1	Preliminaries	1
1	Countable Sets	1
2	The Cantor Set	2
3	Cardinality	3
3.1	Some Examples	4
4	Cardinality of Some Infinite Cartesian Products	5
5	Orderings, the Maximal Principle, and the Axiom of Choice	7
6	Well Ordering	8
6.1	The First Uncountable	9
	Problems and Complements	10
1c	Countable Sets	10
2c	The Cantor Set	10
2.1c	A Generalized Cantor Set of Positive Measure	11
2.2c	A Generalized Cantor Set of Measure Zero	12
2.3c	Perfect Sets	13
3c	Cardinality	14
2	Topologies and Metric Spaces	17
1	Topological Spaces	17
1.1	Hausdorff and Normal Spaces	18
2	Urysohn's Lemma	19
3	The Tietze Extension Theorem	20
4	Bases, Axioms of Countability and Product Topologies	22
4.1	Product Topologies	23
5	Compact Topological Spaces	24
5.1	Sequentially Compact Topological Spaces	25
6	Compact Subsets of \mathbb{R}^N	26
7	Continuous Functions on Countably Compact Spaces	28
8	Products of Compact Spaces	28

9	Vector Spaces	30
9.1	Convex Sets.	31
9.2	Linear Maps and Isomorphisms	32
10	Topological Vector Spaces	32
10.1	Boundedness and Continuity	34
11	Linear Functionals	34
12	Finite Dimensional Topological Vector Spaces.	36
12.1	Locally Compact Spaces	36
13	Metric Spaces	37
13.1	Separation and Axioms of Countability	38
13.2	Equivalent Metrics	39
13.3	Pseudo Metrics.	40
14	Metric Vector Spaces	40
14.1	Maps Between Metric Spaces.	41
15	Spaces of Continuous Functions.	42
15.1	Spaces of Continuously Differentiable Functions.	43
15.2	Spaces of Hölder and Lipschitz Continuous Functions.	44
16	On the Structure of a Complete Metric Space	44
16.1	The Uniform Boundedness Principle	45
17	Compact and Totally Bounded Metric Spaces	46
17.1	Pre-Compact Subsets of X	48
	Problems and Complements.	48
1c	Topological Spaces	48
1.12c	Connected Spaces	49
1.19c	Separation Properties of Topological Spaces	49
4c	Bases, Axioms of Countability and Product Topologies	50
4.10c	The Box Topology	51
5c	Compact Topological Spaces	51
5.8c	The Alexandrov One-Point Compactification of $\{X; \mathcal{U}\}$ ([3])	52
7c	Continuous Functions on Countably Compact Spaces	53
7.1c	Upper-Lower Semi-continuous Functions	53
7.2c	Characterizing Lower-Semi Continuous Functions in \mathbb{R}^N	54
7.3c	On the Weierstrass-Baire Theorem	54
7.4c	On the Assumptions of Dini's Theorem	56
9c	Vector Spaces	56
9.3c	Hamel Bases	57
9.6c	On the Dimension of a Vector Space	58
10c	Topological Vector Spaces	58
13c	Metric Spaces	59
13.10c	The Hausdorff Distance of Sets	60
13.11c	Countable Products of Metric Spaces	61

14c	Metric Vector Spaces	62
15c	Spaces of Continuous Functions	63
15.1c	Spaces of Hölder and Lipschitz Continuous Functions	63
16c	On the Structure of a Complete Metric Space	63
16.3c	Completion of a Metric Space	64
16.4c	Some Consequences of the Baire Category Theorem	65
17c	Compact and Totally Bounded Metric Spaces	65
17.1c	An Application of the Lebesgue Number Lemma	66
3	Measuring Sets	67
1	Partitioning Open Subsets of \mathbb{R}^N	67
2	Limits of Sets, Characteristic Functions, and σ -Algebras	68
3	Measures	70
3.1	Finite, σ -Finite, and Complete Measures	72
3.2	Some Examples	73
4	Outer Measures and Sequential Coverings	73
4.1	The Lebesgue Outer Measure in \mathbb{R}^N	74
4.2	The Lebesgue–Stieltjes Outer Measure [89, 154].	75
5	The Hausdorff Outer Measure in \mathbb{R}^N [71]	75
5.1	Metric Outer Measures	77
6	Constructing Measures from Outer Measures [26]	78
7	The Lebesgue–Stieltjes Measure on \mathbb{R}	80
7.1	Borel Measures.	81
8	The Hausdorff Measure on \mathbb{R}^N	81
9	Extending Measures from Semi-algebras to σ -Algebras.	83
9.1	On the Lebesgue–Stieltjes and Hausdorff Measures.	85
10	Necessary and Sufficient Conditions for Measurability	85
11	More on Extensions from Semi-algebras to σ -Algebras.	86
12	The Lebesgue Measure of Sets in \mathbb{R}^N	87
12.1	A Necessary and Sufficient Condition of Measurability	88
13	Vitali’s Nonmeasurable Set [168].	90
14	Borel Sets, Measurable Sets, and Incomplete Measures.	91
14.1	A Continuous Increasing Function $f : [0, 1] \rightarrow [0, 1]$	91
14.2	On the Preimage of a Measurable Set	93
14.3	Proof of Propositions 14.1 and 14.2	94
15	Borel Measures	94
16	Borel, Regular, and Radon Measures	96
16.1	Regular Borel Measures.	97
16.2	Radon Measures	98
17	Vitali Coverings.	98
18	The Besicovitch Covering Theorem	101
19	Proof of Proposition 18.1	104
20	The Besicovitch Measure-Theoretical Covering Theorem	106

Problems and Complements	108
1c Partitioning Open Subsets of \mathbb{R}^N	108
2c Limits of Sets, Characteristic Functions and σ -Algebras	108
3c Measures	109
3.1c Completion of a Measure Space	111
4c Outer Measures	112
5c The Hausdorff Outer Measure in \mathbb{R}^N	112
5.1c The Hausdorff Dimension of a Set $E \subset \mathbb{R}^N$	112
5.2c The Hausdorff Dimension of the Cantor Set is $\ln 2/\ln 3$	113
8c The Hausdorff Measure in \mathbb{R}^N	114
8.1c Hausdorff Outer Measure of the Lipschitz Image of a Set	114
8.2c Hausdorff Dimension of Graphs of Lipschitz Functions	115
9c Extending Measures from Semi-algebras to σ -Algebras	115
9.1c Inner and Outer Continuity of λ on Some Algebra \mathcal{Q}	115
10c More on Extensions from Semi-algebras to σ -Algebras	116
10.1c Self-extensions of Measures	116
10.2c Nonunique Extensions of Measures λ on Semi-algebras	117
12c The Lebesgue Measure of Sets in \mathbb{R}^N	118
12.1c Inner Measure and Measurability	120
12.2c The Peano–Jordan Measure of Bounded Sets in \mathbb{R}^N	120
12.3c Lipschitz Functions and Measurability	121
13c Vitali’s Nonmeasurable Set	122
14c Borel Sets, Measurable Sets and Incomplete Measures	123
16c Borel, Regular and Radon Measures	124
16.1c Regular Borel Measures	124
16.2c Regular Outer Measures	124
17c Vitali Coverings	125
17.1c Pointwise and Measure-Theoretical Vitali Coverings	125
18c The Besicovitch Covering Theorem	126
18.1c The Besicovitch Theorem for Unbounded E	126
18.2c The Besicovitch Measure-Theoretical Inner Covering of Open Sets $E \subset \mathbb{R}^N$	127
18.3c A Simpler Form of the Besicovitch Theorem	127
18.4c Another Besicovitch-Type Covering	130
4 The Lebesgue Integral	133
1 Measurable Functions	133
2 The Egorov–Severini Theorem [39, 145].	135
2.1 The Egorov–Severini Theorem in \mathbb{R}^N	137
3 Approximating Measurable Functions by Simple Functions	137

4	Convergence in Measure (Riesz [125], Fisher [46])	139
5	Quasicontinuous Functions and Lusin's Theorem	141
6	Integral of Simple Functions ([87])	143
7	The Lebesgue Integral of Nonnegative Functions	144
8	Fatou's Lemma and the Monotone Convergence Theorem.	145
9	More on the Lebesgue Integral	147
10	Convergence Theorems.	149
11	Absolute Continuity of the Integral.	150
12	Product of Measures.	151
13	On the Structure of $(\mathcal{A} \times \mathcal{B})$	152
14	The Theorem of Fubini–Tonelli	155
14.1	The Tonelli Version of the Fubini Theorem	156
15	Some Applications of the Fubini–Tonelli Theorem.	157
15.1	Integrals in Terms of Distribution Functions.	157
15.2	Convolution Integrals	158
15.3	The Marcinkiewicz Integral ([101, 102])	160
16	Signed Measures and the Hahn Decomposition	161
17	The Radon–Nikodým Theorem.	163
17.1	Sublevel Sets of a Measurable Function.	164
17.2	Proof of the Radon–Nikodým Theorem	165
18	Decomposing Measures	167
18.1	The Jordan Decomposition.	168
18.2	The Lebesgue Decomposition.	168
18.3	A General Version of the Radon–Nikodým Theorem	169
	Problems and Complements.	170
1c	Measurable Functions	170
1.1c	Sublevel Sets	172
2c	The Egorov–Severini Theorem	173
3c	Approximating Measurable Functions by Simple Functions	173
4c	Convergence in Measure	174
7c	The Lebesgue Integral of Nonnegative Measurable Functions	175
7.1c	Comparing the Lebesgue Integral with the Peano–Jordan Integral	175
7.2c	On the Definition of the Lebesgue Integral	176
9c	More on the Lebesgue Integral	177
10c	Convergence Theorems	178
10.1c	Another Version of Dominated Convergence	178
11c	Absolute Continuity of the Integral	181
12c	Product of Measures	182
12.1c	Product of a Finite Sequence of Measure Spaces	182
13c	On the Structure of $(\mathcal{A} \times \mathcal{B})$	183
13.1c	Sections and Their Measure	184
14c	The Theorem of Fubini–Tonelli	185

15c	Some Applications of the Fubini–Tonelli Theorem	186
15.1c	Integral of a Function as the “Area Under the Graph”	186
15.2c	Distribution Functions	186
17c	The Radon-Nikodým Theorem	187
18c	A Proof of the Radon-Nikodým Theorem When Both μ and ν Are σ -Finite	189
5	Topics on Measurable Functions of Real Variables.	193
1	Functions of Bounded Variation ([78])	193
2	Dini Derivatives ([37])	195
3	Differentiating Functions of Bounded Variation	197
4	Differentiating Series of Monotone Functions	198
5	Absolutely Continuous Functions ([91, 169])	199
6	Density of a Measurable Set	201
7	Derivatives of Integrals	202
8	Differentiating Radon Measures	204
9	Existence and Measurability of $D_\mu \nu$	206
9.1	Proof of Proposition 9.2	208
10	Representing $D_\mu \nu$	208
10.1	Representing $D_\mu \nu$ for $\nu \ll \mu$	208
10.2	Representing $D_\mu \nu$ for $\nu \perp \mu$	210
11	The Lebesgue-Besicovitch Differentiation Theorem	210
11.1	Points of Density	211
11.2	Lebesgue Points of an Integrable Function	211
12	Regular Families	212
13	Convex Functions	213
14	The Jensen’s Inequality	215
15	Extending Continuous Functions	216
15.1	The Concave Modulus of Continuity of f	216
16	The Weierstrass Approximation Theorem	218
17	The Stone-Weierstrass Theorem	219
18	Proof of the Stone-Weierstrass Theorem	220
18.1	Proof of Stone’s Theorem	221
19	The Ascoli-Arzelà Theorem	222
19.1	Pre-compact Subsets of $C(\bar{E})$	223
	Problems and Complements	224
1c	Functions of Bounded Variations	224
1.1c	The Function of The Jumps	225
1.2c	The Space $BV[a, b]$	225
2c	Dini Derivatives	226
2.1c	A Continuous, Nowhere Differentiable Function ([167])	228
2.2c	An Application of the Baire Category Theorem	229

4c	Differentiating Series of Monotone Functions	229
5c	Absolutely Continuous Functions	229
5.1c	The Cantor Ternary Function ([23])	230
5.2c	A Continuous Strictly Monotone Function with a.e. Zero Derivative	231
5.3c	Absolute Continuity of the Distribution Function of a Measurable Function	233
7c	Derivatives of Integrals	234
7.1c	Characterizing $BV[a, b]$ Functions	236
7.2c	Functions of Bounded Variation in N Dimensions [55]	238
13c	Convex Functions	239
13.8c	Convex Functions in \mathbb{R}^N	240
13.14c	The Legendre Transform ([92])	241
13.15c	Finiteness and Coercivity	241
13.16c	The Young's Inequality	242
14c	Jensen's Inequality	243
14.1c	The Inequality of the Geometric and Arithmetic Mean	243
14.2c	Integrals and Their Reciprocals	243
15c	Extending Continuous Functions	244
16c	The Weierstrass Approximation Theorem	244
17c	The Stone-Weierstrass Theorem	244
19c	A General Version of the Ascoli-Arzelà Theorem	245
6	The L^p Spaces	247
1	Functions in $L^p(E)$ and Their Norm	247
2	The Hölder and Minkowski Inequalities	248
3	More on the Spaces L^p and Their Norm	250
3.1	Characterizing the Norm $\ f\ _p$ for $1 \leq p < \infty$	250
3.2	The Norm $\ \cdot\ _\infty$ for E of Finite Measure	250
3.3	The Continuous Version of the Minkowski Inequality.	251
4	$L^p(E)$ for $1 \leq p \leq \infty$ as Normed Spaces of Equivalence Classes	252
4.1	$L^p(E)$ for $1 \leq p \leq \infty$ as a Metric Topological Vector Space	253

9	A Topology for $C_o^\infty(K)$ for a Compact Set $K \subset E$	391
9.1	$\mathcal{D}(K)$ Is Complete.	391
9.2	Relating the Topology of $D(E)$ to the Topology of $\mathcal{D}(K)$	392
10	The Schwartz Topology of $\mathcal{D}(E)$	392

11	$\mathcal{D}(E)$ Is Complete	393
11.1	Cauchy Sequences in $\mathcal{D}(E)$ and Completeness	394
11.2	The Topology of $\mathcal{D}(E)$ Is Not Metrizable	394
12	Continuous Maps and Functionals	395
12.1	Distributions in E	395
12.2	Continuous Linear Maps $T : \mathcal{D}(E) \rightarrow \mathcal{D}(E)$	396
13	Distributional Derivatives	396
14	Fundamental Solutions	398
14.1	The Fundamental Solution of the Wave Operator in \mathbb{R}^2	399
14.2	The Fundamental Solution of the Laplace Operator	400
15	Weak Derivatives and Main Properties	401
16	Domains and Their Boundaries	403
16.1	∂E of Class C^1	403
16.2	Positive Geometric Density and ∂E Piecewise Smooth	404
16.3	The Segment Property	404
16.4	The Cone Property	405
16.5	On the Various Properties of ∂E	405
17	More on Smooth Approximations	405
18	Extensions into \mathbb{R}^N	407
19	The Chain Rule	409
20	Steklov Averagings	410
20.1	Characterizing $W^{1,p}(E)$ for $1 < p < \infty$	412
20.2	Remarks on $W^{1,\infty}(E)$	413
21	The Rademacher's Theorem	413
	Problems and Complements	413
1c	Bounded Linear Functionals on $C_o(\mathbb{R}^N; \mathbb{R}^m)$	415
2c	Convergence of Measures	416
3c	Calculus with Distributions	418
4c	Limits in \mathcal{D}'	421
5c	Algebraic Equations in \mathcal{D}'	424
6c	Differential Equations in \mathcal{D}'	426
7c	Miscellaneous Problems	428
9	Topics on Integrable Functions of Real Variables	431
1	A Vitali-Type Covering	431
2	The Maximal Function (Hardy–Littlewood [69] and Wiener [175])	433
3	Strong L^p Estimates for the Maximal Function	435
3.1	Estimates of Weak and Strong Type	436
4	The Calderón–Zygmund Decomposition Theorem [20]	437

5	Functions of Bounded Mean Oscillation	438
5.1	Some Consequences of the John–Nirenberg Theorem	439
6	Proof of the John–Nirenberg Theorem 5.1	441
7	The Sharp Maximal Function	444
8	Proof of the Fefferman–Stein Theorem	445
9	The Marcinkiewicz Interpolation Theorem	447
9.1	Quasi-linear Maps and Interpolation	448
10	Proof of the Marcinkiewicz Theorem	449
11	Rearranging the Values of a Function	451
12	Some Integral Inequalities for Rearrangements	453
12.1	Contracting Properties of Symmetric Rearrangements	454
12.2	Testing for Measurable Sets E Such that $= E^*$ a.e. in \mathbb{R}^N	455
13	The Riesz Rearrangement Inequality	457
13.1	Reduction to Characteristic Functions of Bounded Sets	457
14	Proof of (13.1) for $N = 1$	458
14.1	Reduction to Finite Union of Intervals	458
14.2	Proof of (13.1) for $N = 1$. The Case $T + S \leq R$	460
14.3	Proof of (13.1) for $N = 1$. The Case $S + T > R$	461
14.4	Proof of the Lemma 14.1	463
15	The Hardy’s Inequality	463
16	The Hardy–Littlewood–Sobolev Inequality for $N = 1$	465
16.1	Some Reductions	466
17	Proof of Theorem 16.1	466
18	The Hardy–Littlewood–Sobolev Inequality for $N \geq 1$	468
18.1	Proof of Theorem 18.1	468
19	Potential Estimates	469
20	L^p Estimates of Riesz Potentials	470
20.1	Motivating L^p Estimates of Riesz Potentials as Embeddings	471
21	L^p Estimates of Riesz Potentials for $p = 1$ and $p > N$	472
22	The Limiting Case $p = N$	473
23	Steiner Symmetrization of a Set $E \subset \mathbb{R}^N$	475
24	Some Consequences of Steiner’s Symmetrization	477
24.1	Symmetrizing a Set About the Origin	477
24.2	The Isodiametric Inequality	478
24.3	Steiner Rearrangement of a Function	479
25	Proof of the Riesz Rearrangement Inequality for $N = 2$	479
25.1	The Limit of $\{F_n\}$	481
25.2	The Set F_* Is the Disc F^*	483
26	Proof of the Riesz Rearrangement Inequality for $N > 2$	484

Problems and Complements.	485
11c Rearranging the Values of a Function	485
12c Some Integral Inequalities for Rearrangements	486
20c L^p Estimates of Riesz Potentials	486
21c L^p Estimates of Riesz Potentials for $p = 1$ and $p \geq N$	487
22c The Limiting Case $p = \frac{N}{\alpha}$	487
23c Some Consequences of Steiner's Symmetrization	488
23.1c Applications of the Isodiametric Inequality	488
10 Embeddings of $W^{1,p}(E)$ into $L^q(E)$	491
1 Multiplicative Embeddings of $W^{1,p}_o(E)$	491
1.1 Proof of Theorem 1.1	493
2 Proof of Theorem 1.1 for $N = 1$	493
3 Proof of Theorem 1.1 for $1 \leq p < N$	494
4 Proof of Theorem 1.1 for $1 \leq p < N$ Concluded	496
5 Proof of Theorem 1.1 for $p \geq N > 1$	496
5.1 Estimate of $I_1(x, R)$	497
5.2 Estimate of $I_2(x, R)$	498
6 Proof of Theorem 1.1 for $p \geq N > 1$ Concluded.	498
7 On the Limiting Case $p = N$	499
8 Embeddings of $W^{1,p}(E)$	500
9 Proof of Theorem 8.1	501
10 Poincaré Inequalities.	503
10.1 The Poincaré Inequality	504
10.2 Multiplicative Poincaré Inequalities	505
10.3 Extensions of $(u - u_E)$ for Convex E	506
11 Level Sets Inequalities	507
12 Morrey Spaces [110]	508
12.1 Embeddings for Functions in the Morrey Spaces.	509
13 Limiting Embedding of $W^{1,N}(E)$	510
14 Compact Embeddings.	512
15 Fractional Sobolev Spaces in \mathbb{R}^N	514
16 Traces	516
17 Traces and Fractional Sobolev Spaces.	518
18 Traces on ∂E of Functions in $W^{1,p}(E)$	519
18.1 Traces and Fractional Sobolev Spaces	521
19 Multiplicative Embeddings of $W^{1,p}(E)$	522
20 Proof of Theorem 19.1. A Special Case	524
21 Constructing a Map Between E and Q . Part I	526
21.1 Case 1. Σ_n Intersects B_ρ	527
21.2 Case 2. Σ_n Does not Intersect B_ρ	528
22 Constructing a Map Between E and Q . Part II.	528
23 Proof of Theorem 19.1 Concluded	530
24 The Spaces $W^{1,p}_p(E)$	530

Problems and Complements.	534
1c Multiplicative Embeddings of $W_o^{1,p}(E)$	534
8c Embeddings of $W^{1,p}(E)$	534
8.1c Differentiability of Functions in $W^{1,p}(E)$ for $p \geq N$. . .	535
14c Compact Embeddings	536
17c Traces and Fractional Sobolev Spaces	536
17.1c Characterizing Functions in $W^{1-\frac{1}{p},p}(\mathbb{R}^N)$ as Traces . . .	536
18c Traces on ∂E of Functions in $W^{1,p}(E)$	538
18.1c Traces on a Sphere	538
11 Topics on Weakly Differentiable Functions	541
1 Sard's Lemma [140].	541
2 The Co-area Formula for Smooth Functions	544
3 The Isoperimetric Inequality for Bounded Sets E with Smooth Boundary ∂E	545
3.1 Embeddings of $W_o^{1,p}(E)$ Versus the Isoperimetric Inequality.	546
4 The p -Capacity of a Compact Set $K \subset \mathbb{R}^N$, for $1 \leq P < N$	547
4.1 Enlarging the Class of Competing Functions	548
5 A Characterization of the p -Capacity of a Compact Set $K \subset \mathbb{R}^N$, for $1 \leq P < N$	550
6 Lower Estimates of $c_p(K)$ for $1 \leq P < N$	552
6.1 A Simpler Proof of Lemma 6.1 with a Coarser Constant	553
6.2 p -Capacity of a Closed Ball $\bar{B}_\rho \subset \mathbb{R}^N$, for $1 \leq p < N$. . .	554
6.3 $c_p(\bar{B}_\rho) = c_p(\partial B_\rho)$	555
7 The Norm $\ Du\ _p$, for $1 \leq P < N$, in Terms of the p -Capacity Distribution Function of $u \in C_o^\infty(\mathbb{R}^N)$	555
7.1 Some Auxiliary Estimates for $1 < p < N$	555
7.2 Proof of Theorem 7.1	557
8 Relating Gagliardo Embeddings, Capacities, and the Isoperimetric Inequality	558
9 Relating $\mathcal{H}^{N-p}(K)$ to $c_p(K)$ for $1 < p < N$	559
9.1 An Auxiliary Proposition.	559
9.2 Proof of Theorem 9.1	561
10 Relating $c_p(K)$ to $\mathcal{H}^{N-p+\varepsilon}(K)$ for $1 \leq p < N$	562
11 The p -Capacity of a Set $E \subset \mathbb{R}^N$ for $1 \leq P < N$	563
12 Limits of Sets and Their Outer p -Capacities	566
13 Capacitable Sets.	567
14 Capacities Revisited and p -Capacitability of Borel Sets.	570
14.1 The Borel Sets in \mathbb{R}^N Are p -Capacitable	571
14.2 Generating Measures by p -Capacities	572
15 Precise Representatives of Functions in $L_{loc}^1(\mathbb{R}^N)$	572

16	Estimating the p -Capacity of $[u > t]$ for $t > 0$	574
17	Precise Representatives of Functions in $W^{1,p}_{\text{loc}}(\mathbb{R}^N)$	576
17.1	Quasi-Continuous Representatives of Functions $u \in W^{1,p}_{\text{loc}}(\mathbb{R}^N)$	578
