

Contents

1	Heterogeneous Media	1
1.1	Introduction.	1
1.2	Outline of This Book	5
	References	6
2	Modeling of Thermal Non-equilibrium	9
2.1	Introduction.	9
2.2	Governing Equations	10
2.2.1	Local Instantaneous Transport Equations	10
2.2.2	Double-Decomposition of Variables	11
2.2.3	Macroscopic Flow Equations.	12
2.2.4	Macroscopic Energy Equations	14
2.2.5	Correlations for Interfacial Heat Transfer, h_i	17
2.3	Periodic Cell	18
2.3.1	Numerical Method and Boundary Conditions	18
2.3.2	Film Coefficient H_i	20
2.3.3	A Correlation for Interstitial Heat Transfer	21
2.4	Laminar Flow in a Channel.	25
2.4.1	Non-dimensional Parameters	25
2.4.2	Numerical Method and Boundary Conditions	26
2.4.3	Local Nusselt Numbers	26
2.5	Turbulent Flow in a Channel.	28
2.6	Chapter Summary	37
	References	40
3	Moving Systems	43
3.1	Introduction.	43
3.2	Macroscopic Laminar Model for Fixed and Moving Beds	43
3.2.1	Fixed Bed.	44
3.2.2	Moving Bed	44

3.3	Turbulence Model for Flow Equations	45
3.3.1	Fixed Bed.	46
3.3.2	Moving Bed	47
3.4	Thermal Transport	48
3.4.1	Two-Energy Equation Model	48
3.4.2	Interfacial Heat Transfer Coefficient.	50
3.4.3	Wall Treatment and Boundary Conditions.	51
3.5	Results for Laminar Parallel Flow	52
3.5.1	Effect of Reynolds Number, Re_D	52
3.5.2	Effect of Slip Ratio, u_s/u_D	56
3.5.3	Effect of Darcy Number, Da	56
3.5.4	Effect of Porosity, ϕ	56
3.5.5	Effect of Thermal Capacity Ratio $(\rho c_p)_s/(\rho c_p)_f$	57
3.5.6	Effect of Thermal Conductivity Ratio k_s/k_f	58
3.6	Results for Turbulent Parallel Flow	60
3.6.1	Effect of Reynolds Number, Re_D	60
3.6.2	Effect of Slip Ratio, u_s/u_D	60
3.6.3	Effect of Darcy Number, Da	63
3.6.4	Effect of Porosity, ϕ	64
3.7	Chapter Summary	66
	References	67
4	Combustion Systems.	69
4.1	Introduction.	69
4.2	Porous Burners	69
4.3	Macroscopic Flow	70
4.3.1	Macroscopic Continuity Equation	70
4.3.2	Macroscopic Momentum Equation.	71
4.3.3	Turbulence Modeling	71
4.4	Heat Transfer	72
4.4.1	Local Thermal Non-equilibrium Model (LTNE).	72
4.5	Combustion Modeling	74
4.5.1	Mass Transport for Fuel	74
4.5.2	Chemical Reaction.	75
4.6	Heat Release	76
4.6.1	Double-Decomposition of Variables.	76
4.6.2	Macroscopic Fuel Consumption.	77
4.7	Numerical Results	81
4.7.1	Simulation Details and Boundary Conditions.	81
4.7.2	Grid Independence Study	81
4.7.3	One Dimensional Combustor.	81
4.8	Chapter Summary	85
	References	87

5	Double Diffusion	89
5.1	Introduction.	89
5.2	Mass Transport	90
5.3	Averaging Operators.	92
5.4	Time Averaging for Buoyant Flows	93
5.5	Volume Averaging.	95
5.5.1	Mean Continuity Equation	95
5.5.2	Mean Momentum Transport	95
5.5.3	Macroscopic Turbulence Field.	96
5.6	Two-Energy Equation Model (2EEM)	96
5.6.1	Interfacial Heat Transfer, h_i .	98
5.7	Mass Transport	99
5.8	Double-Diffusion Effects with a 2EEM Model.	100
5.8.1	Mean Flow	100
5.8.2	Turbulent Field	101
5.9	Chapter Summary	104
	References	104
6	Final Remarks	107
	References	107

Thermal Non-Equilibrium in Heterogeneous Media

de Lemos, M.J.S.

2016, XXV, 108 p. 31 illus., 5 illus. in color., Softcover

ISBN: 978-3-319-14665-2
