Part I Supply Chain Configuration Problem and Issues

1	Configuration	3
1.1	What Is Configuration?	3
1.2	What Is a Configurable System?	4
1.2.1	System and System Design Concepts	4
1.2.2	Sources of Configuration	6
1.2.3	Impact of Public Policies on Configuration	8
1.2.4	Configuration Problems	9
1.2.5	Configuration Models	9
1.2.6	Configuration Solutions	10
1.3	Why Is a Configurable System Needed?	10
1.4	Examples and Applications of Configuration	11
1.5	Key Issues in Configuration	12
1.5.1	Coordination and Synchronization	12
1.5.2	Conflicting Objectives	12
1.5.3	Complex Network	12
1.5.4	System Variation Over Time	13
1.5.5	Push–Pull Strategies	13
1.5.6	Direct-to-Consumer	13
1.5.7	Strategic Alliance	14
1.5.8	Mass Customization	14
1.5.9	Outsourcing and Procurement Strategies	14
1.5.10	Information Technology and Decision Support Systems	14
1.5.11	Customer Value	15
	References	15

2	Scope of Supply Chain Configuration Problem	17
2.1	Introduction	17
2.2	Supply Chain and Supply Chain Management	18
2.2.1	Supply Chain Management Strategies	19
2.2.2	Supply Chain Management Processes	21
2.3	Supply Chain as a System	22
2.4	Supply Chain Management Problem Domain	23
2.4.1	Key Challenges	23
2.4.2	General Problems	26
2.4.3	Specific Problems	27
2.5	Supply Chain Configuration	28
2.6	Supply Chain Configuration Dimensions	29
2.6.1	Horizontal Extent	30
2.6.2	Vertical Extent	31
2.6.3	Objectives	32
2.6.4	Decisions	33
2.6.5	Parameters	35
2.7	Aligning Objectives	35
2.8	Summary	36
	Appendix. SCCB Case Description	37
	References	39
3	Literature Review	41
3.1	Introduction	41
3.2	The Design of the Literature Survey	42
3.2.1	Classification Criteria	43
3.2.2	Complexity Criteria	45
3.3	Detailed Review	45
3.4	Focus Areas for Supply Chain Configuration	55
3.5	Summary	62
	References	63
4	Reconfigurable Supply Chains: An Integrated Framework	69
4.1	Introduction	69
4.2	Reconfigurable Supply Chain	70
4.2.1	Need	70
4.2.2	Definition	71
4.2.3	Reconfiguration Example	73
4.2.4	Advantages and Difficulties	75
4.2.5	Requirements	77
4.3	Configuration Problems and Methods	78
4.4	Integrated Framework	81
4.4.1	Background	81
4.4.2	Model Integration Framework	82
4.5	Summary	85
	References	86

5	Methodology for Supply Chain Configuration	87
5.1	Introduction	87
5.2	Background	88
5.3	Requirements	89
5.4	Configuration Steps	91
5.5	Elaboration of Steps	92
5.5.1	Supply Chain Strategy Updating	93
5.5.2	Conceptual Modeling	97
5.5.3	Experimental Planning	98
5.5.4	Preselection	100
5.5.5	Modeling and Analysis	102
5.5.6	Decision-making	102
5.5.7	Implementation	102
5.5.8	Monitoring and Evaluation	103
5.6	Architecture of Decision Support System	103
5.7	Summary	105
	References	106

Part II Solutions

6	Knowledge Management as the Basis of Crosscutting Problem-Solving Approaches	111
6.1	Introduction	111
6.2	Crosscutting Approaches: Motivation, Focus, and Significance	113
6.2.1	Motivation and Focus	113
6.2.2	Problem Solving for Configurable Systems	114
6.2.3	Significance of This Approach	116
6.3	Taxonomy, Ontology, and System Integration	117
6.3.1	Taxonomy	117
6.3.2	Ontology	118
6.4	Knowledge Management System Development: A Proposed Framework	119
6.4.1	Taxonomy Development	119
6.5	Knowledge Management System Reference Model	122
6.6	Development of Components of Knowledge Management System	127
6.6.1	Capture	127
6.6.2	Assembly	128
6.6.3	Storage	131
6.6.4	Usage	132
6.7	Summary	133
	References	133
7	Conceptual Modeling Approaches	137
7.1	Introduction	137
7.2	Purpose	138

7.3	Modeling Views	139
7.4	Generic Model	140
7.5	Case Specific Model	144
7.5.1	Development Principles	144
7.5.2	Example	145
7.6	Model Integration	147
7.7	Summary	148
	References	149
8	Mathematical Programming Approaches	151
8.1	Introduction	151
8.2	Purpose	152
8.3	Mixed-Integer Programming Models	153
8.3.1	Generic Formulation	153
8.3.2	Modifications	157
8.3.3	Computational Issues	160
8.4	Other Mathematical Programming Models	162
8.4.1	Multi-objective Programming Models	162
8.4.2	Stochastic Programming Models	164
8.4.3	Nonlinear Programming Models	165
8.5	Sample Application	165
8.6	Model Integration	167
8.7	Summary	170
	References	170
9	Simulation Modeling and Hybrid Approaches	173
9.1	Introduction	173
9.2	Purpose	174
9.2.1	Observations	176
9.3	Development of Simulation Models	178
9.3.1	Approach	178
9.3.2	Representation of Supply Chain Entities	179
9.3.3	Model Generation	180
9.3.4	Sample Simulation Results	183
9.4	Hybrid Modeling	184
9.4.1	General Approach	185
9.4.2	Meta-Model Based Feedback	187
9.5	Summary	193
	References	194

Part III Technologies

10	Information Technology Support for Configuration	
	Problem Solving	199
10.1	Introduction	199
10.2	Requirements	200
10.3	Types of Technologies	201

10.4	Supply Chain Integration	203
10.4.1	Overviews	203
10.4.2	Decision-Modeling Components	205
10.4.3	Integration with Execution Components	207
10.5	Prototype of a Decision-Modeling System	209
10.6	Summary	211
	References	212
11	Data Integration Technologies	215
11.1	Introduction	215
11.2	Purpose	216
11.3	Approach Overview	217
11.4	Data Gathering	218
11.5	Process Composition	219
11.5.1	Selection Model	221
11.6	Experimental Studies	223
11.6.1	Problem Description	223
11.6.2	Data Gathering and QoS Evaluation	224
11.6.3	Facility Location Results	225
11.6.4	Representation of Results	226
11.7	Summary	227
	References	228
12	Mobile and Cloud Based Technologies	229
12.1	Introduction	229
12.2	Purpose	230
12.3	Cloud Chain	231
12.4	Web Service Selection Model	233
12.4.1	Physical and Internal Information Flow	233
12.4.2	Model	236
12.4.3	Experimental	238
12.5	Results	239
12.6	Summary	240
	References	241
Part IV Applications		
13	Application in Hi-Tech Electronics Industry	245
13.1	Introduction	245
13.2	Case Description	246
13.3	Scope Definition	249
13.4	Conceptual Modeling	250
13.5	Simulation Model	250
13.6	Experimental Results	255
13.7	Summary	256
	References	258

14	Application in ICT Distribution	259
14.1	Introduction	259
14.2	Case Description	260
14.3	Scope Definition	261
14.4	Conceptual Modeling	263
14.5	Optimization Model	266
14.5.1	Model Description	267
14.5.2	Experimental Evaluation	270
14.6	Summary	274
	References	275
15	Application in Health Care	277
15.1	Introduction	277
15.2	Health Care Supply Chain: The Need, Drivers, Issues, and Opportunities	278
15.2.1	Why Supply Chain Management for Health Care Industry?	278
15.2.2	Health Care Supply Chain Drivers	279
15.2.3	Integrated Supply Chain Process: Key Issues and Opportunities	280
15.3	e-Health Care Supply Chain: Business Trends, Initiatives, and Model	281
15.4	Health Care Supply Chain Example	283
15.4.1	Supply Chain Description	284
15.4.2	Experimental Evaluation	284
15.5	Conclusions	287
	References	288
16	Future Research Directions in Supply Chain Configuration Problem	289
16.1	Introduction	289
16.2	Trends and Opportunities in Supply Chain Configuration	289
16.3	Future Research Agenda	291
	References	293
	Index	295

Supply Chain Configuration

Concepts, Solutions, and Applications
