

Contents

1	Introduction and Historic Perspective	1
1.1	From Subsonic to Supersonic Flight	1
1.2	Definition of the Transonic Flow Domain	4
1.3	Transonic Wind Tunnel Experiments	5
1.4	Transonic Aerodynamics of Wings and Bodies	8
1.5	Transonic Flow Calculations	14
1.6	Outline of Present Textbook	16
	References	18
2	Review of Fundamental Equations	21
2.1	Introduction	21
2.2	Review of Partial Differential Equations	22
2.2.1	One-Dimensional Wave Equation and Solution by D'Alembert	22
2.2.2	One-Dimensional Heat Equation and Solution by Fourier Series	29
2.2.3	Conservation Form of PDEs	33
2.2.4	Classification of Partial Differential Equations	35
2.3	Review of Vector Algebra	38
2.3.1	Vectors, Vector Fields, and Scalar Fields	38
2.3.2	Gradient of a Scalar Field	40
2.3.3	Divergence of a Vector Field	41
2.3.4	Curl of a Vector Field	42
2.3.5	Relation Between Volume, Surface, and Line Integrals	42
2.4	Review of Thermodynamics	43
2.4.1	Perfect Gas Relations	44
2.4.2	First Law of Thermodynamics	46
2.4.3	Second Law of Thermodynamics	48
2.4.4	Isentropic Relations	50

2.5	Equations of Fluid Motion	51
2.5.1	Conservation of Mass	51
2.5.2	Conservation of Linear Momentum	53
2.5.3	Conservation of Energy	56
2.5.4	Conservation Form of the Navier-Stokes Equations	60
2.6	Reynolds-Averaged Navier-Stokes Equations	62
2.6.1	Incompressible Reynolds-Averaged Equations of Motion	62
2.6.2	Compressible Reynolds-Averaged Equations of Motion	65
2.6.3	Turbulence Modeling: The k-Epsilon Model	67
2.7	Equations of Motion for Inviscid Flows	69
2.7.1	Euler Equations	69
2.7.2	Potential Flow Equation	72
2.8	Summary	75
	References	79
3	Transonic Similarity Laws	81
3.1	Introduction	81
3.2	Linearized Compressibility Corrections	82
3.2.1	2-D Subsonic Flow	85
3.2.2	Other Subsonic Compressibility Corrections	89
3.2.3	2-D Supersonic Flow	99
3.2.4	The Principle of Superposition	103
3.2.5	Slender Bodies of Revolution in Subsonic and Supersonic Flow—Linear Theory	106
3.3	Transonic Small Disturbance Theory	114
3.4	Transonic Similarity Parameters	117
3.4.1	Other Transonic Similarity Parameters	120
3.5	3-D Planar and Axisymmetric Slender Bodies	123
3.6	Hodograph Transformation	126
3.7	Empirical Rules	127
3.8	Approximate Location of Detached Shocks	130
3.9	Summary	134
	References	144
4	Shock-Expansion Theory	145
4.1	Introduction	145
4.2	Lift and Wave Drag	169
4.3	Bi-Convex Airfoil	173
4.4	Axisymmetric and Slender Bodies	183
4.5	Examples and Applications	188

4.5.1	The Shape and Geometric Parameters of an (Axisymmetric) Ogive Nose	188
4.5.2	Extension to Transonic Speeds	192
4.6	Summary	194
	References.	209
5	Method of Characteristics	211
5.1	Introduction	211
5.2	2-D Irrotational Flows	212
5.3	Design of a 2-D Supersonic Minimum-Length Nozzle (MLN)	222
5.4	Wave-Field Method Versus Lattice-Point Approach.	232
5.5	Axisymmetric Irrotational Flows	251
5.6	Examples and Applications	256
5.6.1	Design of a Family of Supersonic Nozzles.	256
5.6.2	Deflecting Jet.	256
5.6.3	Non-uniform Inlet Condition: Example of Source Flow.	258
5.6.4	Streamlines and Ducts	258
5.6.5	Curved Shocks	263
5.7	Summary	265
	References.	273
6	Aerodynamics of Non-lifting Bodies	275
6.1	Introduction	275
6.2	Pressure Distribution Over Nonlifting Bodies	279
6.2.1	Subsonic Inviscid Flow	279
6.2.2	Effect of Subcritical Compressibility	284
6.3	Wave Drag	287
6.3.1	Calculation of Pressure Drag by Use of Momentum Theory	291
6.3.2	Supersonic Wave Drag of a Slender Axis-Symmetric Body	294
6.3.3	Optimum Shape of a Slender Body of Revolution.	296
6.3.4	Examples of Transonic Area Ruling	300
6.4	Fundamentals of Boundary-Layer Flow	302
6.4.1	Laminar Boundary Layer	303
6.4.2	Turbulent Boundary Layer	313
6.4.3	Shock-Wave Boundary-Layer Interaction in Transonic Flow.	319
6.5	Boundary-Layer Computations	324
6.5.1	Boundary Layer Equations for Steady Incompressible Flow	325
6.5.2	Laminar Boundary Layer	327

6.5.3	Turbulent Boundary Layer	331
6.5.4	Boundary Layer Transition.	343
6.6	Interference Drag	349
6.6.1	Interference Drag in Subsonic Conditions	350
6.6.2	Interference Drag in Transonic Conditions	352
6.7	Summary	356
	References.	364
7	Airfoil Aerodynamics	367
7.1	Introduction	367
7.2	Pressure Distribution About Airfoils	368
7.3	Laminar-Flow Airfoils	372
7.4	Supercritical Airfoils	375
7.4.1	Shock-Free Supercritical Airfoil	379
7.4.2	Supercritical Airfoils with Shocks	383
7.4.3	Sonic Rooftop Airfoils	390
7.4.4	Effect of Trailing Edge Geometry	390
7.5	Low-Speed Stall	393
7.5.1	Qualification of Low-Speed Stall	394
7.5.2	Reynolds Effect on Maximum Lift Coefficient	397
7.5.3	Mach Effect on Maximum Lift Coefficient.	399
7.5.4	High-Lift Devices	403
7.6	High-Speed Stall.	405
7.6.1	Flow Separation at the Shock Foot	406
7.6.2	Transonic Buffet.	411
7.7	Summary	419
	References.	425
8	Aerodynamics of Swept Wings	427
8.1	Introduction	427
8.2	The Advantages of Wing Sweep.	428
8.2.1	Theory of Wing Sweep	430
8.2.2	Effect on Drag Divergence Mach Number	433
8.2.3	Effect on Wave Drag Coefficient	441
8.3	Inviscid Flow over Swept Wings	449
8.3.1	Flow over Infinite Swept Wings	450
8.3.2	Flow over Finite Swept Wings	453
8.4	Viscous Flow over Swept Wings	461
8.4.1	Three-Dimensional Boundary Layer over Swept Wings	461
8.4.2	Transition	464
8.4.3	Separation	470

8.5	Aeroelasticity of Swept Wings	474
8.5.1	Static Deformation	476
8.5.2	Reduced Control-Surface Effectiveness	481
8.5.3	Structural Divergence	490
8.5.4	Flutter at High Subsonic Mach Numbers	491
8.5.5	Prediction and Detection of Aeroelastic Phenomena	496
8.6	Summary	499
