

# Contents

<b>1</b>	<b>Major Factors in Biological and Social Systems.</b>	<b>1</b>
1.1	A Common Measure of Performance	1
1.2	The Necessity of Fixed Costs	3
1.3	Lifespans of Organisms and Investment Projects	7
1.4	Uncertainty	9
1.5	Discount Rate	11
1.6	The Volume of Output, Market Size and Abundance of Resources	15
1.7	On Demand and Supply	17
1.8	Concluding Remarks	18
<b>2</b>	<b>Resource and Technology.</b>	<b>21</b>
2.1	The Importance of Natural Resources.	21
2.2	Natural Resources: Diverse Forms and Unifying Principle.	22
2.3	Living Systems: Positive Return Technologies of Utilizing Resources	23
2.4	Human Technologies and Human Societies.	26
2.4.1	The Use of Fire and Cooking	26
2.4.2	High Resource Density, Sedentary Lifestyle and Agriculture	27
2.4.3	Bronze Age, Iron Age and the Dark Age	28
2.4.4	Coal, Iron and the Industrial Revolution.	28
2.4.5	The Age of Oil: The Great Depression, Oil Crises, and the Great Recession.	29
2.5	On Inequality	31
2.6	Carbon and Hydrogen as Energy Sources	32
2.7	Some Patterns in Energy Economics	34
2.8	On the Concept of Renewable Energy	37
2.9	Concluding Remarks	39

<b>3</b>	<b>Production: A Mathematical Theory</b>	41
3.1	A Historic Review of Related Ideas and Mathematical Techniques	41
3.2	A Mathematical Theory of Production	43
3.3	Several Numerical Examples	51
3.3.1	Economy of Scale and the Law of Diminishing Return	52
3.3.2	Increasing Fixed Cost to Reduce Uncertainty	53
3.3.3	Resource Quality and Investment Patterns	54
3.4	Monetary Policies and Business Cycles	55
3.5	Equilibrium and Non-equilibrium Theory	60
3.6	Physics, Mathematics and Predictability	61
3.7	Concluding Remarks	64
<b>4</b>	<b>Languages and Cultures: An Economic Analysis</b>	67
4.1	Introduction	67
4.2	An Application to Cultural Analysis	69
4.3	The Evolutionary Patterns of Languages	71
4.4	Concluding Remarks	74
<b>5</b>	<b>The Entropy Theory of Mind</b>	75
5.1	Introduction	75
5.2	Main Properties of the Entropy Theory of Mind	78
5.3	The Concept of Entropy: A Reflection	82
5.4	An Introduction of Entropy Theory of Information	87
5.5	Learning and Psychological Patterns as Means of Reducing the Cost of Information Processing	89
5.6	Value and Bias of Judgment	93
5.7	Value of Judgment, Investors' Trading Decisions, and Expected Rate of Return of Portfolios	98
5.8	An Application to Behavioral Finance	101
5.9	Concluding Remarks	108
<b>6</b>	<b>The Entropy Theory of Value: A Mathematical Theory</b>	109
6.1	Introduction	109
6.2	Main Properties	111
6.3	Economic Value, Physical Entropy and Subjective Utility	119
6.4	The Entropy Theory of Value and Information	120
6.5	Economic Value and Social Welfare	122
6.6	Concluding Remarks	123
	<b>Epilogue: Pioneer Species and Climax Species</b>	125
	<b>Bibliography</b>	127
