

# Contents

<b>1</b>	<b>Introduction to Offshore Platforms</b>	<b>1</b>
1.1	Introduction	1
1.2	Types of Offshore Platforms	2
1.2.1	Bottom-supported Structures	3
1.2.2	Compliant Structures	7
1.2.3	Floating Platform	13
1.3	New-generation Offshore Platforms	15
1.3.1	Buoyant Leg Structure (BLS)	16
1.3.2	Triceratops	17
1.3.3	Floating, Storage and Regasification Units (FSRUs)	19
<b>2</b>	<b>Environmental Forces</b>	<b>25</b>
2.1	Introduction	25
2.2	Wind Force	26
2.3	Wave Forces	30
2.4	Wave Theories	31
2.5	Current Forces	38
2.6	Earthquake Loads	38
2.7	Ice and Snow Loads	39
2.8	Marine Growth	41
2.9	Mass	41
2.10	Damping	42
2.11	Dead Load	42
2.12	Live Load	42
2.13	Impact Load	43
2.14	General Design Requirements	43
2.15	Steel Structures	44
2.16	Allowable Stress Method	45
2.17	Limit State Method	45
2.18	Fabrication and Installation Loads	48

2.19	Lifting Force . . . . .	49
2.20	Load-Out Force . . . . .	50
2.21	Transportation Forces . . . . .	50
2.22	Launching and Upending Force . . . . .	53
2.23	Accidental Load . . . . .	54
<b>3</b>	<b>Introduction to Structural Dynamics . . . . .</b>	<b>63</b>
3.1	Introduction . . . . .	63
3.2	Fundamentals of Structural Dynamics . . . . .	64
3.3	Mathematical Model of Structural System . . . . .	65
3.4	Single-Degree-of-Freedom Model . . . . .	66
3.5	Equation of Motion . . . . .	66
3.5.1	Simple Harmonic Motion Method (SHM Method). . .	67
3.5.2	Newton's Law . . . . .	67
3.5.3	Energy Method. . . . .	68
3.5.4	Rayleigh's Method . . . . .	68
3.5.5	D'Alembert's Principle . . . . .	69
3.6	Un-damped Free Vibration . . . . .	69
3.7	Damped Free Vibration . . . . .	70
3.7.1	Viscous Damping . . . . .	71
3.7.2	Coulomb Damping . . . . .	72
3.7.3	Under-damped Systems . . . . .	74
3.7.4	Critically Damped Systems . . . . .	75
3.7.5	Over-damped Systems . . . . .	76
3.7.6	Half Power Method. . . . .	77
3.8	Forced Vibration. . . . .	78
3.8.1	Un-damped Forced Vibration . . . . .	79
3.8.2	Damped Forced Vibration . . . . .	80
3.9	Steady-State Response . . . . .	82
3.10	Two-Degrees-of-Freedom Model. . . . .	83
3.11	Un-damped Free Vibrations and Principal Modes of Vibration. . . . .	84
3.12	Multi-degrees-of-Freedom . . . . .	89
3.13	Equation of Motion for Multi-degrees-of-Freedom System . .	89
3.14	Influence Coefficients . . . . .	91
3.15	Eigenvalue Problem. . . . .	93
3.16	Dynamic Matrix Method . . . . .	94
3.17	Dunkerley's Method . . . . .	95
3.18	Matrix Iteration Method. . . . .	95
3.19	Stodola's Method . . . . .	96
3.20	Mode Superposition Method. . . . .	97
3.21	Mode Truncation . . . . .	98
3.21.1	Static Correction for Higher Mode Response . . . . .	98
3.22	Rayleigh–Ritz Method—Analytical Approach. . . . .	99

<b>4</b>	<b>Damping in Offshore Structures</b>	155
4.1	Introduction	155
4.2	Damping Models: Rayleigh Damping	157
4.2.1	Example Problem	160
4.3	Caughey Damping	161
4.3.1	Critical Problems Associated with Caughey Damping	164
4.3.2	Example Problem	164
4.4	Classical Damping Matrix by Damping Matrix Superpositioning	166
4.4.1	Critical Issues	167
4.4.2	Example Problem	167
4.5	Evaluation of Damping from Experimental Results	169
<b>5</b>	<b>Hydrodynamic Response of Perforated Offshore Members</b>	173
5.1	Fluid–Structure Interaction	173
5.2	Vertical Cylinders in Uniform Flow	174
5.3	Flow in Deep Waters	174
5.4	Horizontal Cylinder in Uniform Flow	176
5.5	Horizontal Cylinder in Shear Flow	176
5.6	Blockage Factor	176
5.7	Wave–Structure Interaction (WSI)	177
5.8	Perforated Cylinders	177
5.8.1	Wave Forces on Perforated Members	177
5.8.2	Wave Forces on Offshore Structures with Perforated Members	179
5.8.3	Critical Review	180
5.9	Experimental Investigations on Perforated Cylinders	181
5.10	Experimental Investigations on Perforated TLP Model	185
5.11	Numerical Studies on Perforated Cylinders	189
5.11.1	Development of the Numerical Models	189
<b>6</b>	<b>Introduction to Stochastic Dynamics</b>	203
6.1	Introduction	203
6.1.1	Mean Value of the Response Process	205
6.2	Auto-Covariance of the Response Process	207
6.3	Response Spectrum	208
6.4	Stochastic Process	210
6.4.1	Example of Stochastic Modeling	210
6.4.2	Example of a Stochastic Process	211
6.5	Return Period	212
6.6	Safety and Reliability	213
6.7	Reliability Framework	213

6.8	Ultimate Limit State and Reliability Approach . . . . .	215
6.9	Short-term Reliability of Single Load Effect . . . . .	216
6.9.1	Up-Crossing Approach . . . . .	216
6.10	Long-term Reliability of Single Load Effect . . . . .	218
6.11	Levels of Reliability . . . . .	219
6.12	Reliability Methods . . . . .	220
6.12.1	Advantages of Reliability Methods (ASC-83) . . . . .	220
6.13	Stochastic Models . . . . .	221
6.13.1	First-Order Second-Moment Method (FOSM) . . . . .	221
6.13.2	Advanced FOSM . . . . .	222
6.14	Fatigue and Fracture . . . . .	224
6.15	Fatigue Assessment . . . . .	225
6.15.1	SN Approach . . . . .	225
6.16	Miner's Rule . . . . .	227
6.17	Fatigue Loading and Fatigue Analysis . . . . .	228
6.18	Time Domain Fatigue Analysis . . . . .	229
6.18.1	Rain Flow Counting . . . . .	229
6.19	Deterministic Fatigue Analysis . . . . .	231
6.20	Spectral Fatigue Analysis . . . . .	232
6.20.1	Narrowband Spectrum . . . . .	233
6.20.2	Broadband Spectrum . . . . .	234
6.21	Stress Concentration Factor (SCF) . . . . .	238
6.22	Crack Propagation . . . . .	238
6.22.1	Step-by-Step Procedure to Compute the Fatigue Crack Propagation . . . . .	239
<b>7</b>	<b>Applications in Preliminary Analysis and Design . . . . .</b>	<b>243</b>
7.1	Free Vibration Response of Offshore Triceratops . . . . .	243
7.2	New Structural Form . . . . .	244
7.3	Model Details . . . . .	245
7.4	Experimental Studies . . . . .	247
7.4.1	Free-floating Studies . . . . .	247
7.4.2	Free-decay Studies on Tethered Triceratops . . . . .	247
7.5	Analytical Studies . . . . .	247
7.6	Empirical Prediction . . . . .	249
7.7	Wave Directionality Effects on Offshore Triceratops . . . . .	250
7.8	Discussions of Experimental Studies . . . . .	250
7.9	Springing and Ringing Responses of Tension Leg Platforms . . . . .	256
7.9.1	Springing and Ringing . . . . .	256
7.10	Evolution of Platform Geometry . . . . .	257
7.11	Mathematical Development . . . . .	258
7.12	Analytical Model of TLP . . . . .	259
7.13	Hydrodynamic Forces on TLP . . . . .	262

7.14	Dynamics of Triangular TLP . . . . .	263
7.14.1	Mass Matrix . . . . .	263
7.14.2	Stiffness Matrix . . . . .	264
7.14.3	Damping Matrix . . . . .	264
7.15	Ringling Response . . . . .	265
7.16	Springing Response. . . . .	269
7.17	Significance of Springing and Ringling Response. . . . .	273
