

Contents

Author biography	ix
Abbreviations	xi
1 Disease overview	1
Clinical presentation	1
Etiology and pathogenesis	4
Pathophysiology of joint inflammation in rheumatoid arthritis	4
Diagnosis and classification	5
Long-term complications of rheumatoid arthritis	6
References	7
2 General treatment aspects	9
Goals of treatment	9
Measuring disease activity and treatment response	11
Overview of treatment approaches	17
Overview of the non-biologic treatments for rheumatoid arthritis	19
References	24
3 Overview of biologic therapies	29
Brief historical review of the emergence of biologics for rheumatoid arthritis	29
Overview of currently available biologic therapies	30
Biologic versus synthetic disease modifying antirheumatic drugs: similarities and differences	30
Current guidelines for biologic use in rheumatoid arthritis	36
References	38
4 Cytokine inhibitors	39
Tumor necrosis factor inhibitors	39
Interleukin-6 inhibitors	57
Interleukin-1 inhibitors	62
References	64

5 B-cell directed therapy	71
Introduction	71
Overview of B-cell therapy for rheumatoid arthritis	72
References	76
6 T-cell directed therapy	79
Overview of T-cell directed therapy for rheumatoid arthritis	79
References	82
7 Novel biologics and small molecules with biologic-like effects	83
Introduction	83
Novel biologics	83
Novel synthetic antirheumatic medications with biologic-like properties	86
References	89
8 Strategies for the optimal use of biologic agents in rheumatoid arthritis	93
Introduction	93
Treatment of the patient with an inadequate response to methotrexate	94
Treatment of the patients with newly diagnosed methotrexate-naïve rheumatoid arthritis	96
Induction-maintenance strategies in rheumatoid arthritis	98
Switching after failing an anti-tumor necrosis factor	99
Dose optimization with biologics: dosing up, dosing down	100
Head-to-head comparative studies of biologic agents	102
Determining which therapy is most appropriate for an individual patient: personalized therapy	102
References	104
9 Considerations for special patient populations	109
Special considerations in the pregnant patient	109
Special considerations in the pediatric patient	113
Special considerations in the elderly patient	117
References	118

10 Conclusions and future outlook	123
Historical perspective	123
Future perspective	124
Future prospects for treatment strategies in rheumatoid arthritis: 'treating to target'	129
Epilogue	129
References	130

Biologics for the Treatment of Rheumatoid Arthritis

van Vollenhoven, R.F.

2016, XIII, 132 p. 40 illus., 3 illus. in color., Softcover

ISBN: 978-3-319-13107-8
