

Contents

1	Connecting the Inner Ear to the Central Auditory System: Molecular Development and Characteristics of the Primary Auditory Neurons and Their Network	1
	Alain Dabdoub and Bernd Fritzsch	
2	Early Development of the Spiral Ganglion	11
	Lisa V. Goodrich	
3	Neurotrophic Factor Function During Ear Development: Expression Changes Define Critical Phases for Neuronal Viability	49
	Bernd Fritzsch, Jennifer Kersigo, Tian Yang, Israt Jahan and Ning Pan	
4	The Electrophysiological Signature of Spiral Ganglion Neurons	85
	Robin L. Davis and Robert A. Crozier	
5	The Ribbon Synapse Between Type I Spiral Ganglion Neurons and Inner Hair Cells	117
	Mark A. Rutherford and Tobias Moser	
6	Central Projections of Spiral Ganglion Neurons	157
	Michael A. Muniak, Catherine J. Connelly, Kirupa Suthakar, Giedre Milinkeviciute, Femi E. Ayeni and David K. Ryugo	
7	The Spiral Ganglion in an Out-of-Body Experience: A Brief History of in Vitro Studies of the Spiral Ganglion	191
	Steven H. Green, Erin M. Bailey, Jonathan C. Kopelovich and Marlan R. Hansen	

**8 Loss, Degeneration, and Preservation of the Spiral Ganglion
Neurons and Their Processes 229**
Hainan Lang

9 Stem Cells for the Replacement of Auditory Neurons. 263
Bryony A. Nayagam and Albert S.B. Edge

The Primary Auditory Neurons of the Mammalian
Cochlea

Dabdoub, A.; Fritsch, B.; Popper, A.N.; Fay, R.R. (Eds.)

2016, XIV, 286 p., Hardcover

ISBN: 978-1-4939-3030-2
