

Contents

1	Optical Soliton Signals Propagation in Fiber Waveguides	1
1.1	Optical Soliton	1
1.2	Ring Resonators	3
	References.	7
2	MRR Systems and Soliton Communication	13
2.1	Evaluation of Soliton.	13
2.2	MRR Used to Generate Chaotic Signals	15
2.3	Resonance Bandwidth	18
2.4	Finesse	18
2.5	Free Spectral Range (FSR).	19
2.6	Quality Factor	19
2.7	Chaotic Soliton Signal Generator	20
	References.	27
3	Solitonic Signals Generation and Transmission Using MRR	31
3.1	Bifurcation and Chaos Behaviors Within the MRR	31
3.2	Chaotic Signals Generated by MRR Used in Wireless Networks Systems.	34
3.3	Up–Down-Link Frequency/Wavelength Soliton Band Generation	35
3.4	Multi Users Optical Communication Applying Multi Solitons	39
3.5	Binary to Decimal Conversion Using Dark/Bright Soliton Pulses.	40
3.6	Ultra-Short Multi Channel Soliton Pulse Generation	43
	References.	44
4	Ultra-Short Solitonic Pulses Used in Optical Communication	47
	References.	50

Optical Soliton Communication Using Ultra-Short Pulses

Sadegh Amiri, I.; Ahmad, H.

2015, IX, 51 p. 24 illus., 22 illus. in color., Softcover

ISBN: 978-981-287-557-0
