
Contents

1	Factors and Soil Formation	1
1.1	Introduction	1
1.2	Geomorphology and Geology	1
1.3	Climate and Vegetation	5
1.4	Human Activity Factors	6
1.5	Soil Classification	8
	References	10
2	Soil Survey, Information System, and Soil Classification	11
2.1	History	11
2.2	Survey Report and Mapping	12
2.2.1	Reconnaissance Soil Survey of Taiwan Province (1946–1952)	13
2.2.2	Detailed Soil Survey of Taiwan Rural Soils (1962–1976, 1974–1979)	13
2.2.3	Detailed Soil Survey of Taiwan Hill Land (1980–1988)	13
2.2.4	Soil Survey of Productivity Grade of Taiwan Upland (1986–1990)	13
2.2.5	Soil Survey of Contaminated Soils (1984–2000)	14
2.2.6	Detailed Soil Survey of Taiwan Forest Soils in Mountains (1993–2002)	14
2.2.7	Detailed Grid Soil Survey of Taiwan Rural Soils (2000–2010)	14
2.2.8	Soil Quality Monitoring Project After Different Soil Management System (1997–2007)	15
2.3	Soil Information System (Application and Education)	15
2.3.1	Soil Information Apply to Low Productivity Land Assessment	15
2.3.2	Soil Information Apply to Soil Liquefaction Assessment	16
2.3.3	Soil Information Apply to Food Safety	16
2.3.4	Soil Museum for Soil Function Education	17
2.4	Pedology Studies in Taiwan	18
2.4.1	The Soil Characteristics and Genesis of Soils Derived from Different Parent Materials (1960–1975)	18
2.4.2	The Soil Characteristics and Genesis of Rice-Growing Soils of Ultisols (1980–2005)	18
2.4.3	The Soil Characteristics and Genesis of Podzolic Soils (1988–2005)	19
2.4.4	The Soil Characteristics and Genesis of Volcanic Soils (1990–2005)	19
2.4.5	The Soil Genesis and Geomorphology on River and Marine Terraces (2005–Present)	19
2.5	Work Needs in the Future	21
	References	21

3	Alfisols	25
3.1	General Information	25
3.2	Profile Characteristics	25
3.2.1	Serpentine-Derived Soil	25
3.2.2	Taiwan Clay	29
3.2.3	Coral Reef-Derived Soil	30
3.3	Formation and Genesis	31
3.4	Land Use and Management	32
	References	33
4	Andisols	35
4.1	General Information	35
4.1.1	Geology	35
4.1.2	Climate	35
4.1.3	Vegetation and Landuse	36
4.1.4	Soil Distribution	36
4.2	Profile Characteristics	37
4.2.1	Profile Description	37
4.2.2	Characteristics of Pyroclastic-Derived Soils	42
4.2.3	Formation and Genesis	47
4.3	Land Use and Management	53
	References	53
5	Entisols	55
5.1	General Information	55
5.1.1	Entisols in Rural and Hill Lands	55
5.1.2	Entisols in Forest Lands	56
5.2	Profile Characteristics	56
5.2.1	Representative Entisols in Taiwan	56
5.2.2	Characteristics of Representative Entisols	57
	References	62
6	Inceptisols	63
6.1	General Information	63
6.1.1	Inceptisols in Rural and Hill Lands	63
6.1.2	Inceptisols in Forest Lands	63
6.2	Profile Characteristics	63
6.2.1	Representative Inceptisols in Taiwan	63
6.2.2	Characteristics of Representative Entisols	64
	References	72
7	Other Soils	73
7.1	General Information (Soil Formation Factors and Distribution of Great Group)	73
7.2	Profile Characteristics (Morphology and Micromorphology, Physiochemical Properties, and Mineralogy)	73
7.2.1	Vertisols from Serpentinites in Eastern Taiwan	73
7.2.2	Vertisol and Mollisols on the Marine Terraces of Eastern Taiwan	76
7.2.3	Histosols in the Central Ridge	80
7.3	Formation and Genesis	81
7.4	Land Use and Management	82
	References	82

8	Spodosols	83
8.1	General Information (Soil Formation Factors and Distribution of Great Group)	83
8.2	Profile Characteristics	84
8.2.1	Typic Haplorthods	84
8.2.2	Ultic Haplorthods	88
8.3	Formation and Genesis	91
8.4	Land Use and Management	93
	References.	93
9	Oxisols and Ultisols	95
9.1	General Information (Soil Formation Factors and Distribution of Great Group)	95
9.2	Profile Characteristics (Morphology and Micromorphology, Physiochemical Properties, and Mineralogy)	95
9.2.1	Morphology of Oxisol	96
9.2.2	Physical and Chemical Properties and Clay Mineralogy of Oxisol	98
9.2.3	Morphology of Ultisol	98
9.2.4	Physical and Chemical Properties and Clay Mineralogy of Ultisols	100
9.3	Ultisol with Redoximorphic Features	104
9.3.1	Morphology of Plinthitic Ultisols	104
9.4	Formation and Genesis	106
9.5	Land Use and Management	108
	References.	108
10	Soil Degradation	111
10.1	Soil Degradation in Taiwan	111
10.1.1	Soil Erosion	111
10.1.2	Strong Acid Soils	111
10.1.3	Poorly Drained Soils	111
10.1.4	Highly Compacted Taiwan Clay Soils	112
10.1.5	Salt-Affected Soils	113
10.1.6	Deficiency in Micronutrients	113
10.1.7	Water Stress in Deep Sandy Soils	114
10.1.8	Heavy Metal Contaminated Soils	114
10.2	Soil Contamination and Remediation	114
10.2.1	Soil Protection Regulation	114
10.2.2	Soil Heavy Metal Remediation	115
10.2.3	Future Study Needs and Prospects	117
10.3	Soil Quality and Sustainability	117
10.3.1	Definition of Sustainable Management	117
10.3.2	Soil Quality Concept	118
10.3.3	The Assessment of Soil Quality	119
10.3.4	Approaching a National Level of Sustainable Soil Management	120
