

Contents

1	Introduction	1
1.1	Basic Informations on B20-type Compounds	1
1.2	Helical and Skyrmion Spin Structure	5
1.2.1	Overview	5
1.2.2	Helical Structure	5
1.2.3	Skyrmion	9
1.2.4	Other Nontrivial Spin Structures	16
1.3	Band Structure	17
1.3.1	Magnetic Ordering and Band Structure	18
1.3.2	Remark on Dirac Electrons in CoSi	19
	References	20
2	Experimental Methods	23
2.1	Bulk Crystal Growth	23
2.1.1	Polycrystal Samples	23
2.1.2	FeGe Single Crystal	23
2.2	Thin-Film Growth	25
2.3	Magnetization and Electrical Transport Measurement	26
2.4	Neutron Scattering	26
2.5	Thermal Transport Measurement	26
	References	27
3	Magnetic and Transport Properties in B20-type Germanides	29
3.1	Introduction	29
3.1.1	Berry Phase and Emergent Electromagnetic Field	29
3.1.2	Correction of Semi-classical Transport Equations—Berry Phase in the Momentum Space	31
3.1.3	Anomalous Hall Effect in B20-type Silicides	33
3.2	Magnetization Properties	34

3.3	Transport Properties	38
3.4	Summary	43
	References	44
4	3D Skyrmion-Lattice and Topological Hall Effect in MnGe	45
4.1	Introduction.	45
4.1.1	Topological Hall Effect	45
4.2	Topological Hall Effect in MnGe.	48
4.3	Small-Angle Neutron Scattering on MnGe—Possible 3D Skyrmion Lattice	52
4.3.1	Small-Angle Neutron Scattering on MnGe	52
4.3.2	Fitting of Topological Hall Resistivity	57
4.4	Summary	59
	References	60
5	Skyrmion Formation in Epitaxial FeGe Thin Films	61
5.1	Introduction.	61
5.2	Fabrication of FeGe Thin Films.	63
5.3	Topological Hall Effect and Skyrmion Formation in FeGe Nanodevices	64
5.4	Summary	72
	References	72
6	3D Dirac Electrons and Large Thermoelectric Properties in CoGe.	75
6.1	Introduction.	75
6.1.1	Thermoelectric Figure of Merit	75
6.1.2	Boltzmann Transport Theory in Metals.	75
6.1.3	Thermoelectric Properties of CoSi	78
6.2	Thermoelectric Properties of CoGe.	78
6.2.1	Calculations of Band Structure and Thermopower	78
6.2.2	Filling Dependence of Thermoelectric Properties in CoGe	81
6.3	Summary	84
	References	84
7	Conclusion.	85
	Curriculum Vitae	87

Charge and Heat Transport Phenomena in Electronic
and Spin Structures in B20-type Compounds

Kanazawa, N.

2015, XII, 89 p. 60 illus., 52 illus. in color., Hardcover

ISBN: 978-4-431-55659-6
