

Contents

Part I Cartographic Modelling and Design

A Displacement Method for Maps Showing Dense Sets of Points of Interest	3
Sarah Tauscher and Karl Neumann	
Dynamic Cartography: A Concept for Multidimensional Point Symbols	17
Andrea Nass and Stephan van Gasselt	
Model of the Dynamic Labelling of Populated Places in Slovakia for the Purposes of the State Map Series	31
Jakub Straka, Marta Sojčáková and Róbert Fencík	
Methodology for Automating the Cartometric Evaluation of Urban Topographic Maps of Brazil	47
Mônica Cristina de Castro and Claudia Robbi Sluter	
Cartographic Visualization of Historical Source Data on AtlasFontium.pl	65
Arkadiusz Borek and Tomasz Panecki	
Pins or Points?—Challenges in Producing Cartographically Appealing Webmaps Within an Editorial Environment for LiD Online	83
Jana Moser and Sebastian Koslitz	

Part II Spatial Analysis and Geovisual Analytics

Structuring Relations between User Tasks and Interactive Tasks Using a Visual Problem-Solving Approach	101
Qiuju Zhang, Menno-Jan Kraak and Connie A. Blok	
Visual Analysis of Floating Taxi Data Based on Interconnected and Timestamped Area Selections	115
Andreas Keler and Jukka M. Krisp	

Spatial-temporal Modeling of Linguistic Regions and Processes with Combined Indeterminate and Crisp Boundaries	133
Johannes Scholz, Thomas J. Lampoltshammer, Norbert Bartelme and Eveline Wandl-Vogt	
Hybrid Approach for Large-scale Energy Performance Estimation Based on 3D City Model Data and Typological Classification	153
Federico Prandi, Umberto Di Staso, Marco Berti, Luca Giovannini, Piergiorgio Cipriano and Raffaele De Amicis	
Part III Cartographic Technologies	
Atlas of Switzerland Goes Online and 3D—Concept, Architecture and Visualization Methods	171
René Sieber, Marianna Serebryakova, Raimund Schnürer and Lorenz Hurni	
Development of a Web-Browser Based Interface for 3D Data—A Case Study of a Plug-in Free Approach for Visualizing Energy Modelling Results	185
Jochen Wendel, Syed Monjur Murshed, Akila Sriramulu and Alexandru Nichersu	
Modern Methodology and New Tools for Planetary Mapping	207
I.P. Karachevtseva, A.A. Kokhanov, A.E. Zubarev, Zh.F. Rodionova, E.V. Matveev and A.S. Garov	
SDI4Apps Points of Interest Knowledge Base	229
Otakar Čerba, Karel Charvát, Tomáš Mildorf, Raitis Bērziņš, Pavel Vlach and Barbora Musilová	
Licences and Open Data in Cartography	239
Alena Vondrakova and Vit Vozenilek	
Part IV Projection, Cartographic Heritage and Education	
Some Remarks on the Question of Pseudocylindrical Projections with Minimum Distortions for World Maps	253
János Györffy	
A Semi-automatic Approach for Determining the Projection of Small Scale Maps Based on the Shape of Graticule Lines	267
Ádám Barancsik	
A Forgotten Atlas of Erwin Raisz: “Atlas de Cuba”.	289
José Jesús Reyes Nuñez	
Who Needs <i>Mittleuropa</i> Old Maps? Present-day Applications of Habsburg Cartographic Heritage.	305
Marco Mastronunzio and Elena Dai Prà	

GEOTHNK: A Semantic Approach to Spatial Thinking	319
Marinos Kavouras, Margarita Kokla, Eleni Tomai, Athanasia Darra and Katerina Pastra	

Thematic Cartography: A Key Course in Geospatial Engineering	339
Chrysoula Boutoura, Alexandra Kousoulakou and Angeliki Tsorlini	

Part V Cartographic Applications

A Review of Research Investigations Related to User-Centred Design for Geo-Information Products	359
Claudia Robbi Sluter, João Vitor Meza Bravo, Melissa M. Yamada, Gustavo Dias Ramos and Andrea Faria Andrade	

Interoperable Volunteered Geographic Information Empowering e-Governance Processes: Case Study for Land Use Dataset in the City of Zagreb	373
Tomáš Kliment, Vlado Cetl and Marcel Kliment	

Mapping a City's Activity. A Project of Volunteered Geographic Information Using Mobile Mapping Collection	391
Giuseppe Borruso and Viola Defend	

Contextual Adaptability of Navigational Spatial Descriptions: A Pragmatic Comparison	413
Farid Karimipour, Negar Alinaghi, Paul Weiser and Andrew Frank	

User Requirements Analysis for a Mobile Augmented Reality Tool Supporting Geography Fieldwork	433
Xiaoling Wang, Corné P.J.M. van Elzakker and Menno Jan Kraak	

Landmark-Based Pedestrian Navigation Using Augmented Reality and Machine Learning	451
Pouria Amirian and Anahid Basiri	

The Role of Service-Oriented Mapping in Spatial and Regional Sciences	467
Markus Jobst and Tatjana Fischer	

Progress in Cartography

EuroCarto 2015

Gartner, G.; Jobst, M.; Huang, H. (Eds.)

2016, XI, 480 p. 207 illus., 183 illus. in color., Hardcover

ISBN: 978-3-319-19601-5
