

Contents

1	Introduction and Overview	1
1.1	Action and Movement as a Theme in Psychological Research	1
1.2	Deficits in Theory and Research	2
1.2.1	Sensorimotor Approach	2
1.2.2	Ideomotor Approach	4
1.2.3	Interplay of Perception and Action	5
1.2.4	Homunculi.....	6
1.3	An Organizing Working Model	7
	References.....	8
2	Neurobiological Foundations of Action Planning and Execution.....	11
2.1	Neuronal Communication.....	13
2.2	Primary Motor Cortex and Lateral Premotor Cortex (BA4/6).....	19
2.2.1	Motor Homunculus	20
2.3	Supplementary Motor Area (BA6 Medial)	26
2.3.1	Role of the SMA in the Sequencing of Action Elements	26
2.3.2	Role of the SMA in the Integration of Actions.....	26
2.4	Cerebellum.....	32
2.4.1	Consequences of Damage to the Cerebellum	33
2.4.2	Cognitive Functions of the Cerebellum	33
2.5	Basal Ganglia.....	37
2.5.1	Consequences of Damage to the Basal Ganglia	38
2.5.2	Cognitive Functions of the Basal Ganglia	38
2.6	Prefrontal Cortex.....	39
2.6.1	Dorsolateral Prefrontal Cortex (BA9/46).....	40
2.6.2	Orbitofrontal Cortex (BA10-14/47)	41
2.6.3	Anterior Cingulate Cortex (BA24).....	42
	References.....	42
3	Intentions and Action Goals.....	47
3.1	Function of Action Goals.....	47
3.1.1	Action Goal as Context.....	48

3.1.2	Role of the Prefrontal Cortex	50
3.1.3	Control as a Specification of Control Parameters	51
3.1.4	Action Goal as a Global Mediator	54
3.2	Representation of Action Goals	57
3.2.1	The Role of Consciousness	57
3.2.2	Format of Goal Representations	61
3.3	Acquisition of Action Goals	66
3.4	Intraindividual Dynamics and Interindividual Differences.....	70
	References.....	71
4	Perception and Action	75
4.1	Dissociations of Perception and Action.....	76
4.1.1	Sensorimotor Adaptation and Sensorimotor Learning	76
4.1.2	Pathways of Visual Information Processing	79
4.2	Interactions Between Perception and Action.....	87
4.2.1	The Impact of Stimulus Processing on Action Control	87
4.2.2	The Impact of Action Control on Stimulus Processing	90
4.3	Integration of Perception and Action.....	94
4.3.1	Theory of Event Coding.....	96
4.3.2	Empirical Implications of the Theory of Event Coding.....	99
	References.....	105
5	Action Selection	109
5.1	Goal-Induced Action Selection.....	110
5.2	Rule-Based Action Selection	112
5.2.1	Number of Action Alternatives.....	114
5.2.2	Stimulus-Response Compatibility	117
5.2.3	Repetition.....	118
5.2.4	Practice.....	119
5.3	Automatic Selection of Actions	120
5.4	Intuitive Action Selection	122
	References.....	126
6	Action Planning.....	129
6.1	Characteristics and Functions of Action Plans	129
6.1.1	Independence from Sensory Feedback	130
6.1.2	Anticipation of Future Action Elements	130
6.1.3	Complexity Effects	132
6.2	The Structure of Action Plans.....	133
6.2.1	Online and Offline Control	133
6.2.2	Parameters and Features.....	135
6.3	Programming an Action.....	136
6.3.1	Action Preparation with a Constant Number of Action Alternatives	137
6.3.2	Motor Priming.....	138
6.3.3	Invariants and Variables	138

6.4	Integration of Action Features	140
6.4.1	Integration Mechanisms of Action Planning	141
6.4.2	Effects of Action Integration.....	142
	References.....	143
7	Sequential-Action Planning.....	147
7.1	Programming Action Sequences.....	148
7.1.1	Independence from Sensory Feedback	148
7.1.2	Anticipation Effects and Sequence Errors	150
7.1.3	Complexity Effects	151
7.2	Sequencing Action Elements	152
7.2.1	Chaining Action Elements	153
7.2.2	Integrating Action Elements	156
7.2.3	Hierarchical Control.....	157
7.3	Planning Extended and Practiced Action Sequences.....	161
7.3.1	Sequence Length.....	162
7.3.2	Movement Duration	163
7.3.3	Practice.....	163
	References.....	164
8	Controlling and Coordinating Multiple Actions.....	167
8.1	Task Switching	168
8.1.1	Theoretical Considerations and Overview	168
8.1.2	Task Coordination	171
8.1.3	Switching Between Goal Representations	174
8.1.4	Proactive Interference	176
8.1.5	Stimulus-Driven Goal Activation.....	178
8.2	Multitasking	180
8.2.1	Task Coordination and Resource Allocation	181
8.2.2	Working Memory	186
8.2.3	Stimulus-Response Translation and Response Selection.....	187
8.2.4	Response Initiation.....	191
	References.....	193
9	Action Monitoring.....	197
9.1	Action Errors.....	197
9.2	Action Monitoring and Error Detection.....	199
9.2.1	Behavioral Responses to Errors	199
9.2.2	Electrophysiological Correlates of Error Detection.....	200
9.2.3	Neural Correlates of Error and Conflict Detection	202
9.3	Action Regulation and Error Avoidance	203
9.4	Error-Based Learning.....	205
	References.....	212
	Index.....	215

Human Action Control

From Intentions to Movements

Hommel, B.; Brown, S.B.R.E.; Nattkemper, D.

2016, XII, 220 p. 60 illus., 14 illus. in color., Hardcover

ISBN: 978-3-319-09243-0
