

Contents

1	Introduction	1
1.1	Why are Rural Electrification Programmes Needed?	2
1.2	The Nexus Between Poverty and Lack of Access to Electricity	3
1.3	Rural Electrification Rates.	5
1.4	Rural Electrification Strategies.	6
1.5	Dimensions of Electricity Access.	9
1.6	Electrification Using Renewable Energy Technologies	10
1.7	Why is a Rural Electrification Road Map Needed?	11
1.7.1	Successful Versus Sustainable	13
1.7.2	Target Groups of Rural Electrification Programmes	13
1.8	Outline of the Book	14
	References	15
2	Solar Home Systems—A Description of the Technology and Its Applications.	17
2.1	Set-up of a Solar Home System.	17
2.2	PV Modules and Arrays	17
2.3	Energy Storage of the Solar Home System	20
2.3.1	Lead–Acid Batteries.	23
2.3.2	Lithium-Ion Batteries	31
2.4	Battery Charge Controllers	32
2.4.1	Maximum Power Point Tracking	32
2.4.2	Miscellaneous Requirements of Battery Charge Controllers	33
2.5	DC–DC Converters	34
2.6	Balance-of-System Components.	34
2.7	Inverters	35
2.8	Appliances for Use in Solar Home Systems	37
2.9	Operation and Maintenance.	37

2.10	Sizing of Solar Home Systems	38
2.10.1	Determination of the Energy Demand.	40
2.10.2	PV Modules Sizing	41
2.10.3	Battery Sizing	42
2.10.4	Battery Charge Controller Sizing	43
2.11	Standards for Solar Home Systems	43
2.12	The Market Chain and Key-Stakeholders for Solar Home Systems	44
2.13	Summary	46
	References	47
3	Overview of Financing Mechanisms for Solar Home Systems in Developing Countries.	49
3.1	The Cost of SHSs	49
3.2	Why is Financing Important for SHS Programmes?	50
3.3	Types of Financing Mechanisms	52
3.3.1	Cash Sales	52
3.3.2	Subsidies	55
3.3.3	Direct Subsidy.	56
3.3.4	Fee-for-Service	60
3.3.5	Credit Sales	63
3.4	Strength, Weakness, Opportunity and Threat	70
3.4.1	Cash Sales	70
3.4.2	Subsidised Sales	70
3.4.3	End-User Credit.	71
3.4.4	Hire Purchase Model	71
3.4.5	Microfinance.	72
3.5	Summary	75
	References	75
4	Success and Sustainability Criteria and Issues for SHS Programmes	79
4.1	Status of Solar Electrification Programme in Asia, Pacific and African Countries	80
4.1.1	Status of Solar Electrification in Asia and the Pacific.	81
4.1.2	Status of Solar Electrification in Africa.	85
4.2	Lessons Learned from Solar PV Electrification Programmes	87
4.3	Solar PV Programme Success Factors	89
4.3.1	Programme Success Criteria and Its Indicators for Solar PV Programmes	96
4.4	Challenges for Success Measurement and Weighting the Success Factors	100
4.5	Summary	103
	References	103

5	Programme Evaluation	109
5.1	Bangladesh	110
5.1.1	Demographic and Socio-Economic Information	110
5.1.2	Energy Situation and Electricity Access	115
5.1.3	RE Resource Availability	119
5.1.4	The Solar PV Programme in Bangladesh	120
5.1.5	IDCOL Solar Programme	122
5.1.6	Evaluation of IDCOL Programme	129
5.1.7	Summary of Findings	143
5.1.8	Programme Evaluation	144
5.2	Fiji	148
5.2.1	Demographic and Socio-Economic Information	148
5.2.2	Energy Situation and Electricity Access	151
5.2.3	RE Resource Availability	154
5.2.4	The Fijian SHS Programme	157
5.2.5	Evaluation of Fijian SHS Programme	160
5.2.6	Programme Delivery and Implementation Mechanism	167
5.2.7	Summary of Findings	174
5.2.8	Programme Evaluation	177
5.3	Uganda Cash Sales	178
5.3.1	Demographic and Socio-Economic Information	179
5.3.2	Energy Situation and Electricity Access	182
5.3.3	Renewable Energy Resource Availability	184
5.3.4	Solar PV Programme in Uganda	187
5.3.5	Cash Sales Implementation of SHSs in Ndejje	188
	References	201
6	Framework for Successful Implementation of SHS Programme	207
6.1	Proposed Road map for Solar Electrification Programme	207
6.2	About this Road map	208
6.3	Planning and Enabling Environment	210
6.3.1	Setting an Overall Goal	211
6.3.2	Need Assessment	212
6.4	Resources Assessment	212
6.4.1	Existing Infrastructure and Distance from the Grid Electricity and Nearest Institutes	213
6.4.2	Energy Policies in the Country and Programmes Available in the Target Area	213
6.4.3	Probable Stakeholder Selection	214
6.5	Analysis of Context	214
6.5.1	Target Area Selection	214
6.5.2	Social and Economic Context Assessment	215

6.5.3	Community Participation	216
6.5.4	Define Stakeholders' Role.	216
6.5.5	Example of Information Need to Be Collected for Context Analysis	217
6.6	Design of the Project	218
6.6.1	Setting Specific Goals, Objectives and Strategies	219
6.6.2	Involve Stakeholders in Programme Design Process	220
6.6.3	Technical and Institutional Design	220
6.6.4	Development of a Quality Control and Standardisation Procedure	222
6.6.5	Development of Training Programmes for Users and Local Technicians	223
6.6.6	Roll-out of an Awareness Development Programme	224
6.7	Implementing Project	225
6.7.1	Setting up Local Offices	226
6.7.2	Conducting Awareness Development Programmes	227
6.7.3	Developing Reliable Procurement Systems	227
6.7.4	Maintaining Good Installation Practices	227
6.7.5	Developing Regular Maintenance Schedules	228
6.7.6	Providing Quality After-Sales Services	229
6.7.7	Providing Users and Technicians with Training	229
6.7.8	Monitoring and Evaluation (The Feedback Loop).	230
6.8	Monitoring	231
6.8.1	Evaluation.	233
6.9	Summary	234
	Appendix 1: Some Training Manual Available Online	235
	Appendix 2	235
	References	236
7	Choosing the Right Path	237
7.1	Summary	237
7.2	Key Issues	238
7.3	Stages of SHS Project	239
7.4	Prioritisation	240
7.5	How to Use This Book—The Way Forward	241
7.6	A Final Word of Advice.	243

Photovoltaics for Rural Electrification in Developing
Countries

A Road Map

Urmee, T.; Harries, D.; Holtorf, H.-G.

2016, XII, 244 p. 85 illus., 69 illus. in color., Hardcover

ISBN: 978-3-319-03788-2
