1	Arsenic and Fluoride Pollution in Water and Soils.	1
1.1	World-Wide Occurrences of Arsenic and Fluoride Contaminated Groundwater	1
1.2	Arsenic and F^- Pollution in South and South East Asia. . .	4
1.3	Sources of As and F^-	6
1.3.1	Anthropogenic Sources of As	6
1.3.2	Anthropogenic Sources of Fluoride	7
1.4	Natural Source of Arsenic.	8
1.4.1	Minerals Having Arsenic	8
1.4.2	Volcanic Rocks, Geothermal Activity	8
1.4.3	Sedimentary Bedrock.	8
1.4.4	Alluvial Sediments	10
1.5	Natural Sources of Fluoride.	10
1.6	Health Effects of As and F^-	11
1.6.1	Health Effects of As	11
1.6.2	Health Effects of Fluoride	12
1.7	Geochemical Processes Controlling As and F^- Mobility. . .	14
1.7.1	Geochemical Processes Controlling As Mobility. . .	14
1.7.2	Geochemical Processes Controlling F^- Mobility. . .	15
	References	16
2	Status of As and F^- Groundwater and Soil Pollution in Pakistan.	21
2.1	Spatial Extent of Arsenic Contamination.	22
2.2	Depth Dependent Contamination of Arsenic	26
2.3	Population Exposed to Arsenic Contamination.	27
2.4	Epidemiological Investigation of Arsenic in Pakistan . . .	29
2.5	Sources and Causes of As Contamination in Pakistan. . .	30
2.6	Co-occurrence of F with As	31
	References	31

3 Mechanism of Arsenic and Fluoride Release:	
A Case Study from Lahore and Kasur, Punjab Pakistan . . .	35
3.1 Study Background	35
3.2 Geological and Geographical Settings of Study Area	37
3.3 Brief Description of the Study Area	40
3.4 Sampling	42
3.5 Analytical Methods and Chemical Analysis	45
3.5.1 Major Ion Chemistry	45
3.5.2 Arsenic in Groundwater and Rainwaters	48
3.5.3 Arsenic in Soil Samples	54
3.5.4 Water Soluble F^- in Soil and Fertilizers	54
3.5.5 Water Soluble As in Fertilizers	54
3.5.6 As and Total F^- in Coals	54
3.5.7 pH of Soil Samples	55
3.5.8 Major Chemical Composition of Soil Samples . . .	55
3.5.9 Grain Size Distribution	55
3.5.10 Mineralogy	55
3.6 Hydrogen and Oxygen Isotopes	56
3.7 Sulfur Isotopes	56
3.8 Nitrogen Isotopes	57
3.9 Isotope Measurements	57
3.9.1 Hydrogen and Oxygen Isotope Analyses of Water	57
3.9.2 Sulfur Extraction	57
3.9.3 Sulfur Isotope Analysis	58
3.9.4 Pretreatment for Nitrogen Isotope Analysis	59
3.9.5 Nitrogen Isotope Analysis	59
References	60
4 Results: Case Study	61
4.1 Major Chemical Compositions of Groundwaters from Kalalanwala (2002)	61
4.1.1 Groundwater Samples	61
4.1.2 Rainwater Samples	63
4.1.3 Arsenic and F^- Concentrations	63
4.1.4 Sulfur Isotopes	63
4.2 Results of Extended Study Area Punjab Pakistan (17 Villages 2004)	65
4.2.1 Major Chemical Compositions	65
4.2.2 Arsenic and Fluoride Concentrations	84
4.2.3 Stable Isotopic Compositions	88
4.3 Analytical Results of Soil Sampled in 2005	94
4.3.1 Mineral Composition	94
4.3.2 Relationship of Major Elements with As and F^- . . .	94
4.3.3 Geographic Distribution of As and F^-	101
4.4 Underground Profiles by Drilling March 2006	102

4.5	Mineral Saturation	103
4.5.1	Minerals Calcite and Dolomite	107
4.5.2	Mineral Gypsum Saturations.	108
4.5.3	Mineral Fluorite Saturations	108
	Appendix	109

5	Sources of Pollution, Discussion: Case Study	123
5.1	Probable Anthropogenic Sources of Pollutants	123
5.1.1	Contribution of Coal Combustion	123
5.1.2	Contribution of Phosphate Fertilizers	124
5.1.3	Contaminated Soils—The Evidence of Anthropogenic Sources	125
5.1.4	Sulfate and Sources of Sulfur in Rainwater and Groundwater.	127
5.1.5	Nitrogen and Sources of Nitrogen	128
5.2	Redox Reactions and Stability of Inorganic As	129
5.3	Role of Major Chemistry and Geochemical Factors Controlling As Mobilization	130
5.3.1	Desorption at High pH Under Oxidizing Conditions	130
5.3.2	Arsenic and Intense Evaporation	131
5.4	Role of Major Chemistry and Geochemical Factors Controlling F ⁻ Mobilization	131
5.4.1	Alkaline pH and Desorption of F ⁻	131
5.4.2	Evaporation Transpiration and Release of F ⁻	132
5.4.3	Mineral Solubility	133
5.5	Topographic Constrains	134
5.6	Aquifer Structure and Mechanism of Pollutant Migration	134
