Contents

Preface . . . . . *vii*
Contributors . . . . . *xiii*

1 Suppressor Screens in Arabidopsis 1
Xin Li and Yuelin Zhang

2 Quantitative Reverse Transcription-qPCR-Based Gene Expression Analysis in Plants 9
Heithem Ben Abdallah and Petra Bauer

3 DNA-Binding Factor Target Identification by Chromatin Immunoprecipitation (ChIP) in Plants 25
David Posé and Levi Yant

4 Identification of Genes Responsible for Natural Variation in Volatile Content Using Next-Generation Sequencing Technology 37
Iraida Amaya, Jeremy Pillet, and Kevin M. Folta

5 Micro-Tom Tomato as an Alternative Plant Model System: Mutant Collection and Efficient Transformation 47
Masahito Shikata and Hiroshi Ezura

6 Culture of the Tomato Micro-Tom Cultivar in Greenhouse 57
Christophe Rothan, Daniel Just, Lucie Fernandez, Isabelle Atienza, Patricia Ballias, and Martine Lemaire-Chamley

7 Virus-Induced Gene Silencing as a Tool to Study Tomato Fruit Biochemistry 65
Elio Fantini and Giovanni Giuliano

8 A Simplified and Rapid Method for the Isolation and Transfection of Arabidopsis Leaf Mesophyll Protoplasts for Large-Scale Applications 79
Arnaldo L. Schapire and L. Maria Lois

9 Preparation of Epidermal Peels and Guard Cell Protoplasts for Cellular, Electrophysiological, and -Omics Assays of Guard Cell Function 89
Mengmeng Zhu, Byeong Wook Jeon, Sisi Geng, Yunqing Yu, Kelly Balmant, Sixue Chen, and Sarah M. Assmann

10 Application of Variable Angle Total Internal Reflection Fluorescence Microscopy to Investigate Protein Dynamics in Intact Plant Cells 123
Yinglang Wan, Yiqun Xue, Ruili Li, and Jinxing Lin

11 Immunoprecipitation of Plasma Membrane Receptor-Like Kinases for Identification of Phosphorylation Sites and Associated Proteins 133
Yasuhiro Kadota, Alberto P. Macho, and Cyril Zipfel

12 Yeast Three-Hybrid System for the Detection of Protein-Protein Interactions 145
Natsumi Maruta, Yuri Trusov, and Jose R. Botella

13 Cautions in Measuring In Vivo Interactions Using FRET and BiFC in *Nicotiana benthamiana* 155
Meral Tunc-Ozdemir, Yan Fu, and Alan M. Jones

14 Analysis of Protein–Lipid Interactions Using Purified C2 Domains 175
Jessica Pérez-Sancho, Arnaldo L. Schapire, Miguel A. Botella, and Abel Rosado

15 Assessing Kinase Activity in Plants with In-Gel Kinase Assays 189
Pengcheng Wang and Jian-Kang Zhu

16 Analyses of Plant UDP-Dependent Glycosyltransferases to Identify Their Volatile Substrates Using Recombinant Proteins 199
Yusuke Kamiyoshihara, Denise M. Tieman, and Harry J. Klee

17 Competitive Index: Mixed Infection-Based Virulence Assays for Genetic Analysis in *Pseudomonas syringae*-Plant Interactions 209
Alberto P. Macho, José S. Rufián, Javier Ruiz-Albert, and Carmen R. Beuzón

18 Simplified Assays for Evaluation of Resistance to *Alternaria brassicicola* and Turnip Mosaic Virus 219
Yuri Trusov, Ralf G. Dietzgen, Natsumi Maruta, and Jose R. Botella

19 Simultaneous Determination of Plant Hormones by GC-TOF-MS 229
José G. Vallarino and Sonia Osorio

Index *239*
