
Contents

1 Bioremediation Technology: A Greener and Sustainable Approach for Restoration of Environmental Pollution	1
Shaili Srivastava	
2 Bioremediation of Industrial Effluents: Distillery Effluent	19
Garima Kaushik	
3 In Silico Approach to Study the Regulatory Mechanisms and Pathways of Microorganisms	33
Arun Vairagi	
4 Microbial Diversity: Its Exploration and Need of Conservation.	43
Monika Mishra	
5 Phytoremediation: A Biotechnological Intervention.....	59
Dharmendra Singh, Pritesh Vyas, Shweta Sahni and Punesh Sangwan	
6 Ameliorative Approaches for Management of Chromium Phytotoxicity: Current Promises and Future Directions...	77
Punesh Sangwan, Prabhjot Kaur Gill, Dharmendra Singh and Vinod Kumar	
7 Management of Environmental Phosphorus Pollution Using Phytases: Current Challenges and Future Prospects	97
Vinod Kumar, Dharmendra Singh, Punesh Sangwan and Prabhjot Kaur Gill	
8 Sustainable Production of Biofuels from Microalgae Using a Biorefinary Approach.....	115
Bhaskar Singh, Abhishek Guldhe, Poonam Singh, Anupama Singh, Ismail Rawat and Faizal Bux	

- 9 Oil Spill Cleanup: Role of Environmental Biotechnology..... 129**
Sangeeta Chatterjee
- 10 Bioelectrochemical Systems (BES) for Microbial
Electroremediation: An Advanced Wastewater
Treatment Technology 145**
Gunda Mohanakrishna, Sandipam Srikanth and Deepak Pant

**Applied Environmental Biotechnology: Present Scenario
and Future Trends**

Kaushik, G. (Ed.)

2015, XVI, 167 p. 29 illus., 17 illus. in color., Hardcover

ISBN: 978-81-322-2122-7
