

Contents

1	Laser Diode Basics	1
1.1	Laser Diode Types	1
1.1.1	Homojunction Laser Diodes	1
1.1.2	Gain-Guided Laser Diodes	3
1.1.3	Index-Guided Laser Diodes	3
1.1.4	Quantum Well and Multi-quantum-Well Laser Diodes	3
1.1.5	Intersubband and Interband Quantum Cascade Lasers	5
1.1.6	DFB and DBR Laser Diodes	6
1.1.7	Vertical Cavity Surface Emitting Laser Diodes (VCSEL)	7
1.1.8	Other Terminologies Often Used to Categorize Laser Diodes	8
1.2	Gain	9
1.2.1	Lasing Threshold Condition	9
1.2.2	Laser Diode Materials and Gain Profiles	10
1.3	Spectral Properties	10
1.3.1	Longitudinal Modes	10
1.3.2	Mode Competition	11
1.3.3	Mode Hopping	12
1.3.4	Wavelength	13
1.3.5	Linewidth	14
1.4	Power	14
1.4.1	Continuous Wave Operation	14
1.4.2	Modulated or Pulsed	15
1.5	Temperature Effect	16
1.6	Electrical Properties	17
1.6.1	Internal Circuit for DC Operation	17
1.6.2	Series Resistance	18
1.6.3	Intrinsic Circuit for Modulation	19

1.7	Main Failure Mechanism and How to Protect Laser Diodes	20
1.8	Laser Diode Mechanical Properties, Packages, and Modules	20
1.8.1	Mechanical Tolerance.	20
1.8.2	Laser Diode Packages.	21
1.8.3	Laser Diode Modules	22
1.9	Vendors and Distributors of Laser Diodes, Laser Diode Modules and Laser Diode Optics	24
1.9.1	Laser Diode Vendors	24
1.9.2	Laser Diode Module Vendors	25
1.9.3	Laser Diode Optics Vendors	25
	References	25
2	Laser Diode Beam Basics	27
2.1	Single Transverse Mode Laser Diode Beams	27
2.1.1	Elliptical Beams.	27
2.1.2	Large Divergences	28
2.1.3	Quasi-Gaussian Intensity Profiles	29
2.1.4	Astigmatism	29
2.1.5	Polarization	30
2.2	Multi-transverse Mode Laser Diode Beams	30
2.2.1	Wide Stripe Laser Diode Beams	30
2.2.2	Laser Diode Stack Beams	31
2.3	Laser Diode Beam Propagation	32
2.3.1	Basic Mode Paraxial Gaussian Beams	32
2.3.2	M^2 Factor Approximation	35
2.3.3	Thin Lens Equation for a Real Laser Beam.	36
2.3.4	Non-paraxial Gaussian Beams	39
2.3.5	Raytracing Technique.	41
2.4	Zemax Modeling of a Gaussian Beam Propagating Through a Lens	45
2.4.1	Collimating a Gaussian Beam	45
2.4.2	Focusing a Gaussian Beam	50
	References	51
3	Laser Diode Beam Manipulations	53
3.1	Collimating and Focusing	54
3.1.1	Lenses	54
3.1.2	Beam Shape Evolvement	57
3.1.3	Beam Quality Check	58
3.1.4	Collimation or Focusing a Laser Diode Beam, Graphical Explanations	59

3.1.5	A Numerical Example of Collimating and Focusing a Laser Diode Beam.	63
3.1.6	Deliver a Smallest Beam Spot to a Long Distance	65
3.1.7	Laser Line Generator	68
3.2	Numerical Analysis of the Propagation, Collimation, and Focusing of a Laser Diode Beam	70
3.2.1	Propagation of a Nonparaxial Laser Diode Beam	71
3.2.2	Collimating a Nonparaxial Laser Diode Beam	73
3.2.3	Tightly Focusing an Astigmatic Laser Diode Beam to a Small Spot	75
3.3	Beam Circularization and Astigmatism Correction	83
3.3.1	Using Two Cylindrical Lenses to Collimate and Circularize an Elliptical Beam and to Correct the Astigmatism.	83
3.3.2	Using an Anamorphic Prism Pair and a Circular Aperture to Circularize the Beam.	84
3.3.3	Using a Weak Cylindrical Lens to Correct the Astigmatism.	86
3.3.4	Using a Special Cylindrical Micro Lens to Circularize an Elliptical Beam and to Correct the Astigmatism	87
3.3.5	Using a Single Mode Optic Fiber to Circularize an Elliptical Beam and Correct the Astigmatism	88
3.4	Coupling a Single Mode Laser Diode Beam into a Single Mode Optic Fiber	89
3.5	Aperture Beam Truncation Effects	91
3.6	Diffractive Optics and Beam Shaping	93
3.6.1	Diffractive Optics.	93
3.6.2	Shape a Single TE Mode Laser Diode Beam.	94
3.7	Effects of External Optical Feedback on Laser Diodes	94
3.7.1	Accidental External Feedback	94
3.7.2	Intentional External Feedback	96
3.8	Multitransverse Mode Laser Diode Beam Manipulation.	98
3.8.1	Collimating a Wide-Stripe Laser Diode Beam	98
3.8.2	Focusing a Wide-Stripe Laser Diode Beam	99
3.8.3	Collimating or Focusing a Laser Diode Stack Beam.	100
3.8.4	Wide-Stripe Laser Diode Beam Shape Evolvment.	100
3.8.5	Laser Diode Stack Beam Shape Evolvment	101
3.8.6	Coupling a Multitransverse Mode Laser Diode Beam into a Multimode Optic Fiber Array.	102
3.8.7	Shape a Wide-Stripe Laser Diode Beam	102

4 Laser Diode Beam Characterization	105
4.1 Spatial Property Characterization	105
4.1.1 Beam Size and Shape Measurement	106
4.1.2 Locate the Beam Waist and Measure the M^2 Factor	107
4.1.3 Beam Far Field Divergence Measurement	110
4.1.4 Astigmatism Measurement	111
4.2 Spectral Property Characterization: Wavelength Measurement	115
4.2.1 Fizeau Wavemeter	115
4.2.2 Michelson Interferometer Wavemeter	117
4.2.3 Lab Wavelength Measurement Setup	118
4.2.4 Algorithm for Calculating the Periods of Interference Fringe	122
4.3 Spectral Property Characterization: Linewidth Measurement.	123
4.3.1 Diffraction Gratings	123
4.3.2 Monochromators	125
4.3.3 Scanning Fabry–Perot Interferometers.	127
4.3.4 Lab Setup for Linewidth Measurement: Glass Flat Setup.	130
4.4 Power and Energy Measurement	134
4.4.1 Commonly Used Sensor Heads of Laser Power Meters	134
4.4.2 Integration Spheres.	134
