

Contents

1	Motivation and Outline	1
2	Introduction to the Standard Model and Beyond	5
2.1	The Standard Model	5
2.2	Electroweak Theory	6
2.3	Beyond the SM	9
	References	16
3	Precision Tests of the SM	19
3.1	Atomic Parity Violation.	19
3.2	Parity-Violating Electron Scattering	20
3.3	Radiative Corrections to Q_W^p	22
3.4	The $\Box_{\gamma Z}$ Correction.	24
	References	28
4	Structure Functions	31
4.1	Deep Inelastic Scattering	32
4.2	Quark-Parton Model	36
4.3	Modelling Structure Functions	38
4.4	γZ Interference Structure Functions	42
	References	46
5	Adelaide-Jefferson Lab-Manitoba Model	49
5.1	Electromagnetic Parametrisation	49
5.2	AJM γZ Interference Structure Functions	53
5.3	Phenomenological Constraints	55
	References	68
6	The $\Box_{\gamma Z}^V$ Correction	71
6.1	γZ Box Corrections for Q_{weak}	72
6.2	Predictions for Parity-Violating Asymmetries	76

6.3	Q_W^p at 11 GeV	78
6.4	A_{PVDIS} for the Proton at 11 GeV	88
	References	90
7	Electric and Magnetic Polarisabilities of the Proton	93
7.1	The Generalised Baldin Sum Rule	93
7.2	Q^2 Dependence of α and β	95
	References	101
8	Quark-Hadron Duality	103
8.1	Duality in the SM.	103
8.2	Moments of Structure Functions.	105
8.3	Implications for the $\square_{\gamma Z}^V$ Correction.	111
	References	113
9	Summary and Conclusion.	115
	References	117
	Appendix A: Further Determinations of $\Re \square_{\gamma Z}^V$	119

Hadron Structure in Electroweak Precision
Measurements

Hall, N.L.

2016, XIV, 120 p. 47 illus., 29 illus. in color., Hardcover

ISBN: 978-3-319-20220-4
