

CONTENTS

Preface	vii
1 Introduction	1
1.1 The Nature of Quality and the Role of Statistics	1
1.2 Modern Quality Philosophy and Business Practice Improvement Strategies	3
1.2.1 Modern Quality Philosophy and a Six-Step Process-Oriented Quality Assurance Cycle	4
1.2.2 The Modern Business Environment and General Business Process Improvement	7
1.2.3 Some Caveats	10
1.3 Logical Process Identification and Analysis	12
1.4 Elementary Principles of Quality Assurance Data Collection	15
1.5 Simple Statistical Graphics and Quality Assurance	19
1.6 Chapter Summary	25
1.7 Chapter 1 Exercises	25
2 Statistics and Measurement	33
2.1 Basic Concepts in Metrology and Probability Modeling of Measurement	34
2.2 Elementary One- and Two-Sample Statistical Methods and Measurement	40
2.2.1 One-Sample Methods and Measurement Error	40
2.2.2 Two-Sample Methods and Measurement Error	45

2.3	Some Intermediate Statistical Methods and Measurement	53
2.3.1	A Simple Method for Separating Process and Measurement Variation	54
2.3.2	One-Way Random Effects Models and Associated Inference	56
2.4	Gauge R&R Studies	62
2.4.1	Two-Way Random Effects Models and Gauge R&R Studies	62
2.4.2	Range-Based Estimation	65
2.4.3	ANOVA-Based Estimation	68
2.5	Simple Linear Regression and Calibration Studies	75
2.6	R&R Considerations for Go/No-Go Inspection	80
2.6.1	Some Simple Probability Modeling	81
2.6.2	Simple R&R Point Estimates for 0/1 Contexts	82
2.6.3	Confidence Limits for Comparing Call Rates for Two Operators	84
2.7	Chapter Summary	87
2.8	Chapter 2 Exercises	87
3	Process Monitoring	107
3.1	Generalities About Shewhart Control Charting	108
3.2	Shewhart Charts for Measurements/“Variables Data”	113
3.2.1	Charts for Process Location	113
3.2.2	Charts for Process Spread	119
3.2.3	What If $n = 1$?	124
3.3	Shewhart Charts for Counts/“Attributes Data”	128
3.3.1	Charts for Fraction Nonconforming	128
3.3.2	Charts for Mean Nonconformities per Unit	132
3.4	Patterns on Shewhart Charts and Special Alarm Rules	136
3.5	The Average Run Length Concept	144
3.6	Statistical Process Monitoring and Engineering Control	150
3.6.1	Discrete Time PID Control	150
3.6.2	Comparisons and Contrasts	157
3.7	Chapter Summary	160
3.8	Chapter 3 Exercises	160
4	Process Characterization and Capability Analysis	191
4.1	More Statistical Graphics for Process Characterization	192
4.1.1	Dot Plots and Stem-and-Leaf Diagrams	192
4.1.2	Quantiles and Box Plots	194
4.1.3	Q - Q Plots and Normal Probability Plots	198

4.2	Process Capability Measures and Their Estimation	207
4.3	Prediction and Tolerance Intervals	213
4.3.1	Intervals for a Normal Process	214
4.3.2	Intervals Based on Maximum and/or Minimum Sample Values	216
4.4	Probabilistic Tolerancing and Propagation of Error	220
4.5	Chapter Summary	229
4.6	Chapter 4 Exercises	230
5	Experimental Design and Analysis for Process Improvement	
	Part 1: Basics	251
5.1	One-Way Methods	252
5.1.1	The One-Way Normal Model and a Pooled Estimator of Variance	253
5.1.2	Confidence Intervals for Linear Combinations of Means	257
5.2	Two-Way Factorials	261
5.2.1	Graphical and Qualitative Analysis for Complete Two-Way Factorial Data	262
5.2.2	Defining and Estimating Effects	266
5.2.3	Fitting and Checking Simplified Models for Balanced Two-Way Factorial Data	274
5.3	2^p Factorials	279
5.3.1	Notation and Defining Effects in p -Way Factorials	280
5.3.2	Judging the Detectability of 2^p Factorial Effects in Studies with Replication	289
5.3.3	Judging the Detectability of 2^p Factorial Effects in Studies Lacking Replication	292
5.3.4	The Yates Algorithm for Computing Fitted 2^p Effects	296
5.3.5	Fitting Simplified Models for Balanced 2^p Data	297
5.4	Chapter Summary	301
5.5	Chapter 5 Exercises	302
6	Experimental Design and Analysis for Process Improvement	
	Part 2: Advanced Topics	333
6.1	2^{p-q} Fractional Factorials	334
6.1.1	Motivation and Preliminary Insights	334
6.1.2	Half-Fractions of 2^p Factorials	337
6.1.3	$1/2^q$ Fractions of 2^p Factorials	344
6.2	Response Surface Studies	354
6.2.1	Graphics for Understanding Fitted Response Functions	355

6.2.2	Using Quadratic Response Functions	362
6.2.3	Analytical Interpretation of Quadratic Response Functions	369
6.2.4	Response Optimization Strategies	372
6.3	Qualitative Considerations in Experimenting for Quality Improvement	378
6.3.1	“Classical” Issues	378
6.3.2	“Taguchi” Emphases	381
6.4	Chapter Summary	384
6.5	Chapter 6 Exercises	384
A	Tables	407
	Bibliography	421
	Index	425

Statistical Methods for Quality Assurance
Basics, Measurement, Control, Capability, and
Improvement

Vardeman, S.B.; Jobe, J.M.

2016, XIV, 437 p. 104 illus., 99 illus. in color., Softcover

ISBN: 978-0-387-79105-0
