

Contents

1	Introduction	1
1.1	Background	1
1.2	Contributions of the Monograph	4
1.2.1	Multirate Output Feedback-Based Frequency Shaped Sliding Mode Control: A Switching Type Control Law	4
1.2.2	Multirate Output Feedback Based Frequency Shaped Sliding Mode Control: A Nonswitching Type Control Law	4
1.2.3	Reduced Order Observer Design Using Duality to Sliding Surface Design for Sliding Mode Control	5
	References	5
2	Preliminaries of Sliding Mode Control	9
2.1	Variable Structure Control	9
2.2	Continuous-Time Sliding Mode Control	11
2.2.1	Reaching Law Approach	14
2.2.2	Fillipov's Condition	14
2.2.3	Limitations of Continuous-Time Sliding Mode Control	15
2.3	Discrete-Time Sliding Mode Control	16
2.3.1	State-Based Discrete-Time Sliding Mode Control	17
2.3.2	Output Feedback-Based Discrete-Time Sliding Mode Control	20
2.3.3	Multirate Output Feedback Based Sliding Mode Control	21
2.4	Conclusion	24
	References	24

3	Multirate Output Feedback Frequency Shaped SMC:	
	A Switching Type Control Law	27
3.1	Brief Review of Discrete-Time Sliding Mode Control Using LQ Approach	27
3.2	State Estimation for LTI System with Uncertainty Using Multirate Output Measurement	28
3.3	Multirate Output Feedback-Based Frequency-Shaped Sliding Mode Control	30
3.4	The Controller Design Using Switching Type Control Law	33
3.4.1	Brief Review of Switching Type Control Law	33
3.4.2	The FSSMC Design Using Switching Type Reaching Law	34
3.5	State Space Model of the Smart Structure	36
3.6	Controller Design Procedure	39
3.7	Controller Implementation	41
3.8	Simulation and Experimental Results	42
3.9	Conclusion	45
	References	45
4	Multirate Output Feedback Frequency-Shaped SMC:	
	A Nonswitching Type Control Law	47
4.1	Introduction	47
4.2	The Controller Design Using Nonswitching Type Control Law	48
4.2.1	Brief Review of Nonswitching Type Control Law	48
4.2.2	The FSSMC Design Using Nonswitching Type Control Law	49
4.3	Controller Design Procedure	50
4.4	Controller Implementation	51
4.5	Simulation and Experimental Results	52
4.6	Comparison of Switching and Nonswitching Type Multirate Output Feedback FSSMC Performance	53
4.7	Conclusion	55
	References	55
5	Reduced Order Observer Design Using Duality for Sliding Surface Design	57
5.1	Introduction	57
5.2	Brief Review of Discrete-Time Reduced Order Observer	58
5.3	Duality to Discrete-Time Sliding Surface Design	59

5.4	Design of Discrete-Time Reduced Order State Observer	61
5.5	Design of Power System Stabilizer of SMIB Using Proposed Duality	64
5.5.1	Power System Modeling.	64
5.5.2	Power System Stabilizer	70
5.5.3	PSS Design for SMIB System.	72
5.6	Reduced Order Observer Design Using Duality for the Industrial Emulator Servo System	80
5.6.1	System Description	80
5.6.2	Rigid Body Plant Model.	81
5.6.3	Controller Data Board and Firmware	83
5.6.4	Simulation and Experimental Results with Switching Type Control Law	84
5.6.5	Simulation and Experimental Results with Nonswitching Type Control Law	86
5.7	Conclusion	89
	References	89
