

Contents

Raman Spectroscopy, Modeling and Simulation Studies of Carbon Nanotubes.	1
Daniel Casimir, Raul Garcia-Sanchez and Prabhakar Misra	
Laser Optogalvanic Spectroscopy and Collisional State Dynamics Associated with Hollow Cathode Discharge Plasmas	21
Michael Blosser, Xianming L. Han, Raul F. Garcia-Sanchez and Prabhakar Misra	
Applications of Fluorescence Anisotropy in Understanding Protein Conformational Disorder and Aggregation	41
Neha Jain and Samrat Mukhopadhyay	
Nuclear Magnetic Resonance Spectroscopy in Nanomedicine	59
Ping-Chang Lin	
An Efficient Coupled Dipole Method for the Accurate Calculation of van der Waals Interactions at the Nanoscale.	85
Hye-Young Kim	
Adsorption of Gases in Nanomaterials: Theory and Simulations	121
M.T. Mbaye, S.M. Maiga and S.M. Gatica	
Atom-Precise Metal Nanoclusters	141
Anu George and Sukhendu Mandal	
Plasmonic Properties of Metallic Nanostructures, Two Dimensional Materials, and Their Composites	165
Lauren Rast	

Application of Graphene Within Optoelectronic Devices and Transistors	191
F.V. Kusmartsev, W.M. Wu, M.P. Pierpoint and K.C. Yung	
The Versatile Roles of Graphene in Organic Photovoltaic Device Technology	223
Jayalekshmi Sankaran and Sreekanth J. Varma	
Nanomaterials in Nanomedicine	253
Francis Mensah, Hailemichael Seyoum and Prabhakar Misra	

Applied Spectroscopy and the Science of
Nanomaterials

Misra, P. (Ed.)

2015, XII, 277 p. 118 illus., Hardcover

ISBN: 978-981-287-241-8
