1	Introduction	1
	References	5
 Part I Noncommutative Geometric Spaces		
2	Finite Noncommutative Spaces	9
2.1	Finite Spaces and Matrix Algebras	9
2.1.1	Commutative Matrix Algebras	13
2.1.2	Noncommutative Matrix Algebras	13
2.2	Noncommutative Geometric Finite Spaces	18
2.2.1	Morphisms Between Finite Spectral Triples	23
2.3	Classification of Finite Spectral Triples	25
	Notes	28
	References	29
3	Finite Real Noncommutative Spaces	31
3.1	Finite Real Spectral Triples	31
3.1.1	Morphisms Between Finite Real Spectral Triples	33
3.2	Classification of Finite Real Spectral Triples	35
3.3	Real Algebras and Krajewski Diagrams	42
3.4	Classification of Irreducible Geometries	45
	Notes	46
	References	47
4	Noncommutative Riemannian Spin Manifolds	49
4.1	Clifford Algebras	49
4.1.1	Representation Theory of Clifford Algebras	53
4.2	Riemannian Spin Geometry	55
4.2.1	Spin Manifolds	56
4.2.2	Spin Connection and Dirac Operator	59
4.2.3	Lichnerowicz Formula	63

4.3	Noncommutative Riemannian Spin Manifolds:	
	Spectral Triples	64
4.3.1	Commutative Subalgebra	70
	Notes	71
	References	73
5	The Local Index Formula in Noncommutative Geometry	75
5.1	Local Index Formula on the Circle and on the Torus	75
5.1.1	The Winding Number on the Circle	75
5.1.2	The Winding Number on the Torus	77
5.2	Hochschild and Cyclic Cohomology	81
5.3	Abstract Differential Calculus	85
5.4	Residues and the Local (b, B) -Cocycle	90
5.5	The Local Index Formula	93
	Notes	96
	References	98
 Part II Noncommutative Geometry and Gauge Theories		
6	Gauge Theories from Noncommutative Manifolds	103
6.1	'Inner' Unitary Equivalences as the Gauge Group	103
6.1.1	The Gauge Algebra	106
6.2	Morita Self-Equivalences as Gauge Fields	107
6.2.1	Morita Equivalence	107
6.2.2	Morita Equivalence and Spectral Triples	112
6.3	Localization	114
6.3.1	Localization of Gauge Fields	117
	Notes	118
	References	119
7	Spectral Invariants	121
7.1	Spectral Action Functional	121
7.2	Expansions of the Spectral Action	123
7.2.1	Asymptotic Expansion	123
7.2.2	Perturbative Expansion in the Gauge Field	125
7.A	Divided Differences	130
	Notes	131
	References	134
8	Almost-Commutative Manifolds and Gauge Theories	137
8.1	Gauge Symmetries of AC Manifolds	137
8.1.1	Unimodularity	139
8.2	Gauge Fields and Scalar Fields	141
8.2.1	Gauge Transformations	143

8.3	The Heat Expansion of the Spectral Action	144
8.3.1	A Generalized Lichnerowicz Formula	144
8.3.2	The Heat Expansion	148
8.4	The Spectral Action on AC Manifolds	151
	Notes	157
	References	157
9	The Noncommutative Geometry of Electrodynamics	159
9.1	The Two-Point Space	159
9.1.1	The Product Space	160
9.1.2	$U(1)$ Gauge Theory	162
9.2	Electrodynamics	163
9.2.1	The Finite Space	164
9.2.2	A Non-trivial Finite Dirac Operator	165
9.2.3	The Almost-Commutative Manifold	166
9.2.4	The Spectral Action	167
9.2.5	The Fermionic Action	168
9.2.6	Fermionic Degrees of Freedom	170
9.A	Grassmann Variables, Grassmann Integration and Pfaffians	171
	Notes	172
	References	173
10	The Noncommutative Geometry of Yang–Mills Fields	175
10.1	Spectral Triple Obtained from an Algebra Bundle	175
10.2	Yang–Mills Theory as a Noncommutative Manifold	179
10.2.1	From Algebra Bundles to Principal Bundles	179
10.2.2	Inner Fluctuations and Spectral Action	180
10.2.3	Topological Spectral Action	183
	Notes	183
	References	184
11	The Noncommutative Geometry of the Standard Model	185
11.1	The Finite Space	185
11.2	The Gauge Theory	189
11.2.1	The Gauge Group	189
11.2.2	The Gauge and Scalar Fields	191
11.3	The Spectral Action	194
11.3.1	Coupling Constants and Unification	200
11.3.2	The Higgs Mechanism	201
11.4	The Fermionic Action	205
	Notes	211
	References	212

12 Phenomenology of the Noncommutative Standard Model	213
12.1 Mass Relations	213
12.1.1 Fermion Masses	213
12.1.2 The Higgs Mass	214
12.1.3 The Seesaw Mechanism	215
12.2 Renormalization Group Flow	216
12.2.1 Coupling Constants	216
12.2.2 Renormalization Group Equations	218
12.2.3 Running Masses	219
12.3 Higgs Mass: Comparison to Experimental Results	222
12.4 Noncommutative Geometry Beyond the Standard Model	224
