

Contents

1	Urbanisation and Stormwater Quality	1
1.1	Urbanisation	1
1.2	Influence of Urbanisation on the Water Environment	2
1.2.1	Hydrologic Impacts	2
1.2.2	Water Quality Impacts	5
1.3	Pollutants and Pollutant Sources	6
1.3.1	Primary Stormwater Pollutants	6
1.3.2	Primary Pollutant Sources	8
1.4	Summary	12
	References	13
2	Stormwater Treatment Design	15
2.1	Background	15
2.2	Use of Models in Stormwater Treatment Design	17
2.3	Stormwater Models	18
2.3.1	Hydrologic Models	19
2.3.2	Water Quality Models	20
2.4	Factors Affecting Model Accuracy	22
2.4.1	Model Structure	22
2.4.2	Input Parameters	22
2.4.3	Modelling Approach Used	23
2.5	Understanding Influential Factors of Stormwater Quality-Improving the Modelling Approach	24
2.5.1	Catchment Characteristics	24
2.5.2	Rainfall Characteristics	26
2.6	Summary	29
	References	29

3 Case Studies	31
3.1 Background	31
3.2 Study Approach	32
3.2.1 Study Sites	32
3.2.2 Data Collection and Pollutant Parameter Selection	32
3.3 Case Study I-Role of Rainfall Characteristics on Urban Stormwater Quality	36
3.3.1 Selection of Rainfall Characteristics	36
3.3.2 Relationship Between Rainfall Characteristics and Stormwater Quality	39
3.3.3 Classification of Rainfall Events	41
3.3.4 Summary of Findings	44
3.4 Case Study II-Role of Catchment Characteristics on Urban Stormwater Quality	44
3.4.1 Preliminary Comparison of Stormwater Quality	45
3.4.2 Relationship Between Catchment Characteristics and Stormwater Quality	46
3.4.3 Summary of Findings	48
3.5 Conclusions	49
References	49
4 Practical Application of Study Outcomes for Stormwater Treatment Design	51
4.1 Background	51
4.2 Practical Application I-Selecting Rainfall Events for Treatment Design	52
4.2.1 Modelling Approach	52
4.2.2 The Three-Component Model Validation	56
4.2.3 Selecting Rainfall Events in a Representative Year	57
4.2.4 Analysis of Modelling Outcomes	59
4.2.5 Summary of Findings	61
4.3 Practical Application II-Understanding Variability in Pollutants Build-up	61
4.3.1 Study Sites	62
4.3.2 Sampling and Parameters Investigated	62
4.3.3 Variability of Pollutant Build-up Parameters	64
4.3.4 Correlation Between Land Use and Pollutants Build-up	64
4.3.5 Comparing Variability in Pollutant Build-up	67
4.3.6 Summary of Findings	68
4.4 Conclusions	69
References	69

5 Implications for Engineering Practice and Identification of New Areas for Knowledge Creation.	71
5.1 Implications for Engineering Practice	71
5.1.1 Implications of the Research Study Outcomes in Relation to Rainfall Characteristics	72
5.1.2 Implications of the Research Study Outcomes in Relation to Catchment Characteristics	73
5.2 Areas for Further Knowledge Creation	75
5.2.1 Managing Stormwater as a Resource	75
5.2.2 Micropollutants in Stormwater Runoff	75
5.2.3 Operation and Maintenance of Stormwater Treatment Systems	76
References	76
Appendix A: Specialised Techniques Adopted for Data Analysis, Principal Component Analysis (PCA) and PROMETHEE and GAIA.	77
Appendix B: Hydrologic and Water Quality Modelling	83
Index	95

Role of Rainfall and Catchment Characteristics on
Urban Stormwater Quality

Liu, A.; Goonetilleke, A.; Egodawatta, P.

2015, X, 96 p. 47 illus., 21 illus. in color., Softcover

ISBN: 978-981-287-458-0
