection	70
3.3.3	γ -ray Energy Cut	71
3.3.4	Direct Transition Signal and Background Estimation	72
3.4	Analysis of the Ps-HFS	74
3.4.1	Preparation of the MC Samples	74
3.4.2	Correction of the Space Fluctuations	75
3.4.3	Correction of the Time Fluctuation	75
3.4.4	Calculation of the Reaction Cross-Section	76
3.5	Systematic Errors	79
3.5.1	Power Estimation Uncertainty	79
3.5.2	Gas Effect	79
3.5.3	Monte Carlo Simulations	82
3.5.4	Other Systematic Uncertainties	83
3.5.5	Summary of the Systematic Errors	83
3.6	Results	84
	References	85
4	Discussion	87
4.1	Consistency Check of the Power Estimation	87
4.2	Cut Validation	88
4.2.1	Time Window	89
4.2.2	Accidental Rejection	89
4.2.3	Energy Cut	89
4.3	Future Prospects	90
4.3.1	Power Estimation with a 100 kW-Class Gyrotron	90
4.3.2	Ps Formation in a Vacuum	91
4.3.3	Frequency Tunable Gyrotron	92
	References	93
5	Conclusion	95

Appendix A: Gyrotron Theory	97
Appendix B: Theory of Positron Acceleration	111
Appendix C: Data Summary	115
Appendix D: Small Systematic Uncertainties	117
Curriculum Vitae	119

Direct Measurement of the Hyperfine Structure Interval
of Positronium Using High-Power Millimeter Wave
Technology

Miyazaki, A.

2015, XIII, 122 p. 79 illus., 53 illus. in color., Hardcover

ISBN: 978-4-431-55605-3
