

# Contents

<b>1</b>	<b>Introduction</b>	<b>1</b>
1.1	Biometric Properties	2
1.2	Operational Modes of a Biometric System	4
1.2.1	Enrollment	4
1.2.2	Verification	4
1.2.3	Identification	5
1.3	Performance Measures	6
1.3.1	ROI Detection	7
1.3.2	Verification Accuracy	7
1.3.3	Identification Accuracy	9
1.4	Biometric Traits	10
1.4.1	Physiological Traits	10
1.4.2	Behavioral Traits	13
1.5	Motivation	15
1.6	Popular Ear Databases	16
1.6.1	IITK Database	16
1.6.2	University of Notre Dame-Collection E (UND-E) Database [4]	18
1.6.3	University of Notre Dame-Collection J2 (UND-J2) Database [5]	19
	References	20
<b>2</b>	<b>Ear Detection in 2D</b>	<b>21</b>
2.1	Introduction	21
2.2	Preliminaries	24
2.2.1	Color Based Skin Segmentation	24
2.2.2	Speeded Up Robust Feature Transform	25
2.3	Ear Detection Technique	28
2.3.1	Preprocessing	28
2.3.2	Ear Candidate Set Generation	33
2.3.3	Ear Localization	37

2.4	Scale, Rotation and Shape Invariance . . . . .	40
2.5	Experimental Results. . . . .	40
2.5.1	Estimation of Parameters . . . . .	40
2.5.2	Results . . . . .	41
	References. . . . .	47
<b>3</b>	<b>Ear Recognition in 2D . . . . .</b>	<b>51</b>
3.1	Introduction . . . . .	51
3.2	Preliminaries . . . . .	54
3.2.1	Adaptive Histogram Equalization . . . . .	54
3.2.2	Non-local Means Filter . . . . .	55
3.2.3	Steerable Filter . . . . .	56
3.3	Ear Recognition Technique . . . . .	58
3.3.1	Image Enhancement . . . . .	59
3.3.2	Feature Extraction. . . . .	59
3.3.3	Classification and Fusion . . . . .	61
3.4	Experimental Results. . . . .	62
3.4.1	Ear Extraction from the Background . . . . .	62
3.4.2	Parameters Tuning . . . . .	62
3.4.3	Results . . . . .	69
	References. . . . .	72
<b>4</b>	<b>Ear Detection in 3D . . . . .</b>	<b>75</b>
4.1	Introduction . . . . .	75
4.2	3D Ear Detection Technique . . . . .	77
4.2.1	Preprocessing . . . . .	77
4.2.2	Ear Candidate Set Computation . . . . .	80
4.2.3	Ear Localization . . . . .	83
4.3	Scale and Rotation Invariance. . . . .	84
4.3.1	Invariance to Scale . . . . .	85
4.3.2	Invariance to Rotation . . . . .	86
4.4	Experimental Results. . . . .	86
4.4.1	Performance Evaluation. . . . .	86
4.4.2	Comparison with Other Techniques. . . . .	88
	References. . . . .	90
<b>5</b>	<b>Ear Recognition in 3D . . . . .</b>	<b>91</b>
5.1	Introduction . . . . .	91
5.2	Generalized Procrustes Analysis . . . . .	94
5.2.1	GPA-ICP: Integration of GPA with ICP. . . . .	95
5.3	3D Ear Recognition Technique Based on Local 2D Features and GPA-ICP (LFGPA-ICP) . . . . .	96
5.3.1	Local 2D Feature Points Based Coarse Alignment . . .	96
5.3.2	Final Alignment Using GPA-ICP Technique . . . . .	98

5.4	Experimental Results. . . . .	100
5.4.1	Preprocessing of Data . . . . .	100
5.4.2	Results . . . . .	102
5.4.3	Comparison with Other Techniques. . . . .	102
	References. . . . .	105
6	<b>Fusion of Ear with Other Traits . . . . .</b>	<b>107</b>
6.1	Fusion in 2D . . . . .	107
6.2	Fusion in 3D . . . . .	113
	References. . . . .	115

Ear Biometrics in 2D and 3D

Localization and Recognition

Prakash, S.; Gupta, P.

2015, XVI, 116 p. 56 illus., 45 illus. in color., Hardcover

ISBN: 978-981-287-374-3
