

Contents

1	Introduction	1
1.1	Process Optimisation Based on Experimental Design	1
1.1.1	Foundations of Taguchi's Method	4
1.2	The Need for Advanced Multiresponse Process Optimisation in a Modern Industry	12
	References	18
2	Review of Multiresponse Process Optimisation Methods	21
2.1	Conventional Multiresponse Process Optimisation Approaches Based on Statistical Methods	23
2.1.1	Response Surface Methodology	23
2.1.2	Taguchi's Robust Parameter Design	24
2.1.3	Multiresponse Optimisation Based on Goal-Programming	31
2.2	Non-conventional Multiresponse Process Optimisation Approaches Based on Artificial Intelligence Techniques	32
2.2.1	Multiresponse Optimisation Based on Fuzzy Multi-attribute Decision Making and Fuzzy Logic	33
2.2.2	Multiresponse Optimisation Based on Artificial Neural Networks	34
2.2.3	Multiresponse Optimisation Based on Metaheuristic Search Techniques	36
2.2.4	Multiresponse Optimisation Using Expert System	50
	References	52
3	An Intelligent, Integrated, Problem-Independent Method for Multiresponse Process Optimisation	65
3.1	Method Overview: Intelligent System for Multiresponse Robust Process Design (IS-MR-RPD) Model	65
3.2	Design of Experimental Plan	70
3.2.1	Taguchi's Experimental Design: Orthogonal Arrays	71

3.2.2	Expert System for the Design of Experiment (ES_DoE) in IS-MR-RPD Model	75
3.3	Experimental Data Processing	92
3.3.1	Taguchi's Robust Parameter Design: Signal to Noise Ratio and Quality Loss Function	93
3.3.2	Principal Component Analysis: Theoretical Background	99
3.3.3	Grey Relational Analysis: Theoretical Background	102
3.3.4	The Factor Effects Approach in IS-MR-RPD Model	105
3.4	Process Modelling and Optimisation	111
3.4.1	Artificial Neural Networks: Theoretical Background	111
3.4.2	Metaheuristic Optimisation Techniques: Theoretical Background	115
3.4.3	Process Modelling and Optimisation in IS-MR-RPD Model	126
	References	160
4	Implementation of the Intelligent Method for Multiresponse Process Optimisation	165
4.1	Case Study 1: Optimisation of the Weld Formation Between Copper Wire and Copper Leads in a Thermosonic Wire Bonding Process in Semiconductors Manufacturing	165
4.1.1	Problem Description in Case Study 1	166
4.1.2	The Design of an Experimental Plan Using ES_DoE and Experimental Data Collection in Case Study 1	169
4.1.3	Experimental Data Processing Using the Factor Effects Approach in Case Study 1	171
4.1.4	Process Modelling and Optimisation in Case Study 1	175
4.1.5	Discussion of Experimental Results in Case Study 1	185
4.2	Case Study 2: Optimisation of the Ball Bond Formation in a Thermosonic Copper Wire Bonding Process in Semiconductors Manufacturing	189
4.2.1	Problem Description in Case Study 2	191
4.2.2	The Design of an Experimental Plan Using ES_DoE and Experimental Data Collection in Case Study 2	195
4.2.3	Experimental Data Processing Using the Factor Effects Approach in Case Study 2	195
4.2.4	Process Modelling and Optimisation in Case Study 2	200
4.2.5	Discussion of Experimental Results in Case Study 2	209
4.3	Case Study 3: Optimisation of Nd:YAG Laser Drilling Process in Processing Ni-Based Superalloy Nimonic 263 Sheets	213

4.3.1	Problem Description in Case Study 3	213
4.3.2	The Design of an Experiment and Experimental Data Collection in Case Study 3	216
4.3.3	Process Modelling and Optimisation in Case Study 3	223
4.3.4	Discussion of Experimental Results in Case Study 3	232
4.4	Case Study 4: Optimisation of Nd3+:YAG Laser Shock Peening Process in Processing Nimonic 263 Sheets	235
4.4.1	Problem Description in Case Study 4	235
4.4.2	The Design of an Experimental Plan Using ES_DoE and Experimental Data Collection in Case Study 4	238
4.4.3	Experimental Data Processing Using the Factor Effects Approach in Case Study 4	239
4.4.4	Process Modelling and Optimisation in Case Study 4	243
4.4.5	Discussion of Experimental Results in Case Study 4	252
	References	259
5	Discussion and Future Research	261
5.1	Summary of the Results of IS-MR-RPD Model Application	261
5.2	Discussion of the Results of IS-MR-RPD Model Application. . . .	268
5.2.1	Analysis of the Factor Effects Approach Performance in IS-MR-RPD Model Application	268
5.2.2	Analysis of the Neural Networks Performance in IS-MR-RPD Model Application	270
5.2.3	Analysis of the Metaheuristic Optimisation Techniques Performance in IS-MR-RPD Model Application	271
5.3	Directions for Future Research.	278
	References	280
6	Concluding Remarks	285
	References	289

Advanced Multiresponse Process Optimisation

An Intelligent and Integrated Approach

Sibalija, T.; Majstorović, V.D.

2016, XVII, 298 p., Hardcover

ISBN: 978-3-319-19254-3
