Contents

Part I Introduction

1 Prologue 3
Writing Styles 4
Scope of the Book 5
References 6

2 Introduction to Different Ways of Knowing 7
Indigenous Knowledge (IK) 8
Western Knowledge 10
Western Science and African Indigenous Knowledge 11
Process of Making Sense 12
Interactions Between Different Ways of Knowing 13
References 16

Part II Science Education

3 History of Science Teaching in Southern Africa 21
Apartheid and Education 21
Apartheid Era 1948–2004 22
My Schooling 23
Post-Apartheid Era 32
Current Situation 2010–2014 34
References 35

4 Teaching Science in Southern Africa 37
Learning Science 39
African Indigenous Knowledge 41
Curiosity 42
How Do Students Acquire Scientific Knowledge? 44
Tracking an Alternative Conception of Heat 46

The 'Heat' Study 47
Alternative Conceptions 48
Implications for South African Science Curriculum 49
References 50

Part III Medical Education and Practice

5 Challenges of Medicine Across the Cultural Divide 53
Cultural Misunderstandings in Medicine 54
Cultural Misunderstanding of Hmong Refugees in the USA 57
Cultural Complexity in Lesotho 58
Colonial Medical Care in Africa 60
Sacred Versus Secular Colonial Medicine 61
The Western Medical Way of Knowing 61
Ways of Knowing in African Traditional Medicine 63
Negotiating Between Different Ways of Knowing 64
Medical Pluralism and Equipollence 65
Integrating Western and Non-Western Approaches 68
Integrative Approach to Patient Care 71
References 72

6 African Healing and Traditional Healers 73
Traditional Healers and Their Healing Practice 74
Traditional Healing Extraction Treatment 79
Traditional Healers' Ways of Knowing 81
Comparison of Western and Traditional Healing Procedures 84
Witchcraft in African Medicine 86
References 86

7 Education of Traditional Healers 89
The Decision to Become a Healer 89
Initiation Ceremony 91
Training Process 92
Accreditation 94
Continuing Education 95
References 98

Part IV Research in, and Applications to, Science and Medical Teaching

8 Educational Research on Indigenous Knowledge in Science Teaching 101
Exploring the Failure of the 'Foundations of Science' Course 102
Model of Teaching and Learning 103
A Functional Curriculum 104

Research Study Part 1: Identifying the Indigenous Knowledge of Traditional Healers in South Africa and Lesotho 105
Science Education in Lesotho 106
THs' Ideas About Children's Learning Needs in Lesotho and the Western Cape 106
Comparison of Traditional Healers' Ideas in Lesotho and the Western Cape 112
School Teachers' Responses to the Xhosa TH Interviews 112
Research Study Part 2: THs' Views on Teaching an Integrated IK- Science Curriculum 114
References 118

9 Integrating Indigenous Knowledge with Science Teaching 119
Argumentation Teaching Strategy 120
Tailored Teaching Strategy 120
Research Study Part 3: Investigating THs' Ideas About Teaching Activities 122
Integrating IK into a University Program 125
Integrating IK into a School 125
Importance of IK at a National and Global Level 127
Concluding Thoughts 128
References 130

10 Incorporating Indigenous Knowledge into Clinical Teaching 133
Medical Care 133
Medical Teaching 134
Challenging Students 137
Trans-cultural Medical Teaching 137
Tailored Teaching Approach 139
References 143

Part V Finale

11 Epilogue 147

Index 153
