Part I Continuous Outcome Data

1	One-Sample Continuous Data (One-Sample T-Test, One-Sample Wilcoxon Signed Rank Test, 10 Patients)	3
1	General Purpose	3
2	Schematic Overview of Type of Data File	3
3	Primary Scientific Question	3
4	Data Example	4
5	Analysis: One-Sample T-Test	4
6	Alternative Analysis: One-Sample Wilcoxon Signed Rank Test	5
7	Conclusion	5
8	Note	6
2	Paired Continuous Data (Paired T-Test, Wilcoxon Signed Rank Test, 10 Patients)	7
1	General Purpose	7
2	Schematic Overview of Type of Data File	7
3	Primary Scientific Question	7
4	Data Example	8
5	Analysis: Paired T-Test	8
6	Alternative Analysis: Wilcoxon Signed Rank Test	9
7	Conclusion	10
8	Note	10
3	Paired Continuous Data with Predictors (Generalized Linear Models, 50 Patients)	11
1	General Purpose	11
2	Schematic Overview of Type of Data File	11
3	Primary Scientific Question	12
4	Data Example	12

5	Recoding the Data File	12
6	Analysis: Generalized Linear Models	13
7	Conclusion	15
8	Note	15
4	Unpaired Continuous Data (Unpaired T-Test, Mann-Whitney, 20 Patients)	17
1	General Purpose	17
2	Schematic Overview of Type of Data File	17
3	Primary Scientific Question	17
4	Data Example	18
5	Analysis: Unpaired T-Test	19
6	Alternative Analysis: Mann-Whitney Test	20
7	Conclusion	21
8	Note	21
5	Linear Regression (20 Patients)	23
1	General Purpose	23
2	Schematic Overview of Type of Data File	25
3	Primary Scientific Question	25
4	Data Example	25
5	Analysis: Linear Regression	27
6	Conclusion	28
7	Note	28
6	Multiple Linear Regression (20 Patients)	29
1	General Purpose	29
2	Schematic Overview of Type of Data File	29
3	Primary Scientific Question	29
4	Data Example	30
5	Analysis, Multiple Linear Regression	30
6	Conclusion	33
7	Note	34
7	Automatic Linear Regression (35 Patients)	35
1	General Purpose	35
2	Schematic Overview of Type of Data File	35
3	Specific Scientific Question	36
4	Data Example	36
5	Standard Multiple Linear Regression	36
6	Automatic Linear Modeling	37
7	The Computer Teaches Itself to Make Predictions	39
8	Conclusion	40
9	Note	40
8	Linear Regression with Categorical Predictors (60 Patients)	41
1	General Purpose	41
2	Schematic Overview of Type of Data File	41

3	Primary Scientific Question	42
4	Data Example	42
5	Inadequate Linear Regression	43
6	Multiple Linear Regression for Categorical Predictors	44
7	Conclusion	45
8	Note	45
9	Repeated Measures Analysis of Variance, Friedman (10 Patients)	47
1	General Purpose	47
2	Schematic Overview of Type of Data File	47
3	Primary Scientific Question	48
4	Data Example	48
5	Analysis, Repeated Measures ANOVA	48
6	Alternative Analysis: Friedman Test	50
7	Conclusion	50
8	Note	51
10	Repeated Measures Analysis of Variance Plus Predictors (10 Patients)	53
1	General Purpose	53
2	Schematic Overview of Type of Data File	53
3	Primary Scientific Question	53
4	Data Example	54
5	Analysis, Repeated Measures ANOVA	54
6	Conclusion	56
7	Note	57
11	Doubly Repeated Measures Analysis of Variance (16 Patients)	59
1	General Purpose	59
2	Schematic Overview of Type of Data File	59
3	Primary Scientific Question	60
4	Data Example	60
5	Doubly Repeated Measures ANOVA	61
6	Conclusion	65
7	Note	65
12	Repeated Measures Mixed-Modeling (20 Patients)	67
1	General Purpose	67
2	Schematic Overview of Type of Data File	68
3	Primary Scientific Question	68
4	Data Example	68
5	Analysis with the Restructure Data Wizard	69
6	Mixed Model Analysis	70
7	Mixed Model Analysis with Random Interaction	71
8	Conclusion	72
9	Note	73

13	Unpaired Continuous Data with Three or More Groups (One Way Analysis of Variance, Kruskal-Wallis, 30 Patients)	75
1	General Purpose	75
2	Schematic Overview of Type of Data File	75
3	Primary Scientific Question	76
4	Data Example	76
5	One Way ANOVA	76
6	Alternative Test: Kruskal-Wallis Test	77
7	Conclusion	77
8	Note	78
14	Automatic Nonparametric Testing (30 Patients)	79
1	General Purpose	79
2	Schematic Overview of Type of Data File	79
3	Primary Scientific Question	80
4	Data Example	80
5	Automatic Nonparametric Testing	80
6	Conclusion	84
7	Note	84
15	Trend Test for Continuous Data (30 Patients)	85
1	General Purpose	85
2	Schematic Overview of Type of Data File	85
3	Primary Scientific Question	86
4	Data Example	86
5	Trend Analysis for Continuous Data	86
6	Conclusion	87
7	Note	88
16	Multistage Regression (35 Patients)	89
1	General Purpose	89
2	Schematic Overview of Type of Data	89
3	Primary Scientific Question	89
4	Data Example	90
5	Traditional Multiple Linear Regression	90
6	Multistage Regression	91
7	Alternative Analysis: Two Stage Least Square (2LS) Method	92
8	Conclusion	93
9	Note	93
17	Multivariate Analysis with Path Statistics (35 Patients)	95
1	General Purpose	95
2	Schematic Overview of Type of Data File	95
3	Primary Scientific Question	96
4	Data Example	96
5	Traditional Linear Regressions	96

6	Using the Traditional Regressions for Multivariate Analysis with Path Statistics	99
7	Conclusion	100
8	Note	100
18	Multivariate Analysis of Variance (35 and 30 Patients)	101
1	General Purpose	101
2	Schematic Overview of Type of Data File	101
3	Primary Scientific Question	102
4	First Data Example	102
5	Second Data Example	105
6	Conclusion	107
7	Note	107
19	Missing Data Imputation (35 Patients)	109
1	General Purpose	109
2	Schematic Overview of Type of Data File	109
3	Primary Scientific Question	109
4	Data Example	110
5	Regression Imputation	111
6	Multiple Imputations	112
7	Conclusion	114
8	Note	114
20	Meta-regression (20 and 9 Studies)	115
1	General Purpose	115
2	Schematic Overview of Type of Data File	115
3	Primary Scientific Question	115
4	Data Example 1	116
5	Data Example 2	117
6	Conclusion	119
7	Note	119
21	Poisson Regression for Outcome Rates (50 Patients)	121
1	General Purpose	121
2	Schematic Overview of Type of Data File	121
3	Primary Scientific Question	122
4	Data Example	122
5	Multiple Linear Regression	122
6	Weighted Least Squares Analysis	123
7	Poisson Regression	124
8	Conclusion	125
9	Note	125
22	Confounding (40 Patients)	127
1	General Purpose	127
2	Schematic Overview of Type of Data File	127
3	Primary Scientific Question	128

4	Data Example	128
5	Some Graphs of the Data	128
6	Linear Regression Analyses	130
7	Conclusion	132
8	Note	133
23	Interaction, Random Effect Analysis of Variance (40 Patients)	135
1	General Purpose	135
2	Schematic Overview of Type of Data File	136
3	Primary Scientific Question	136
4	Data Example	136
5	Data Summaries	137
6	Analysis of Variance	138
7	Multiple Linear Regression	140
8	Conclusion	141
9	Note	141
24	General Loglinear Models for Identifying Subgroups with Large Health Risks (12 Populations)	143
1	General Purpose	143
2	Schematic Overview of Type of Data File	143
3	Primary Scientific Question	144
4	Data Example	144
5	Traditional Linear Regression	144
6	General Loglinear Modeling	146
7	Conclusion	148
8	Note	149
25	Curvilinear Estimation (20 Patients)	151
1	General Purpose	151
2	Schematic Overview of Type of Data File	151
3	Primary Scientific Question	152
4	Data Example	152
5	Data Graph	152
6	Curvilinear Estimation	153
7	Conclusion	156
8	Note	157
26	Loess and Spline Modeling (90 Patients)	159
1	General Purpose	159
2	Schematic Overview of Type of Data File	159
3	Primary Scientific Question	160
4	Data Example	160
5	Some Background Information	160
6	Spline Modeling	161

7	Loess (Locally Weighted Scatter Plot Smoothing)	
	Modeling	162
8	Conclusion	163
9	Note	164
27	Monte Carlo Tests for Continuous Data	
	(10 and 20 Patients)	165
1	General Purpose	165
2	Schematic Overview of Type of Data File, Paired Data	165
3	Primary Scientific Question, Paired Data	166
4	Data Example, Paired Data	166
5	Analysis: Monte Carlo (Bootstraps), Paired Data	166
6	Schematic Overview of Type of Data File, Unpaired Data	167
7	Primary Scientific Question, Unpaired Data	168
8	Data Example, Unpaired Data	168
9	Analysis: Monte Carlo (Bootstraps), Unpaired Data	168
10	Conclusion	169
11	Note	169
28	Artificial Intelligence Using Distribution	
	Free Data (90 Patients)	171
1	General Purpose	171
2	Schematic Overview of Type of Data File	171
3	Primary Scientific Question	172
4	Data Example	172
5	Neural Network Analysis	173
6	Conclusion	174
7	Note	174
29	Robust Testing (33 Patients)	175
1	General Purpose	175
2	Schematic Overview of Type of Data File	175
3	Primary Scientific Question	176
4	Data Example	176
5	Data Histogram Graph	176
6	Robust Testing	178
7	Conclusion	179
8	Note	179
30	Nonnegative Outcomes Assessed with Gamma	
	Distribution (110 Patients)	181
1	General Purpose	181
2	General Overview of Type of Data File	182
3	Primary Scientific Question	183
4	Data Example	183

5	Linear Regressions	183
6	Gamma Regression	185
7	Conclusion	189
8	Note	189
31	Nonnegative Outcomes Assessed with Tweedie	
	Distribution (110 Patients)	191
1	General Purpose	191
2	General Overview of Type of Data File	192
3	Primary Scientific Question	193
4	Data Example	193
5	Gamma Regression	193
6	Tweedie Regression	195
7	Conclusion	197
8	Note	197
32	Validating Quantitative Diagnostic Tests (17 Patients)	199
1	General Purpose	199
2	Schematic Overview of Type of Data File	199
3	Primary Scientific Question	200
4	Data Example	200
5	Validating Quantitative Diagnostic Tests	200
6	Conclusion	201
7	Note	201
33	Reliability Assessment of Quantitative Diagnostic Tests	
	(17 Patients)	203
1	General Purpose	203
2	Schematic Overview of Type of Data File	203
3	Primary Scientific Question	204
4	Data Example	204
5	Intraclass Correlation	204
6	Conclusion	205
7	Note	205
 Part II Binary Outcome Data		
34	One-Sample Binary Data (One-Sample Z-Test,	
	Binomial Test, 55 Patients)	209
1	General Purpose	209
2	Schematic Overview of Type of Data File	209
3	Primary Scientific Question	210
4	Data Example	210
5	Analysis: One-Sample Z-Test	210
6	Alternative Analysis: Binomial Test	211
7	Conclusion	211
8	Note	211

35	Unpaired Binary Data (Chi-Square Test, 55 Patients)	213
1	General Purpose	213
2	Schematic Overview of Type of Data File	213
3	Primary Scientific Question	214
4	Data Example	214
5	Crosstabs	214
6	3-D Bar Chart	215
7	Statistical Analysis: Chi-Square Test	215
8	Conclusion	216
9	Note	216
36	Logistic Regression with a Binary Predictor (55 Patients)	217
1	General Purpose	217
2	Schematic Overview of Type of Data File	218
3	Primary Scientific Question	218
4	Data Example	218
5	Crosstabs	219
6	Logistic Regression	219
7	Conclusion	220
8	Note	220
37	Logistic Regression with a Continuous Predictor (55 Patients)	221
1	General Purpose	221
2	Schematic Overview of Type of Data File	221
3	Primary Scientific Question	222
4	Data Example	222
5	Logistic Regression with a Continuous Predictor	222
6	Using the Logistic Equation for Making Predictions	223
7	Conclusion	223
8	Note	223
38	Logistic Regression with Multiple Predictors (55 Patients)	225
1	General Purpose	225
2	Schematic Overview of Type of Data File	225
3	Primary Scientific Question	226
4	Data Example	226
5	Multiple Logistic Regression	226
6	Conclusion	228
7	Note	228
39	Logistic Regression with Categorical Predictors (60 Patients)	229
1	General Purpose	229
2	Schematic Overview of Type of Data File	229
3	Primary Scientific Question	230
4	Data Example	230
5	Logistic Regression with Categorical Predictors	230
6	Conclusion	231
7	Note	231

40	Trend Tests for Binary Data (106 Patients)	233
1	General Purpose	233
2	Schematic Overview of Type of Data File	233
3	Primary Scientific Question	233
4	Data Example	234
5	A Contingency Table of the Data	234
6	3-D Bar Charts	234
7	Multiple Groups Chi-Square Test	236
8	Chi-Square Test for Trends	236
9	Conclusion	237
10	Note	237
41	Paired Binary (McNemar Test) (139 General Practitioners)	239
1	General Purpose	239
2	Schematic Overview of Type of Data File	239
3	Primary Scientific Question	240
4	Data Example	240
5	3-D Chart of the Data	240
6	Data Analysis: McNemar's Test	241
7	Conclusion	242
8	Note	242
42	Paired Binary Data with Predictor (139 General Practitioners)	243
1	General Purpose	243
2	Schematic Overview of Type of Data File	243
3	Primary Scientific Questions	244
4	Data Example	244
5	2×2 Contingency Table of the Effect of Postgraduate Education	244
6	Restructure Data Wizard	245
7	Generalized Estimation Equation Analysis	246
8	Conclusion	247
9	Note	247
43	Repeated Measures Binary Data (Cochran's Q Test), (139 Patients)	249
1	General Purpose	249
2	Schematic Overview of Type of Data File	249
3	Primary Scientific Question	250
4	Data Example	250
5	Analysis: Cochran's Q Test	250
6	Subgroups Analyses with McNemar's Tests	251
7	Conclusion	252
8	Note	252

44	Multinomial Regression for Outcome Categories	
	(55 Patients)	253
1	General Purpose	253
2	Schematic Overview of Type of Data File	253
3	Primary Scientific Question	254
4	Data Example	254
5	3-D Bar Chart	255
6	Linear Regression	255
7	Multinomial Regression	256
8	Conclusion	257
9	Note	257
45	Random Intercept for Categorical Outcome and Predictor	
	Variables (55 Patients)	259
1	General Purpose	259
2	Schematic Overview of Type of Data File	260
3	Primary Scientific Question	260
4	Data Example	260
5	Data Analysis with a Fixed Effect Generalized Linear Mixed Model	261
6	Data Analysis with a Random Effect Generalized Linear Mixed Model	262
7	Conclusion	264
8	Note	264
46	Comparing the Performance of Diagnostic Tests	
	(650 and 588 Patients)	265
1	General Purpose	265
2	Schematic Overview of Type of Data Files	265
3	Primary Scientific Question	266
4	Data Sample One	266
5	Data Histogram Graph from Sample One	266
6	Data Sample Two	267
7	Data Histogram Graph from Sample Two	268
8	Performance Assessment with Binary Logistic Regression	268
9	Performance Assessment with C-statistics	270
10	Conclusion	272
11	Note	272
47	Poisson Regression for Binary Outcomes (52 Patients)	273
1	General Purpose	273
2	Schematic Overview of Type of Data File	273
3	Primary Scientific Question	273
4	Data Example	274
5	Data Analysis, Binary Logistic Regression	274

6	Data Analysis, Poisson Regression	275
7	Graphical Analysis	276
8	Conclusion	276
9	Note	277
48	Ordinal Regression for Data with Underpresented Outcome Categories (450 Patients)	279
1	General Purpose	279
2	Schematic Overview of the Type of Data File	279
3	Primary Scientific Question	280
4	Data Example	280
5	Table QoL Score Frequencies	280
6	Multinomial Regression	281
7	Ordinal Regression	281
8	Conclusion	285
9	Note	285
49	Probit Regression, Binary Data as Response Rates (14 Tests)	287
1	General Purpose	287
2	Schematic Overview of Type of Data File	287
3	Primary Scientific Question	288
4	Data Example	288
5	Simple Probit Regression	288
6	Multiple Probit Regression	291
7	Conclusion	296
8	Note	296
50	Monte Carlo Tests for Binary Data (139 Physicians and 55 Patients)	297
1	General Purpose	297
2	Schematic Overview of Type of Data File, Paired Data	297
3	Primary Scientific Question, Paired Data	298
4	Data Example, Paired Data	298
5	Analysis: Monte Carlo, Paired Data	298
6	Schematic Overview of Type of Data File, Unpaired Data	299
7	Primary Scientific Question, Unpaired Data	300
8	Data Example, Unpaired Data	300
9	Data Analysis, Monte Carlo, Unpaired Data	300
10	Conclusion	301
11	Note	301
51	Loglinear Models, Logit Loglinear Models (445 Patients)	303
1	General Purpose	303
2	Schematic Overview of Type of Data File	303
3	Primary Scientific Question	304
4	Data Example	304

5	Multinomial Logistic Regression	304
6	Logit Loglinear Modeling	305
7	Conclusion	308
8	Note	309
52	Loglinear Models, Hierarchical Loglinear Models (445 Patients)	311
1	General Purpose	311
2	Schematic Overview of Type of Data File	313
3	Primary Scientific Question	314
4	Data Example	314
5	Analysis: First and Second Order Hierarchical Loglinear Modeling	314
6	Analysis: Third Order Hierarchical Loglinear Modeling	315
7	Analysis: Fourth Order Hierarchical Loglinear Modeling	317
8	Conclusion	318
9	Note	319
53	Validating Qualitative Diagnostic Tests (575 Patients)	321
1	General Purpose	321
2	Schematic Overview of Type of Data File	322
3	Primary Scientific Question	322
4	Data Example	322
5	Drawing Histograms	323
6	Validating the Qualitative Diagnostic Test	324
7	Conclusion	326
8	Note	326
54	Reliability Assessment of Qualitative Diagnostic Tests (17 Patients)	327
1	General Purpose	327
2	Schematic Overview of Type of Data File	327
3	Primary Scientific Question	328
4	Data Example	328
5	Analysis: Calculate Cohen's Kappa	328
6	Conclusion	329
7	Note	329
 Part III Survival and Longitudinal Data		
55	Log Rank Testing (60 Patients)	333
1	General Purpose	333
2	Schematic Overview of Type of Data File	334
3	Primary Scientific Question	335
4	Data Example	335
5	Log Rank Test	335
6	Conclusion	337
7	Note	337

56	Cox Regression With/Without Time Dependent Variables (60 Patients)	339
1	General Purpose of Cox Regression	339
2	Schematic Overview of Type of Data File	340
3	Primary Scientific Question	340
4	Data Example	341
5	Simple Cox Regression	341
6	Multiple Cox Regression	343
7	Cox Regression with Time Dependent Variables Explained	344
8	Data Example of Time Dependent Variables	344
9	Cox Regression Without Time Dependent Variables	345
10	Cox Regression with Time Dependent Variables	345
11	Conclusion	346
12	Note	346
57	Segmented Cox Regression (60 Patients)	347
1	General Purpose	347
2	Schematic Overview of Type of Data File	347
3	Primary Scientific Question	348
4	Data Example	348
5	Simple Time Dependent Cox Regression	349
6	Segmented Time Dependent Cox Regression	350
7	Multiple Segmented Time Dependent Cox Regression	350
8	Conclusion	351
9	Note	351
58	Assessing Seasonality (24 Averages)	353
1	General Purpose	353
2	Schematic Overview of Type of Data File	354
3	Primary Scientific Question	354
4	Data Example	355
5	Graphs of Data	355
6	Assessing Seasonality with Autocorrelations	357
7	Conclusion	358
8	Note	358
59	Interval Censored Data Analysis for Assessing Mean Time to Cancer Relapse (51 Patients)	359
1	General Purpose	359
2	Schematic Overview of Type of Data File	360
3	Primary Scientific Question	360
4	Data Example	360
5	Cox Regression	361
6	Interval Censored Analysis in Generalized Linear Models	362
7	Conclusion	363
8	Note	363

60 Polynomial Analysis of Circadian Rhythms
(1 Patient with Hypertension) 365

1 General Purpose 365

2 Schematic Overview of Type of Data File 366

3 Primary Scientific Question 366

4 Data Example 366

5 Polynomial Analysis 367

6 Conclusion 370
