

Contents

1	Biomechanics of Joint Synovia	1
1.1	Kinematics of Synovial Joints	2
1.2	Structure and Functions of Joint Cartilage	10
1.3	Biomechanical Properties of Joint Cartilage Matrix	17
1.4	Mechanical Properties of Thin Layers of Cartilages at Microindentation in Various Environments	24
1.5	Role of Synovia as Protector of Joint Friction Surfaces	29
	References	33
2	Brief Review of Liquid Crystals	37
2.1	Liquid-Crystal State of Matter and Kinds of Liquid Crystals	37
2.1.1	History of Liquid Crystal Discovery	37
2.1.2	Classes of Liquid Crystals	41
2.2	Classification and Structure of Liquid Crystals	42
2.3	Properties of Liquid Crystals	50
2.3.1	Optical and Electrical Properties of Liquid Crystals	50
2.3.2	Peculiarities of Formation of Liquid-Crystal Layers on Solid Surfaces	51
2.3.3	Rheological Properties of Liquid Crystals	54
	References	55
3	Modern Concepts of Friction and Lubrication of Solids	57
3.1	General Information on Tribology. Basic Notions and Terms	57
3.2	Friction of Lubricated Solids	61
3.2.1	Molecular-Mechanical Theory of Friction	61
3.2.2	Boundary Lubrication of Solids	63
3.2.3	Solid Lubricants	69
3.2.4	Hydrodynamic Lubrication of Solids	70
3.3	Methods and Means of Tribotesting	74
3.3.1	Laboratory Tribometers	75
3.3.2	Pendulum Tribometers	82

3.3.3	Indirect Methods of Lubricant Testing	86
3.3.4	Operating Tests	90
References	94
4	Modern Concepts of Friction, Wear and Lubrication of Joints . . .	99
4.1	General Ideas of Friction in Joints	99
4.2	Conceptual Models of Joints Lubrication	104
4.3	Molecular Models of Joint Lubrication	113
References	118
5	Effect of Liquid Crystals on Biological Mechanisms of Reducing Joint Friction	123
5.1	Effect of Friction Surfaces and Lubricant on Joint Cartilage Friction	123
5.2	Synovia as Liquid Crystal Biological Fluid	131
5.3	Interrelation Between Structure-Mechanical and Antifriction Properties of Joint Synovia	140
5.4	Conceptual Model of Lubricity of Liquid Crystal Compounds in Intra-articular Friction	150
5.5	Tribological Principles of Developing Medicinal Preparations Based on Blood Serum as a Liquid-Crystalline Medium for Therapeutic Correction of Synovial Joints	156
References	163
6	Liquid Crystals as Effective Drugs for Treatment of Articular Disorders and Similar Pathologies	167
6.1	Mechanisms of Connective Tissue Destruction at Rheumatic Diseases	168
6.2	Basic Directions of Treating Joint Rheumatic Deceases	174
6.3	Problems of Developing Artificial Lubricants for Local Therapy of Joint Deceases	179
6.4	Liquid-Crystal Lubricants for Treating Joint Deceases and Similar Pathologies	183
References	199
Conclusions	205
Index	209

Liquid Crystals in Biotribology

Synovial Joint Treatment

Ermakov, S.F.; Beletskii, A.; Eismont, O.; Nikolaev, V.

2016, XII, 211 p. 105 illus., 9 illus. in color., Hardcover

ISBN: 978-3-319-20348-5
