

Contents

1	A Primer on Injective Banach Spaces	1
1.1	Injective and Locally Injective Spaces	1
1.2	Basic Properties and Examples	3
1.3	Isometric Theory: 1-Injective Spaces	8
1.4	Examples of Injective Spaces and Duality	10
1.5	Examples of Non-Injective Spaces	11
1.6	Notes and Remarks	14
1.6.1	The Basic Problem for Injective Spaces	14
1.6.2	Injective Spaces that Are Not Dual Spaces	14
1.6.3	The (Weakly) Compact Extension Property	15
1.6.4	The Quotient $\ell_\infty(\Gamma)/\ell_\infty^<(\Gamma)$	15
1.6.5	Finite Dimensional Injective Spaces	16
2	Separably Injective Banach Spaces	17
2.1	Basic Properties	19
2.1.1	Characterizations	19
2.1.2	First Structural Properties	21
2.1.3	Stability Properties	23
2.2	Examples of Separably Injective Spaces	26
2.2.1	$C(K)$ -Spaces When K Is an F -Space	26
2.2.2	M -ideals of Separably Injective Spaces	29
2.2.3	Compact Spaces of Finite Height	32
2.2.4	Twisted Sums of $c_0(I)$	33
2.2.5	Twisted Sums of c_0 and ℓ_∞	35
2.2.6	A Separably Injective Space Not Isomorphic to a Complemented Subspace of Any $C(K)$	36
2.3	Universally Separably Injective Spaces	38
2.4	1-Separably Injective Spaces	40
2.4.1	On λ -Separably Injective Spaces When $\lambda < 2$	43
2.4.2	A C -space 1-Separably Injective But Not Universally 1-Separably Injective	44

2.5	Injectivity Properties of $C(\mathbb{N}^*)$	50
2.6	Automorphisms of Separably Injective Spaces	55
2.7	Notes and Remarks	60
2.7.1	Extensions vs. Projections	60
2.7.2	Complex Separably Injective Spaces	62
3	Spaces of Universal Disposition	67
3.1	Spaces of (Almost) Universal Disposition	68
3.1.1	The Basic Construction	69
3.1.2	Some Specific Spaces of Universal Disposition	70
3.2	Properties of Spaces of Universal Disposition	73
3.2.1	Operator Extension Properties	73
3.2.2	Sizes	75
3.2.3	Universality	76
3.2.4	Uniqueness	77
3.3	Spaces of Almost Universal Disposition	85
3.3.1	Construction of Separable Spaces of Almost Universal Disposition	85
3.3.2	Operator Extension Properties	87
3.3.3	The Structure of a Space of Almost Universal Disposition	90
3.3.4	Spaces of Almost Universal Disposition Are Not Complemented in Any C -Space	92
3.3.5	Isometric Uniqueness of the Gurariy Space	93
3.4	Notes and Remarks	96
3.4.1	Other Spaces of Almost Universal Disposition in the Literature	96
3.4.2	Transitivity and Universal Disposition	98
3.4.3	p -Banach Spaces of Almost Universal Disposition	99
3.4.4	Fraïssé Limits	103
3.4.5	Similar Constructions in Other Categories	104
3.4.6	Sources	106
4	Ultraproducts of Type \mathcal{L}_∞	109
4.1	Ultraproducts of Banach Spaces	110
4.1.1	Ultrafilters	110
4.1.2	Ultraproducts of Banach Spaces	110
4.1.3	The Set-Theoretic Ultraproduct	111
4.2	Injectivity Properties of Ultraproducts of Type \mathcal{L}_∞	111
4.2.1	Separable Subspaces and Separable Injectivity	112
4.2.2	Ultraproducts Are Never Injective	113
4.2.3	Copies of c_0 in Ultraproducts	116
4.3	Basic Examples	117
4.3.1	Ultraproducts of Spaces of Continuous Functions	117
4.3.2	Other Classes of Lindenstrauss Spaces	119
4.3.3	Ultrapowers of the Gurariy Space	120

4.4	Lifting Operators Taking Values in Ultraproducts	124
4.5	Duality, Twisted Sums, and the BAP	125
4.6	Ultra-Isomorphic Spaces	127
4.7	Notes and Remarks	130
4.7.1	Measurable Cardinals	130
4.7.2	Topological Ultracoproducts	131
4.7.3	Digression About Stern's Lemma	132
4.7.4	Ultra-Roots.....	133
4.7.5	Sources	134
5	\aleph-Injectivity	135
5.1	Main Properties.....	136
5.2	$(1, \aleph)$ -Injective Spaces	142
5.3	\aleph -Injectivity Properties of $C(\mathbb{N}^*)$	148
5.4	Projectiveness Properties of Compact Spaces.....	148
5.5	Notes and Remarks	155
5.5.1	On Sobczyk's Theorem	155
5.5.2	\aleph -Injectivity and Universal Disposition	155
5.5.3	Automorphisms of \aleph -Injective Spaces	156
5.5.4	Sources	156
6	Open Problems	159
6.1	Characterizations of (Universally) Separably Injective Spaces	159
6.2	The 3-Space Problem for Universal Separable Injectivity.....	161
6.3	Subspaces and Quotients of ℓ_∞	169
6.4	Examples of Separably Injective Spaces	173
6.4.1	Tensor Products.....	173
6.4.2	Baire Classes.....	174
6.4.3	$C(\mathbb{N}^*)$ and Its \aleph -Injectivity	175
6.5	Ultraproblems.....	177
6.6	Spaces of Universal Disposition	179
6.7	Asplund Spaces	180
6.8	Grothendieck Spaces	181
Appendix A	185
A.1	Dunford-Pettis and Pełczyński Properties	185
A.2	\mathcal{L}_∞ -Spaces	186
A.3	\mathcal{L}_1 -Spaces	190
A.4	Homological Tools	191
A.4.1	The Push-Out Construction	191
A.4.2	Further Properties of Push-Out Squares	193
A.4.3	The Pull-Back Construction.....	194
A.4.4	Short Exact Sequences	195
A.4.5	Push-Out and Pull-Back Exact Sequences	196
A.4.6	Commutativity of Pull-Back and Push-Out Operations	198

A.4.7	The Diagonal Principle	200
A.4.8	The Homology Sequence	200
A.5	Ordinals and Cardinals	201
A.6	Direct and Inverse Limits	202
References	205
Index	215

Separably Injective Banach Spaces

Avilés, A.; Cabello Sánchez, F.; Castillo, J.M.F.; González, M.; Moreno, Y.

2016, XXII, 217 p., Softcover

ISBN: 978-3-319-14740-6
