

Contents

1	Electromagnetic Optics	1
1.1	Spectrum of Electromagnetic Waves	1
1.2	Electromagnetic Waves in Vacuum	3
1.3	Polarization of Light	5
1.4	Paraxial Approximation	6
1.4.1	Spherical Waves	8
1.4.2	Gaussian Spherical Waves	9
1.5	Diffraction Fresnel Approximation	13
1.6	Fraunhofer Diffraction	17
1.6.1	Rectangular and Circular Apertures	19
1.6.2	Periodical Transmission Function	21
2	Optical Components and Methods	25
2.1	Electromagnetic Waves in Matter	25
2.2	Reflection and Refraction	28
2.2.1	Dielectric Interface	28
2.2.2	Reflection from a Metallic Surface	33
2.2.3	Anti-reflection Coating	35
2.2.4	Multilayer Dielectric Mirror	38
2.2.5	Beam Splitter	40
2.2.6	Total-Internal-Reflection Prism	41
2.2.7	Evanescent Wave	42
2.2.8	Thin Lens and Spherical Mirror	45
2.2.9	Focusing Spherical Waves	47
2.2.10	Focusing Gaussian Spherical Waves	48
2.2.11	Matrix Optics	50
2.3	Fourier Optics	52
2.4	Spectral Analysis	54
2.4.1	Dispersive Prism	54
2.4.2	Transmission Grating	55

2.4.3	Reflection Grating	57
2.4.4	Fabry-Perot Interferometer	59
2.5	Waves in Anisotropic Media	63
2.5.1	Polarizers and Birefringent Plates	66
2.5.2	Jones Matrices	68
2.5.3	Rotatory Power	71
2.5.4	Faraday Effect	73
2.5.5	Optical Isolator	74
2.6	Waveguides	76
3	The Laser	81
3.1	Conventional Light Sources	81
3.2	Origins of the Laser	83
3.3	Properties of Oscillators	84
3.4	Emission and Absorption of Light	87
3.4.1	Einstein Treatment	91
3.5	Optical Amplification	93
3.6	Scheme and Characteristics of the Laser	96
3.7	Rate Equations	99
3.8	The Laser Cavity	101
3.9	Solid-State and Gas Lasers	104
3.10	Pulsed Lasers	108
3.10.1	Q-Switching	109
3.10.2	Mode-Locking	111
3.11	Properties of Laser Light	115
3.11.1	Directionality	115
3.11.2	Monochromaticity	116
3.11.3	Spectrum of Laser Pulses	117
4	Modulators	121
4.1	Linear Electro-Optic Effect	121
4.1.1	Phase Modulation	123
4.1.2	Amplitude Modulation	126
4.2	Quadratic Electro-Optic Effect	133
4.2.1	Liquid Crystal Modulators	135
4.3	Acousto-Optic Effect	137
4.3.1	Acousto-Optic Modulation	139
4.3.2	Acousto-Optic Deflection	142

5	Semiconductor Devices	145
5.1	Optical Properties of Semiconductors	145
5.2	Semiconductor Lasers	148
5.2.1	Homojunction Laser	148
5.2.2	Double-Heterojunction Structures	151
5.2.3	Emission Properties	155
5.3	Semiconductor Amplifiers	159
5.4	Electroluminescent Diodes	159
5.4.1	LEDs	159
5.4.2	OLEDs	161
5.5	Photodetectors	162
5.5.1	Photoelectric Detectors	162
5.5.2	Semiconductor Photodetectors	165
5.5.3	CCD Image Sensors	167
5.6	Electro-Absorption Modulators	167
6	Optical Fibers	171
6.1	Properties of Optical Fibers	171
6.1.1	Numerical Aperture	173
6.1.2	Modal Properties	173
6.2	Attenuation	176
6.3	Dispersion	178
6.3.1	Dispersive Propagation of Ultrashort Pulses	178
6.4	Fiber Types	182
6.5	Fiber-Optic Components	185
6.6	Fiber Amplifiers	187
6.7	Fiber Lasers	190
7	Nonlinear Optics	193
7.1	Introduction	193
7.2	Second-Harmonic Generation	194
7.2.1	Second-Order Nonlinear Optical Materials	198
7.2.2	Phase Matching	201
7.2.3	SHG with Ultrashort Pulses	203
7.3	Parametric Effects	205
7.4	Third-Order Effects	208
7.5	Stimulated Raman Scattering	214
7.6	Stimulated Brillouin Scattering	218
8	Applications	221
8.1	Information and Communication Technology	221
8.1.1	Optical Communications	222
8.1.2	Optical Memories	224
8.1.3	Integrated Photonics	226

8.2	Optical Metrology and Sensing	227
8.2.1	Measurements of Distance	227
8.2.2	Velocimetry	230
8.2.3	Optical Fiber Sensors	233
8.3	Laser Materials Processing	235
8.4	Biomedical Applications	236
8.4.1	Ophtalmology	237
8.4.2	Bioimaging	238
8.5	Liquid Crystal Displays	239
8.6	LED Applications	240
8.7	Photovoltaic Cells	241
Appendix A: System of Units and Relevant Physical Constants		243
Appendix B: List of Acronyms		245
Reading List		247
Index		249

Photonics

A Short Course

Degiorgio, V.; Cristiani, I.

2016, XII, 253 p. 124 illus., Softcover

ISBN: 978-3-319-20626-4
