## Part I Involutions

<b>1 Involutions and Differential Equations</b> . . . . .	3
1.1 The Straight Line Problem . . . . .	3
1.2 Involutions and their Properties . . . . .	5
1.2.1 The Concept of Involution . . . . .	5
1.2.2 Properties of Involutions . . . . .	6
1.2.3 Characterization of Involutions . . . . .	9
1.3 Differential Operators with Involutions . . . . .	11
1.3.1 Algebraic Theory . . . . .	11
1.3.2 Differential Equations with Involutions. . . . .	12
References . . . . .	16
<b>2 General Results for Differential Equations with Involutions</b> . . . . .	17
2.1 The Bases of the Study . . . . .	17
2.2 Differential Equations with Reflection. . . . .	20
References . . . . .	22

## Part II Green's Functions

<b>3 Order One Problems with Constant Coefficients</b> . . . . .	27
3.1 Reduction of Differential Equations with Involutions to ODE . . . . .	27
3.2 Solution of the Equation $x'(t) + mx(-t) = h(t)$ . . . . .	33
3.2.1 Constant Sign of Function $\overline{G}$ . . . . .	38
3.2.2 Lower and Upper Solutions Method . . . . .	43
3.2.3 Existence of Solutions via Krasnosel'skii's Fixed Point Theorem. . . . .	45
3.2.4 Examples . . . . .	48
3.3 The Antiperiodic Case . . . . .	49
3.3.1 The General Case . . . . .	51
3.4 Examples . . . . .	52

3.5	Solutions of the Initial Value Problem . . . . .	56
3.5.1	The $n$ th Order Problem . . . . .	56
3.5.2	The First Order Problem . . . . .	59
3.6	Sign of the Green's Function . . . . .	63
3.6.1	The Case (C1) . . . . .	63
3.6.2	The Case (C2) . . . . .	66
3.6.3	The Case (C3) . . . . .	68
	References . . . . .	72
<b>4</b>	<b>The Non-constant Case . . . . .</b>	<b>75</b>
4.1	Order One Linear Problems with Involutions. . . . .	75
4.2	Study of the Homogeneous Equation . . . . .	77
4.3	The Cases (D1)–(D3) for the Complete Problem . . . . .	80
4.4	The Cases (D4) and (D5) . . . . .	91
4.5	The Other Cases . . . . .	94
	References . . . . .	99
<b>5</b>	<b>General Linear Equations . . . . .</b>	<b>101</b>
5.1	Differential Operators with Reflection. . . . .	101
5.2	Boundary Value Problems . . . . .	106
5.3	The Reduced Problem . . . . .	111
5.4	The Hilbert Transform and Other Algebras . . . . .	117
5.4.1	Hyperbolic Numbers as Operators . . . . .	120
	References . . . . .	121
<b>Part III Applications</b>		
<b>6</b>	<b>A Cone Approximation to a Problem with Reflection. . . . .</b>	<b>125</b>
6.1	The Case of Kernels that Change Sign . . . . .	126
6.2	The Case of Nonnegative Kernels . . . . .	132
6.3	The Case of Kernels with Extra Positivity. . . . .	133
6.4	An Application . . . . .	134
	References . . . . .	150
	<b>Index . . . . .</b>	<b>153</b>
