

# Contents

<b>1 Mycorrhiza Specificity: Its Role in the Development and Function of Common Mycelial Networks . . . . .</b>	<b>1</b>
Randy Molina and Thomas R. Horton	
<b>2 Functional Significance of Anastomosis in Arbuscular Mycorrhizal Networks . . . . .</b>	<b>41</b>
Manuela Giovannetti, Luciano Avio and Cristiana Sbrana	
<b>3 The Importance of Ectomycorrhizal Networks for Nutrient Retention and Carbon Sequestration in Forest Ecosystems . . . . .</b>	<b>69</b>
Håkan Wallander and Alf Ekblad	
<b>4 Nutrient Dynamics in Arbuscular Mycorrhizal Networks . . . . .</b>	<b>91</b>
Iver Jakobsen and Edith C. Hammer	
<b>5 Resource Transfer Between Plants Through Ectomycorrhizal Fungal Networks . . . . .</b>	<b>133</b>
Suzanne Simard, Amanda Asay, Kevin Beiler, Marcus Bingham, Julie Deslippe, Xinhua He, Leanne Philip, Yuanyuan Song and François Teste	
<b>6 The Role of Ectomycorrhizal Networks in Seedling Establishment and Primary Succession . . . . .</b>	<b>177</b>
Kazuhide Nara	
<b>7 Facilitation and Antagonism in Mycorrhizal Networks . . . . .</b>	<b>203</b>
Cameron Wagg, Rita Veiga and Marcel G.A. van der Heijden	
<b>8 Interspecific Mycorrhizal Networks and Non-networking Hosts: Exploring the Ecology of the Host Genus <i>Alnus</i>. . . . .</b>	<b>227</b>
Peter G. Kennedy, Jennifer K.M. Walker and Laura M. Bogar	

<b>9 Experimentally Testing Effects of Mycorrhizal Networks on Plant-Plant Interactions and Distinguishing Among Mechanisms . . . . .</b>	<b>255</b>
Jason D. Hoeksema	
<b>Subject Index . . . . .</b>	<b>279</b>
<b>Taxonomic Index . . . . .</b>	<b>283</b>

Mycorrhizal Networks

Horton, Th.R. (Ed.)

2015, XVIII, 286 p. 41 illus., 16 illus. in color., Hardcover

ISBN: 978-94-017-7394-2
