1	Introduction.	1
	References	4
2	Methodology of Lithium Analytical Chemistry and Isotopic Measurements.	5
2.1	Historical Perspective	5
2.2	Lithium Isolation by Cation Exchange Chromatography	6
2.3	Methodology of Li Isotopic Measurements	8
2.3.1	Mass Spectrometry-Based Methods of Widest Use	9
2.3.2	“Other” Analytical Methods	13
	References	14
3	Cosmochemistry of Lithium	19
3.1	Cosmology of Lithium: Big Bang Nucleosynthesis, Evolution of the Universe, and Stellar Processes	19
3.1.1	The Earliest History and Further Evolution of Lithium	19
3.1.2	The Vicinity of the Solar System	23
3.1.3	Searching for Exoplanets with Lithium	25
3.2	Cosmochemistry of Lithium in Meteorites	26
3.2.1	Lithium in Bulk Chondritic Meteorites	27
3.2.2	Lithium Distribution and Isotopic Systematics in Constituents of Chondritic Meteorites	30
3.2.3	Lithium in Other Meteorites	31
3.3	Cosmochemistry of Lithium in Planetary Bodies	31
3.3.1	Lithium in Earth’s Moon	32
3.3.2	Lithium in Mars	35
3.3.3	Lithium in Vesta	38
	References	40
4	Li Partitioning, Diffusion and Associated Isotopic Fractionation: Theoretical and Experimental Insights	47
4.1	Introduction.	47
4.2	Equilibrium Partitioning Behavior of Li	49
4.2.1	Thermodynamic Background	49
4.2.2	Lattice Strain Model for Element Partitioning	49
4.2.3	Mineral-Melt Partitioning	52

4.2.4	Mineral-Fluid Partitioning and Associated Stable Isotopic Fractionation	67
4.2.5	Inter-mineral Partitioning	76
4.3	Diffusion of Li and Associated Effects on $\delta^7\text{Li}$	80
4.3.1	Theoretical Background	80
4.3.2	Experimental Diffusion Coefficients	83
4.3.3	Characteristic Time Scales of Li Diffusion in Silicates (Ol, Cpx, Pl).	91
4.3.4	Two Diffusion Mechanisms of Li in Silicates	93
4.3.5	Bulk Diffusion of Li Through Rocks and Characteristic Length Scales	97
4.4	Fluid-Rock Interaction	98
4.4.1	Weathering of Igneous Rocks (Predominantly Basaltic Compositions).	99
4.4.2	Weathering of Olivine (Serpentinization).	109
4.4.3	Alteration of Sediments	110
4.4.4	Synopsis	111
	References	112
5	Lithium in the Deep Earth: Mantle and Crustal Systems . . .	119
5.1	Lithium in the Mantle.	119
5.1.1	Mantle Xenoliths and Related Samples	119
5.1.2	Mantle-Derived Magmas.	128
5.2	Lithium in the Continental Crust	141
5.2.1	Products of Crustal Melting.	141
5.2.2	Crustal Metamorphism and Fluid Flow	146
	References	149
6	The Surficial Realm: Low Temperature Geochemistry of Lithium	157
6.1	Meteoric Water	157
6.2	Groundwater and Pore Waters	158
6.2.1	Shallow Groundwaters	158
6.2.2	Deep Groundwaters	159
6.2.3	Pore Waters	161
6.3	Continental Weathering.	162
6.3.1	Soils and Sediments	163
6.3.2	Sedimentary Rocks	167
6.3.3	Lakes and Rivers: Dissolved Loads	168
6.4	Hydrothermal Systems	171
6.4.1	Rocks in Sea Floor Hydrothermal Systems	171
6.4.2	Fluids in Sea Floor Hydrothermal Systems	173
6.4.3	Continental Geothermal Systems	174
6.5	Marine Geochemistry of Li	176
6.5.1	The Marine Li Cycle	176
6.5.2	Secular Variation of Li in Seawater	177

6.6	Biological and Anthropogenic Li Isotopic Fractionation	181
6.6.1	Lithium in Plants and Animals	181
6.6.2	Tracer Applications in Water Treatment and Agriculture	183
6.6.3	Nuclear Forensics	184
	References	184
7	Summation: What Have We Learned and Where Can We Go?	191
7.1	Retrospective	191
7.2	Analytical Prospects	194
7.3	Final Words	194
	References	194

Advances in Lithium Isotope Geochemistry

Tomascak, P.B.; Magna, T.; Dohmen, R.

2016, XI, 195 p. 51 illus., 16 illus. in color., Hardcover

ISBN: 978-3-319-01429-6
