

# Contents

<b>1</b>	<b>Introduction</b>	1
1.1	Background	3
1.2	Motivation	6
1.3	Summary of Chapters	7
	References	7
<b>2</b>	<b>Evolutionary Methods</b>	9
2.1	Overview	9
2.2	Fundamentals of Evolutionary Algorithms (EAs)	10
2.3	Evolutionary Algorithms (EAs)	11
2.4	Benefits of EAs	11
2.4.1	General Presentation of EAs Using Binary Coding	12
2.4.2	Description of a Simple EA	13
2.5	Mechanics of EAs	13
2.5.1	Representation of Individuals	13
2.6	Evolution Strategies (ESs)	16
2.7	Application of EAs to Constrained Problems	17
2.8	Summary of Chapter	19
	References	20
<b>3</b>	<b>Multi-Objective EAs And Game Theory</b>	21
3.1	Generalities	21
3.2	Definition of A Mult- Objective Problem	22
3.3	Cooperative Games: Pareto Optimality	22
3.4	Competitive Games: Nash Equilibrium	23
3.4.1	Definition of Nash Equilibrium	24
3.4.2	Coupling Nash Games and GAs	24
3.4.3	Generalization to N Nash Players	26
3.5	Hierarchical Game: Stackelberg	27
3.5.1	Coupling a Stackelberg Game with GAs	28

- 3.6 Comparison of Analytical Solutions and Numerical Game Solutions for Solving a Two Mathematical Functions Minimisation Problem ..... 28
  - 3.6.1 Analytical Solution..... 29
  - 3.6.2 Nash/Gas and Stackleberg/Gas Numerical Solutions ..... 30
- 3.7 Hybridized Games..... 32
  - 3.7.1 Algorithms for HAPMOEA and Hybridized Games..... 34
- 3.8 Summary of Chapter 3 ..... 38
- References ..... 38
  
- 4 Advanced Techniques for Evolutionary Algorithms (EAs) ..... 39**
  - 4.1 Generalities ..... 39
  - 4.2 Distributed and Parallel EAS ..... 39
  - 4.3 Hierarchical EAS (HEAs) ..... 41
  - 4.4 Asynchronous Evolutionary Algorithms (EAS) ..... 42
  - 4.5 Advanced Operators ..... 43
    - 4.5.1 Covariance Matrix Adaptation (CMA) ..... 43
    - 4.5.2 Pareto Tournament Selection ..... 44
  - 4.6 Advanced Games..... 45
    - 4.6.1 Virtual And Real Nash-Games ..... 46
    - 4.6.2 Nash-Game and Hierarchical Asynchronous Parallel EAs (NASH-HAPEA)..... 47
    - 4.6.3 Hybrid-Game Coupled with Single-Objective or Multi-Objective Evolutionary Algorithms ..... 48
  - 4.7 Meta Model Assisted EAS ..... 49
  - 4.8 Summary of Chapter ..... 50
  - References ..... 51
  
- 5 Multidisciplinary Design Optimisation and Robust Design in Aerospace Systems ..... 53**
  - 5.1 Generalities ..... 53
  - 5.2 Conceptual, Preliminary and Detailed Design ..... 53
  - 5.3 Multi-Disciplinary Design Analysis (MDA) and Optimisation ..... 54
    - 5.3.1 Definition ..... 54
    - 5.3.2 Challenges and needs for MDO ..... 54
    - 5.3.3 MDO Application Using Gradient-Based Methods ..... 56
  - 5.4 Approaches to MDO ..... 56
    - 5.4.1 Multi-Disciplinary Design Feasible (MDF)..... 57
    - 5.4.2 Individual Discipline Feasible (IDF) ..... 58
    - 5.4.3 Collaborative Optimization (CO)..... 59
    - 5.4.4 Criteria and Performance of MDO Implementations..... 61
  - 5.5 Uncertainty Based Robust Design ..... 61
    - 5.5.1 Robust/Uncertainty Method ..... 61

5.5.2	From Single-Objective to Multi-Objective Design Optimisation Using the Robust Design Method .....	63
5.5.3	Robust Multi-Objective/Multi-Disciplinary Design Optimization.....	65
5.6	Limitations of Traditional Optimisation Techniques for MDO and Robust Design.....	65
5.6.1	MDO Using Traditional Method and Evolutionary Algorithms.....	65
5.6.2	Advantages and Drawbacks of Robust Design .....	66
5.7	Summary of Chapter .....	67
	References .....	67
<b>6</b>	<b>A Framework for Numerical Design and Optimization Algorithms.....</b>	<b>69</b>
6.1	Overview .....	69
6.2	An Optimization Framework.....	69
6.3	Implementation of the Framework.....	71
6.4	Optimization Methodology .....	74
6.5	Optimization Algorithms.....	76
6.5.1	Overall Optimization Algorithm .....	76
6.5.2	A Generic Problem for Analysis Algorithm .....	78
6.5.3	Single-Objective Design Optimization Algorithm.....	80
6.5.4	Multi-Objective Design Optimization Algorithm .....	80
6.5.5	Optimization Algorithm with Multi-objective Hier- archical Evolutionary Algorithms .....	80
6.5.6	Multi-Disciplinary Design Optimization Algorithm .....	84
6.6	Robust Design Optimization.....	86
6.7	Summary of Chapter .....	86
	References .....	86
<b>7</b>	<b>Single Objective Model Test Case Problems.....</b>	<b>89</b>
7.1	Overview .....	89
7.2	Wing Reconstruction Using Hierarchial Asynchronous Parallel Multi-Objective Evolutionary Algorithms (HAP- MOEA) and Nash-Evolutionary Algorithms.....	89
7.3	Active Flow Control Bump Design Optimization.....	92
7.3.1	Suction Side SCB Design Optimization .....	95
7.3.2	Suction and Pressure Sides SCB Design Optimization.....	98
7.3.3	Double SCB Design using HAPMOEA.....	104
7.3.4	Double SCB Design using Hybridized Game.....	106
7.4	Generic Aircraft Wing Aerofoil Section Design Optimization .....	113
7.5	Summary of Chapter 7 .....	118
	References .....	121

<b>8 Multi-Objective Optimization Model Test Case Problems .....</b>	<b>123</b>
8.1 Overview .....	123
8.2 Pareto Reconstruction: Two Airfoils at Two Different Design Points .....	123
8.3 Multi-Element Airfoil Reconstruction: Two- Dimensional Two Objective Aircraft High Lift System Design and Optimization..	128
8.4 Unmanned Combat Aerial Vehicle Configuration: Concep- tual Design Optimisation.....	136
8.5 Unmanned Aerial Vehicle Mission Path Planning System (Hybridized Game/NSGA-II).....	146
8.5.1 Test 1: Start to Target to Start Position Trajectory Optimization.....	150
8.5.2 Test 2: Start to Target to End Position Trajectory Optimization.....	156
8.6 Unmanned Aerial Vehicle (Uav) Configuration: Detailed Design Optimisation.....	159
8.6.1 Multi-Objective Design Optimisation of UCAV Using Hybridized Games .....	174
8.7 Aerostructural Optimisation of a Medium Alitude Long Endurance (Male) UAS .....	177
8.8 Aero-Electromagnetic Optimization of a UAS .....	185
8.9 Summary of Chapter 8 .....	191
References .....	193
 <b>9 Robust Multi-Objective and Multi-Disciplinary Model Optimization Test Cases .....</b>	 <b>195</b>
9.1 Overview .....	195
9.2 Robust Active Flow Control Design Optimization .....	195
9.2.1 SCB Shape Design Optimisation at 45 % of the chord Boundary Layer Transition .....	196
9.2.2 Robust SCB Shape Design Optimization with Uncertainty Boundary Layer Transitions.....	199
9.3 Robust Multi-Objective Generic Aircraft Wing Optimization.....	211
9.4 Robust Aero-Structural Generic Aircraft Wing Optimization.....	218
9.5 Robust Aero-Electromagnetic Design Optimization of UAS .....	229
9.5.1 Robust Multi-Disciplinary Design Optimisation of UCAS Using HAPMOEA Software.....	231
9.5.2 Robust Multi-Disciplinary Design Optimization of UCAS Using Hybridized Games .....	239
9.6 Robust Multi-Disciplinary Aero-Electro-Structural UCAV Design Optimization .....	252
9.7 Summary of Chapter .....	261
9.8 Appendix .....	264
References .....	264

<b>10 Robust Airfoil Design Optimization with Morphing Techniques .....</b>	<b>265</b>
10.1 Overview .....	265
10.2 Morphing Airfoil/Wing Design Mechanism: Leading and Trailing Edge Deformation .....	266
10.2.1 Parameterization of Morphing Aerofoil/Wing: Leading and Trailing Edge Deformation .....	266
10.2.2 Baseline Design .....	266
10.3 Morphing Airfoil/Wing Design Optimisation at Cruise Flight Conditions .....	267
10.3.1 Trailing Edge Deformation (TED) Design Optimisation....	267
10.3.2 Robust Leading and Trailing Edge Deformation (LTED) Design Optimization .....	271
10.4 Morphing Airfoil/Wing Design Optimization at Take-Off and Landing Conditions Using Moga and Hybridized Game with Moga .....	277
10.5 Conclusion and Future Research .....	284
10.6 Summary of Chapter 10 .....	284
References .....	284
<b>Appendix: Two “Hands-On” Examples of Optimization Problems .....</b>	<b>285</b>
A.1 Overview .....	285
A.2 Reconstruction of BI-NACA Using HAPEA and NASH-EA .....	285
A.2.1 Introduction .....	285
A.2.2 Definition of the Test Case .....	285
A.2.3 Optimization .....	286
A.2.4 Software and Computer Facilities Needed for Solving the Inverse Problem .....	290
A.2.5 A Step by Step Design Optimisation Procedure .....	291
A.2.6 Analysis and Synthesis of Results Obtained by HAPEA and Nash-EAs Software .....	292
A.2.7 Conclusion .....	294
A.3 Unmanned Aerial Vehicle Design: Multi-Objective Optimization ....	295
A.3.1 Introduction .....	295
A.3.2 Definition of the Test Case .....	296
A.3.3 Optimization .....	297
A.3.4 Software Needed for Solving the Optimization Problem and Computer Used .....	300
A.3.5 A Step-by-Step Design Optimization Procedure .....	301
A.3.6 Analysis and synthesis of results obtained by HAPMOEA software .....	301
A.3.7 Conclusion .....	304
References .....	305

Evolutionary Optimization and Game Strategies for

Advanced Multi-Disciplinary Design

Applications to Aeronautics and UAV Design

Periaux, J.; Gonzalez, F.; Lee, D.S.C.

2015, XXI, 305 p. 246 illus., 48 illus. in color., Hardcover

ISBN: 978-94-017-9519-7
