

Contents

Energy and Climate: A Global Perspective.....	1
Antoine Bret	
Part I Solar and Wind Energy	
Recursive Estimation Methods to Forecast Short-Term Solar Irradiation.....	17
A. Martín and Juan R. Trapero	
Technical and Environmental Analysis of Parabolic Trough Concentrating Solar Power (CSP) Technologies	33
Guillermo San Miguel, B. Corona, J. Servert, D. López, E. Cerrajero, F. Gutierrez, and M. Lasheras	
Wind Power Forecast Error Probabilistic Model Using Markov Chains.....	55
S. Martín Martínez, A. Honrubia Escribano, M. Cañas Carretón, V. Guerrero Mestre, and E. Gómez Lázaro	
Part II Energy Storage	
Energy Storage Integration with Renewable Energies: The Case of Concentration Photovoltaic Systems	73
Carlos de la Cruz, Mónica Baptista Lema, Xavier del Toro García, and Pedro Roncero-Sánchez	
Battery- and Ultracapacitor-Based Energy Storage in Renewable Multisource Systems.....	95
Mahamadou Abdou-Tankari and Gilles Lefebvre	

Different Phase Change Material Implementations for Thermal Energy Storage.....	123
Mustapha Karkri, Gilles Lefebvre, and Laurent Royon	
 Part III Biomass	
Biorefineries: An Overview on Bioethanol Production	153
Juan Carlos Dominguez Toribio and Francisco Jesus Fernández Morales	
Effects of External Resistance on Microbial Fuel Cell's Performance	175
A. González del Campo, P. Cañizares, J. Lobato, M. Rodrigo, and F.J. Fernandez Morales	
The Avocado and Its Waste: An Approach of Fuel Potential/Application	199
María Paz Domínguez, Karina Araus, Pamela Bonert, Francisco Sánchez, Guillermo San Miguel, and Mario Toledo	
 Part IV Socio-economy of Energy	
Agency and Learning Relationships Against Energy-Efficiency Barriers...	227
I. Martín-Rubio, A. Florence-Sandoval, and E. González-Sánchez	
Index	261

Environment, Energy and Climate Change II
Energies from New Resources and the Climate Change
