

Contents

1	Manipulation of Graphs	1
1.1	Operations on Graphs	1
1.2	Guided Exercises on Graphs	5
1.3	Problems on Graphs	25
2	Invertible Mappings	29
2.1	Injective, Surjective and Bijective Mappings	29
2.2	Inversion of a Map	30
2.3	Monotone Functions	31
2.4	Guided Exercises on Invertible Mappings	32
2.5	Problems on Invertible Mapings	38
3	Maximum, Minimum, Supremum, Infimum	41
3.1	Upper and Lower Bounds, Maximum and Minimum	41
3.2	Supremum, Infimum	42
3.3	Guided Exercises on Maximum, Minimum, Supremum, Infimum	43
3.4	Problems on Maximum, Minimum, Supremum, Infimum	50
4	Sequences	53
4.1	Lists of Real Numbers	53
4.2	Convergence Notions	54
4.3	Results on Limits	55
4.4	Guided Exercises on Sequences	58
4.5	Problems on Sequences	63
5	Limits of Functions	65
5.1	Convergence Notions	65
5.2	Results on Limits	68
5.3	Local Comparison of Functions	71
5.4	Orders	73
5.5	Guided Exercises on Limits of Functions	76
5.6	Problems on Limits	86

6	Continuous Functions	89
6.1	Basic Properties of Continuous Functions	89
6.2	Discontinuities, Continuous Extensions	90
6.3	Global Properties of Continuous Functions	91
6.4	Continuous Monotonic Functions	93
6.5	Guided Exercises on Continuous Functions	94
6.6	Problems on Continuity	101
7	Differentiable Functions	105
7.1	The Derivative of a Function	105
7.2	Derivatives of Elementary Functions	109
7.3	The Classical Theorems of Differential Calculus	110
7.4	Guided Exercises on Differentiable Functions	113
7.5	Problems on Differentiability	127
8	Taylor Expansions	131
8.1	Taylor Expansions	131
8.2	Guided Exercises on Taylor Expansions	134
8.3	Problems on Taylor Expansions	142
9	The Geometry of Functions	147
9.1	Asymptotes	147
9.2	Convexity and Concavity, Inflection Points	149
9.3	The Nature of Critical Points	152
9.4	Guided Exercises on the Geometry of Functions	153
9.5	Problems on the Geometry of Functions	165
10	Indefinite and Definite Integrals	167
10.1	Primitive Functions	167
10.2	Computing Indefinite Integrals	169
10.2.1	General Techniques	169
10.2.2	Rational Functions	170
10.3	Riemann Integrals	172
10.4	The Fundamental Theorem of Calculus	175
10.5	Guided Exercises on Integration	176
10.6	Problems on Integration	187
11	Improper Integrals and Integral Functions	191
11.1	Improper Integrals	191
11.2	Convergence Criteria	194
11.3	Integral Functions	195
11.4	Guided Exercises on Improper Integrals and Integral Functions	196
11.4.1	Improper Integrals	196
11.4.2	Integral Functions	201
11.5	Problems on Improper Integrals and Integral Functions	213

12 Numerical Series	217
12.1 Convergence	217
12.2 Positive Series: Criteria.	220
12.3 Order, Series and Integrals	222
12.4 Alternating Series.	223
12.5 Guided Exercises on Numerical Series	224
12.6 Problems on Series.	233
13 Separation of Variables	237
13.1 Differential Equations	237
13.2 The Method of Separation of Variables.	238
13.3 Guided Exercises on Separation of Variables.	240
13.4 Problems on Separation of Variables	254
14 First Order Linear Differential Equations	259
14.1 First Order Linear Equations with Continuous Coefficients	259
14.2 Guided Exercises on Linear First Order Equations	260
14.3 Problems on Linear First Order Equations.	269
15 Constant Coefficient Linear Differential Equations.	275
15.1 Linear Equations with Constant Coefficients	275
15.2 The Homogeneous Equation	276
15.3 The Nonhomogeneous Equation.	278
15.4 Guided Exercises on Constant Coefficient Differential Equations	281
15.5 Problems on Constant Coefficient Differential Equations	295
16 Miscellaneous	297
16.1 Problems.	297
Appendix A: Basic Facts and Notation.	307
Appendix B: Calculus	319
Solutions.	325
Further Reading	361
Index	363

Calculus Problems

Baronti, M.; De Mari, F.; van der Putten, R.; Venturi, I.

2016, XIII, 366 p. 132 illus., Softcover

ISBN: 978-3-319-15427-5
