1	Introduction: Formulation of the Problem and Its Urgency	1
	References.....	4
2	Overview of the Geology of the Noril'sk Area and the Problems of Ore Genesis.....	7
2.1	Study History of the Noril'sk Mineral Deposits	7
2.2	Geological Overview of the Territory	7
2.2.1	Deep Geological Structure of the Territory	8
2.2.2	Stratified Rocks.....	11
2.2.3	Intrusive Rocks.....	16
2.2.4	Ores of the Noril'sk Deposits.....	17
	References.....	17
3	Specifics of the Tuff–Lava Sequence: Geological and Geochemical Evidences	19
3.1	History and the Principal Problems in Studying of the Volcanic Rocks in the Noril'sk Area	21
3.2	Data Obtained on the Volcanic Rocks in the Noril'sk Area	23
3.2.1	General Characterization of the Volcanic Rocks in the Area: An Example of the Noril'sk Trough (Lower Formations).....	23
3.2.2	General Characterization of the Volcanic Rocks in the Area: An Example of the Mokulaevsky Creek (Upper Formations).....	32
3.2.3	General Characterization of the Volcanic Rocks in the Area: An Example of the Mikchangdinsky Area.....	37
3.3	Principal New Data on the Volcanic Rocks.....	41
3.3.1	Tholeiitic Basalts of the Central Part of Pile.....	41
3.3.2	High-Mg Volcanic Rocks	59
3.3.3	Basalts of the Morongovsky–Samoedsky Formations	87
3.4	Evolution of Tuff–Lava Sequence.....	90
3.5	Conclusions	95
	References.....	95
4	Intrusive Rocks.....	99
4.1	Problems in Distinguishing the Intrusive Complexes in the Noril'sk Area and Distinctive Structural and Compositional Features of These Complexes	99
4.2	Geochemical Features of the Intrusive Rocks the Noril'sk Area	101
4.3	Inner Structures of the Intrusions of the Noril'sk Complex and Petrography of the Rocks.....	102

4.4	Massifs of the Talnakh Ore Junction.....	104
4.4.1	Talnakh Massif	104
4.4.2	Kharaelakh Massif	118
4.4.3	Low Talnakh Massif.....	123
4.5	Massifs of the Noril'sk Ore Junction	131
4.5.1	Noril'sk 1 Massif.....	131
4.5.2	Noril'sk 2 Massif.....	161
4.5.3	Chernogorsky Massif	165
4.5.4	Zub-Marksheydersky Massif.....	173
4.5.5	Bol'shaya Bar'ernaya Massif	174
4.5.6	Maslovsky Massifs	175
4.6	Massif of the Mikchangdinsky Ore Junction	210
4.6.1	Mikchangdinsky Massif	211
	References.....	225
5	Composition of the Parental Melts for the Intrusions	229
5.1	Melt Compositions Evaluated from Data on Melt Inclusions.....	229
5.1.1	Inclusions in Olivine	229
5.1.2	Inclusions in Pyroxene	236
5.2	Fluids in Magmas	236
5.3	Composition and Temperature of Melts Estimated with the KOMAGMAT-3.5 Program.....	240
5.3.1	Specification of the Petrological Terminology	242
5.3.2	Justification of Geochemical Thermometry	243
5.3.3	Simulation of Phase Equilibria.....	244
5.3.4	Results of Geochemical Thermometry.....	245
5.4	Conclusions	250
	References.....	250
6	Relationship Between the Lavas and the Ore-Bearing Massifs	253
6.1	Geologic Relationships Between the Lavas and the Intrusions of the Noril'sk Complex.....	255
6.2	Comparison of the Geochemistry of the Lavas and Intrusive Rocks of the Noril'sk Complex	258
6.3	Conclusions	258
	References.....	260
7	Basic-Ultrabasic Intrusions in the Kola-Karelia Area	263
7.1	Brief Geology.....	264
7.2	Petrography of the Drusite Complex Massifs	266
7.3	Brief Geology of the Layered Plutons	279
7.4	Petro- and Geochemical Features of the Rocks of the Drusite Massifs and the Reference Samples of the Layered Plutons.....	282
7.4.1	Major Elements	282
7.4.2	Behavior of the Trace Elements in the Rocks	282
7.4.3	Behavior of the Rare Earth Elements.....	285
7.5	Isotope Characteristics of the Drusite Massifs.....	289
7.6	Materials and Methods.....	290
7.6.1	Sm/Nd Isotopic Ratios of Whole-Rock Samples	291
7.6.2	U/Pb Isotopic Ratios of Zircons	293
7.7	Conclusions	301
	References.....	301

8	Assimilation of the Host Rocks by Basic Magma.....	305
8.1	Inner Structure of the Western Part of the Kharaelakh Intrusion	307
8.1.1	Chemical Variability of the Rocks.....	312
8.1.2	Distribution of Radiogenic Isotopes in the Rocks.....	313
8.2	Upper Zone of the Talnakh Intrusion	317
8.3	Contact Zones of the Maslovsky Intrusion	320
8.4	Conclusions	326
	References.....	326
9	Resume: Interpretation of Results - Possible Magma	
	Sources and Ore-Forming Processes	329
9.1	General Conclusions	335
	References.....	335
10	Appendix	337

Siberian Traps and Pt-Cu-Ni Deposits in the Noril'sk
Area

Krivolutskaya, N.

2016, XVI, 364 p. 172 illus., 143 illus. in color.,

Hardcover

ISBN: 978-3-319-17204-0
