

Contents

1	Introduction	1
1.1	Preliminary Remarks	1
1.2	Literature Review	7
	References	17
2	Review of the Variational Asymptotic Method and the Intrinsic Equations of a Beam	23
2.1	Introduction	23
2.2	Classification of Beams	24
2.2.1	Class T Beams	24
2.2.2	Class S Beams	24
2.2.3	Class R Beams	25
2.3	Cross-Sectional Modeling Using VAM	25
2.4	General Formulation of the 1-D Analysis	31
2.4.1	Intrinsic Equations of Motion	31
2.4.2	Intrinsic Kinematical Equations	33
2.4.3	Momentum–Velocity Equations	34
2.4.4	Constitutive Equations	36
2.4.5	Strain–Displacement Equations	37
2.4.6	Velocity–Displacement Equations	37
2.4.7	Rodrigues Parameters	37
2.5	Recovery Relations and Their Application in Stress Analysis	38
2.6	Finite Difference Formulation in Time and Space	40
	References	46
3	Linear Static Analysis of Composite Beams	49
3.1	Introduction	49
3.2	Linear Static Solution Using Finite Difference Method	49
3.3	Case Study: Isotropic Rectangular Solid Model	54
3.4	Case Study: Composite Box Model	59

3.5	Calculation of 3-D Strain and 3-D Stress Using 2-D and 1-D Analyses	63
	Reference	66
4	Nonlinear Static Analysis of Composite Beams	67
4.1	Introduction	67
4.2	Case Study: Solving a Nonlinear Initial Value Problem	67
4.3	The Governing Nonlinear Statics Equations	70
4.4	Perturbation Formulation of the Nonlinear Static Problem	70
4.5	Algorithm of Solution	73
4.6	Use of Foreshortening for Verification	76
4.7	Case Study: Isotropic Rectangular Solid Model	77
4.7.1	Load Case 1: Loading in the x_2 Direction	78
4.7.2	Load Case 2: Loading in the x_3 Direction	80
4.7.3	Load Case 3: Combined Loading	83
4.8	Case Study: Composite Box Model	83
4.8.1	Load Case 1: Loading in the x_2 Direction	85
4.8.2	Load Case 2: Loading in the x_3 Direction	88
4.8.3	Load Case 3: Combined Loading	93
5	Transient Nonlinear Dynamics of Accelerating Hingeless Rotating Blades	95
5.1	Introduction	95
5.2	Governing Equations of Motion	96
5.3	An Attempt on Solving a Linearized Version of the Dynamics Equations	98
5.4	Derivation of the Generic Nonlinear Term	100
5.5	The Finite Difference Formulation and Solution Algorithm	101
5.6	The Case of a Rotating Hingeless Beam	103
5.6.1	Approximate Equation of the Axial Force	106
5.6.2	Effect of Weight	106
5.7	Case Study: Isotropic Rectangular Solid Model	107
5.8	Verification by the Nonlinear Static Model	112
5.9	Case Study: Composite Box Model	115
	References	119
6	Steady-State and Perturbed Steady-State Nonlinear Dynamics of Hingeless Rotating Blades	121
6.1	Introduction	121
6.2	Formulation of the Boundary Value Problem and Its Conversion to a Series of Initial Value Problems	122
6.3	The Solution Algorithm and Formulation	124
6.4	Case Study: Isotropic Rectangular Solid Model	127
6.5	Case Study: Verification Example	131
6.6	Case Study: Passive Airfoil Model	133

6.7	Perturbed Steady-State Analysis	134
6.8	Case Study: Isotropic Rectangular Solid Model	136
	References	140
7	Rigid and Elastic Articulated Rotating Composite Blades	141
7.1	Introduction.	141
7.2	Introduction to the Dynamics of Articulated Blades	142
7.3	Euler Equations of Motion for Rigid Rotating Blades	144
7.4	Extended Euler Equations for a Rigid Rotating Blade	147
7.5	Uncoupled Equations of Motion of a Rigid Articulated Blade	150
7.5.1	Uncoupled Flapping	150
7.5.2	Uncoupled Lead–Lag	154
7.5.3	The Blade to Hub Coordinate Transformation	156
7.6	Coupled Nonlinear Flap and Lead–Lag Motions of Rigid Articulated Blades	158
7.7	Case Study: Undamped Coupled Motion of Rigid Articulated Blades	160
7.8	Aerodynamically Damped Flap and Lead–Lag Motions of Rigid Articulated Blades	163
7.8.1	Aerodynamic Damping Effect in Flap Motion with no Hinge Offset	163
7.8.2	Hinge Offset Effect on Nonlinear Aerodynamically Damped Flap Motion	164
7.8.3	Aerodynamic Damping Effect in the Lead–Lag Motion	166
7.9	Case Study: Articulated Rotating Blade with Aerodynamic Damping.	167
7.10	Elastic Articulated Composite Rotating Blades.	170
7.10.1	Notes on Hinged and Hingeless Boundary Conditions	173
7.11	Case Study: Damped Elastic Articulated Blade in Hover.	174
7.12	Case Study: Damped Elastic Composite Airfoil	180
	References	184
8	Static and Dynamic Analysis of Beams and Rotor Blades with Embedded Piezocomposite Actuators.	185
8.1	Introduction.	185
8.2	Conceptual Introduction to Piezoelectric Sensors and Actuators	185
8.3	Mathematical Modeling of Piezoelectric Sensors and Actuators	189
8.4	Piezoelectric Equations in Compressed Matrix Notations.	190
8.5	The 1-D Beam Formulation with Embedded Piezoelectric Element	194
8.6	Case Study: Static Active Composite Box Model.	195

8.7	Case Study: Static Active Composite Airfoil	196
8.8	Case Study: Steady-State Response of Rotating Active Airfoil	204
8.9	Case Study: Rotating Articulated Active Composite Airfoil	209
	References	211
	Appendix: Matrices A, B and J in Chap. 5.	213
	Index	225

Statics and Rotational Dynamics of Composite Beams

Ghorashi, M.

2016, XIX, 227 p. 148 illus., 123 illus. in color.,

Hardcover

ISBN: 978-3-319-14958-5
